

## **Woodfibre LNG Project**

### **Status of Provincial Certificate Conditions and Conditions of CEAA 2012 Decision Statement**

The Canadian Environmental Assessment Agency (Agency) and British Columbia's Environmental Assessment Office (EAO) will be posting documentation that Woodfibre LNG Limited provides to the Agency and EAO in regards to meeting the federal and provincial environmental assessment conditions of approval that were issued for the Woodfibre LNG Project. Both the Agency and EAO will be reporting on the status of the conditions on a periodic basis using the attached document. As the Woodfibre LNG Project moves into the construction phase, further documentation will be made available by the Agency and EAO.

The next steps for the Woodfibre LNG Project also include, but are not limited to, obtaining various permits and regulatory authorizations from agencies, including the British Columbia Oil and Gas Commission, Fisheries and Oceans Canada and Transport Canada. For a list of these permits, authorizations and plans, summarized on Woodfibre LNG Limited's website, [click here](#).

<b>Federal Conditions of CEAA 2012 Decision Statement</b>			
<b>2 General Conditions</b>			
2.1 The Proponent shall, throughout all phases of the Designated Project, ensure that its actions in meeting the conditions set out in this Decision Statement are considered in a careful and precautionary manner, promote sustainable development, are informed by the best available information and knowledge, including community and Aboriginal traditional knowledge, are based on validated methods and models, are undertaken by qualified individuals, and have applied the best available economically and technologically feasible mitigation measures.	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
2.2 The Proponent shall, where consultation is a requirement of a condition set out in this Decision Statement:	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	

<ul style="list-style-type: none"> <li>• 2.2.1 provide a written notice of the opportunity for the party or parties being consulted to present their views and information on the subject of the consultation;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 2.2.2 provide sufficient information and a reasonable period of time to permit the party or parties being consulted to prepare their views and information;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 2.2.3 provide a full and impartial consideration of any views and information presented by the party or parties being consulted; and</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 2.2.4 advise the party or parties that have provided comments on how the views and information received have been considered by the Proponent.</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<p>2.3 The Proponent shall, where consultation with Aboriginal groups is a requirement of a condition set out in this Decision Statement, and prior to initiating that consultation, communicate with each Aboriginal group to determine the manner by which to satisfy the consultation requirements referred to in condition 2.2, including methods of notification, the type of information and the period of time to be provided when seeking input, the process for full and impartial consideration of any views and information presented and the means by which each Aboriginal group</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	

will be informed of how the views and information received have been considered by the Proponent.			
2.4 The Proponent shall, where a follow-up program is a requirement of a condition set out in this Decision Statement:	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>2.4.1 undertake monitoring and analysis to verify the accuracy of the environmental assessment as it pertains to the particular condition and/or to determine the effectiveness of any mitigation measure(s);</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>2.4.2 determine whether additional mitigation measures are required based on the monitoring and analysis undertaken pursuant to condition 2.4.1; and</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>2.4.3 if additional mitigation measures are required pursuant to condition 2.4.2, implement the additional mitigation measures and monitor them pursuant to condition 2.4.1.</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
2.5 Where consultation with Aboriginal groups is a requirement of a follow-up program, the Proponent shall discuss with each Aboriginal group opportunities for the participation of that Aboriginal group in the implementation of the follow-up	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	

program as set out in condition 2.4.			
2.6 The Proponent shall, commencing in the reporting year that implementation of the conditions set out in this Decision Statement begins, prepare an annual report that sets out:	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>2.6.1 the activities undertaken in the reporting year to comply with each of the conditions set out in this Decision Statement;</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>2.6.2 how the Proponent complied with condition 2.1;</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>2.6.3 for conditions set out in this Decision Statement for which consultation is a requirement, how the Proponent considered any views and information that the Proponent received during or as a result of the consultation;</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>2.6.4 the results of the follow-up program requirements identified in conditions 3.14, 4.3, 6.5 7.2 and 9.3; and</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>2.6.5 any additional mitigation measures implemented or proposed to be implemented by the Proponent, as determined under condition 2.4.</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
2.7 The Proponent shall submit to the Agency the annual report referred to in condition 2.6, including an executive summary in both official languages, no later than March 31 following the reporting	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	

year to which the annual report applies.			
<p>2.8 The Proponent shall publish on the Internet, or any medium which is widely publicly available, the annual report and the executive summaries referred to in conditions 2.6 and 2.7, any plan(s) to offset the loss of fish and fish habitat referred to in condition 3.11, the archaeological and heritage resources management plan referred to in condition 8.1, the decommissioning plan referred to in condition 10.1, the annual report referred to in condition 10.3, the reports referred to in conditions 11.4.3 and 11.4.4, the communication plan referred to in condition 11.5, the implementation schedule referred to in condition 12.1 and any update(s) or revision(s) to the above documents, upon submission of these documents to the parties referenced in the respective conditions. The Proponent shall keep these documents publicly available for 25 years following the end of operation or until the end of decommissioning of the Designated Project, whichever comes first. The Proponent shall notify the Agency and Aboriginal groups of the availability of these documents once they are published.</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	
<p>2.9 The Proponent shall notify the Agency and Aboriginal groups in writing no later than 60 days after the day on which there is a transfer of ownership, care, control or management of the Designated Project in</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	

whole or in part.			
2.10 The Proponent shall consult with Aboriginal groups prior to initiating any material change(s) to the Designated Project that may result in adverse environmental effects, and shall notify the Agency in writing no later than 60 days prior to initiating the change(s).	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
2.11 In notifying the Agency pursuant to condition 2.10, the Proponent shall provide the Agency with an analysis of the adverse environmental effects of the change(s) to the Designated Project, as well as the results of the consultation with Aboriginal groups.	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<b>3 Fish and fish habitat</b>			
3.1 The Proponent shall conduct in-water construction activities during timing windows of least risk for the area, unless otherwise agreed to by relevant federal and provincial authorities. If in-water construction activities cannot be conducted during timing windows of least risk, the Proponent shall develop and implement additional mitigation measures, in consultation with Fisheries and Oceans Canada and Aboriginal groups, to protect fish during sensitive life stages.	<ul style="list-style-type: none"> <li>Construction</li> </ul>	<b>CEAA</b>	
3.2 The Proponent shall implement measures to mitigate adverse environmental effects of the Designated Project on fish and fish habitat from changes to water quality during all phases	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	

of the Designated Project. The mitigation measures shall include:			
<ul style="list-style-type: none"> <li>• 3.2.1 implementing erosion control measures and sediment control measures during all phases of the Designated Project;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.2.2 revegetating disturbed riparian areas, using native plant species, after construction;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.2.3 using silt control measures around in-water construction activities; and</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.2.4 preventing wet concrete or cement-laden water from entering the marine environment.</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
3.3 The Proponent shall implement measures to mitigate adverse environmental effects of the Designated Project on fish, including mortality, physical injury and behavioral change, during all phases of the Designated Project. The mitigation measures shall include:	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.3.1 isolating instream construction activities in Mill Creek from adjacent streamflow;</li> </ul>	<ul style="list-style-type: none"> <li>• Construction</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.3.2 salvaging and relocating fish during instream construction activities requiring isolation of freshwater fish habitat in Mill Creek;</li> </ul>	<ul style="list-style-type: none"> <li>• Construction</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.3.3 maintaining minimum flow in Mill Creek to support fish and fish habitat;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	

<ul style="list-style-type: none"> <li>3.3.4 designing, installing and operating a water intake structure to avoid or reduce the risk of injury and mortality to fish in Mill Creek;</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>3.3.5 taking into consideration the British Columbia Marine and Pile Driving Contractors Association's <i>Best Management Practices for Pile Driving and Related Operations</i> when conducting pile installation; and</li> </ul>	<ul style="list-style-type: none"> <li>Construction</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>3.3.6 implementing low-noise methods or sound dampening technologies to reduce the intensity of the sound generated or the level of sound propagation through the water column if underwater pressure pulse levels exceed 30 kilopascals during pile installation.</li> </ul>	<ul style="list-style-type: none"> <li>Construction</li> </ul>	<b>CEAA</b>	
3.4 The Proponent shall prevent or avoid the destruction of fish, or any potentially harmful effects to fish habitat, during all phases of the Designated Project when using explosives in or around water frequented by fish.	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
3.5 The Proponent shall remove existing creosote-treated piles in a manner to prevent the mobilization of deleterious substances in water frequented by fish, and taking into consideration navigational safety.	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
3.6 The Proponent shall design, install and operate any marine water intake to avoid or	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	

reduce the incidental capture of fish through entrainment and impingement, including the risk of entrainment of Pacific herring ( <i>Clupea pallasii</i> ) larvae.			
3.7 The Proponent shall design, install and operate any marine discharge diffuser to prevent the deposit of a deleterious substance in water frequented by fish and taking into consideration the Canadian Council of Ministers of the Environment's <i>Water Quality Guidelines for the Protection of Aquatic Life</i> for residual chlorine concentrations and water temperature.	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
3.8 The Proponent shall establish and maintain a marine mammal underwater noise impact area for all construction activities where underwater noise levels are predicted to exceed 160 decibels at a reference pressure of one micropascal to avoid adverse behavioural change in or injury to marine mammals. In doing so, the Proponent shall:	<ul style="list-style-type: none"> <li>Construction</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>3.8.1 identify each construction activity that generates underwater noise levels greater than 160 decibels and the periods of time when each activity occurs;</li> </ul>	<ul style="list-style-type: none"> <li>Construction</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>3.8.2 establish the boundary of the marine mammal underwater noise impact area for each construction activity identified in condition 3.8.1 at the distance from the activity at</li> </ul>	<ul style="list-style-type: none"> <li>Construction</li> </ul>	<b>CEAA</b>	

which the underwater noise level is predicted to reach 160 decibels;			
<ul style="list-style-type: none"> <li>• 3.8.3 employ a marine mammal observer, who is a qualified individual, and require that person to detect and report the presence of marine mammals in the marine mammal underwater noise impact area during construction activities identified in condition 3.8.1;</li> </ul>	<ul style="list-style-type: none"> <li>• Construction</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.8.4 stop or not start the construction activities identified in condition 3.8.1 if a marine mammal is detected in the marine mammal underwater noise impact area, and only begin or continue the construction activities identified in condition 3.8.1 once the marine mammal has moved out of the marine mammal underwater noise impact area; and</li> </ul>	<ul style="list-style-type: none"> <li>• Construction</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.8.5 implement mitigation measures, including sound dampening technology and soft-start procedures, to reduce construction noise levels in the marine mammal underwater noise impact area.</li> </ul>	<ul style="list-style-type: none"> <li>• Construction</li> </ul>	<b>CEAA</b>	
3.9 The Proponent shall require that LNG vessels associated with the Designated Project respect speed profiles applicable to the operation of the Designated Project, subject to navigational safety, to prevent or	<ul style="list-style-type: none"> <li>• Operations</li> </ul>	<b>CEAA</b>	

reduce the risks of collisions between LNG vessels and marine mammals.			
3.10 The Proponent shall require that LNG vessels and tug operators associated with the Designated Project report collisions with marine mammals in Howe Sound to the Canadian Coast Guard within two hours of a collision occurrence, and notify Aboriginal groups in writing.	<ul style="list-style-type: none"> <li>• Operations</li> </ul>	<b>CEAA</b>	
3.11 The Proponent shall, in consultation with Fisheries and Oceans Canada and Aboriginal groups, develop and implement any plan(s) required to offset the loss of fish and fish habitat associated with the carrying out of the Designated Project.	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
3.12 For any fish habitat offset areas proposed in any offsetting plan(s) under condition 3.11, and prior to submitting the offsetting plan to Fisheries and Oceans Canada, the Proponent shall determine whether there are adverse effects:	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.12.1 on migratory birds and their habitats;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.12.2 on terrestrial species, including amphibians and reptiles, and their habitats;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.12.3 on listed species at risk and their habitats;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.12.4 on the current use of lands and resources for traditional purposes by Aboriginal peoples;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 3.12.5 on the flow rates, water depths or water widths that may</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	

affect the passage of a vessel, including a vessel used by Aboriginal peoples in the context of their current use of lands and resources for traditional purposes;			
<ul style="list-style-type: none"> <li>3.12.6 on physical and cultural heritage and structure, site or thing that is of historical, archaeological, paleontological or architectural significance to Aboriginal peoples; and</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>3.12.7 from potential sources of contamination including polycyclic aromatic hydrocarbons, dioxins, furans, copper, lead, zinc, tri-n-butyltin, arsenic, cadmium and methyl-mercury in the receiving environment.</li> </ul>	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
3.13 The Proponent shall, if there are adverse effects on any of the elements set out in conditions 3.12.1 to 3.12.7, avoid or lessen those adverse effects.	<ul style="list-style-type: none"> <li>All phases</li> </ul>	<b>CEAA</b>	
3.14 The Proponent shall, in consultation with Fisheries and Oceans Canada and Aboriginal groups, develop, prior to construction, and implement, during all phases of the Designated Project, a follow-up program to verify the accuracy of the environmental assessment and to determine the effectiveness of the mitigation measures identified under conditions 3.1 to 3.10.	<ul style="list-style-type: none"> <li>Pre-construction</li> </ul>	<b>CEAA</b>	
<b>4 Migratory birds</b>			

<p>4.1 The Proponent shall carry out all phases of the Designated Project in a manner that protects migratory birds and avoids harming, killing or disturbing migratory birds or destroying, disturbing or taking their nests or eggs. In this regard, the Proponent shall take into account Environment and Climate Change Canada's <i>Avoidance Guidelines</i>. The Proponent's actions in applying the <i>Avoidance Guidelines</i> shall be in compliance with the <i>Migratory Birds Convention Act, 1994</i> and with the <i>Species at Risk Act</i>.</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	
<p>4.2 The Proponent shall:</p>			
<ul style="list-style-type: none"> <li>• 4.2.1 restrict flaring to the minimum required during operation, maintenance activities or emergencies to prevent the accumulation of natural gas and protect from overpressure;</li> </ul>	<ul style="list-style-type: none"> <li>• Operations</li> </ul>	<p><b>CEAA</b></p>	
<ul style="list-style-type: none"> <li>• 4.2.2 minimize flaring required for operation and maintenance activities during night time and during periods of migratory bird vulnerability; and</li> </ul>	<ul style="list-style-type: none"> <li>• Operations</li> </ul>	<p><b>CEAA</b></p>	
<ul style="list-style-type: none"> <li>• 4.2.3 control operational lighting to avoid attracting migratory birds.</li> </ul>	<ul style="list-style-type: none"> <li>• Operations</li> </ul>	<p><b>CEAA</b></p>	
<p>4.3 The Proponent shall develop, prior to construction, and implement, during all phases of the Designated Project, a follow-up program to determine the effectiveness</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	

of the mitigation measures used to avoid harm to migratory birds, their eggs and nests, including the measures used to comply with conditions 4.1 and 4.2.			
<b>5 Greenhouse gas emissions</b>			
5.1 The Proponent shall utilize electric drives during operation for the compression of natural gas or utilize other technology that would result in equivalent or reduced greenhouse gas emissions.	<ul style="list-style-type: none"> <li>• Operation</li> </ul>	<b>CEAA</b>	
5.2 The Proponent shall implement a leak detection and repair system to control fugitive emissions at the site of the Designated Project during operation.	<ul style="list-style-type: none"> <li>• Operation</li> </ul>	<b>CEAA</b>	
<b>6 Human health</b>			
6.1 The Proponent shall implement noise and air emission reduction measures during all phases of the Designated Project to avoid or reduce adverse environmental effects on human health, including:	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 6.1.1 complying with the <i>Waste Discharge Regulation</i> under British Columbia's <i>Environmental Management Act</i> for air emissions;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 6.1.2 following best management practices and guidance from the British Columbia Oil and Gas Commission's <i>Noise Control Best Practices Guidelines</i>; and</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	
<ul style="list-style-type: none"> <li>• 6.1.3 complying with the operational noise requirement of the British Columbia Oil and Gas</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<b>CEAA</b>	

<p>Commission's <i>Liquefied Natural Gas Facility Regulation</i>.</p>			
<p>6.2 The Proponent shall, in consultation with Aboriginal groups and other parties who may be adversely affected by the noise caused by the Designated Project, develop, prior to construction, and implement, during all phases of the Designated Project, a mechanism for receiving noise complaints associated with the Designated Project. The Proponent shall respond in a timely manner to any noise complaint(s) received.</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	
<p>6.3 The Proponent shall install and manage exterior lighting from all components of the Designated Project and during all phases of the Designated Project to prevent excessive emanation of light, by following the International Commission on Illumination's <i>CIE 150:2003 Guide on the Limitation of the Effects of Obtrusive Light from Outdoor Lighting Installations</i>, while meeting marine transportation and aviation safety requirements.</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	
<p>6.4 The Proponent shall monitor water quality and sediment, using as a benchmarks the Canadian Council of Ministers of the Environment's <i>Water Quality Guidelines for the Protection of Aquatic Life</i> and <i>Interim Sediment Quality Guidelines for the Protection of Aquatic Life</i>, and shall communicate any exceedance(s) of the Guidelines to relevant</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	

<p>government authorities and Aboriginal groups, and implement additional mitigation measures to remedy those exceedances.</p>			
<p>6.5 The Proponent shall, in consultation with Aboriginal groups and relevant health authorities, develop, prior to construction, and implement a follow-up program to verify the assessment predictions regarding the bioavailability and bioaccumulation of contaminants in fish consumed by humans. The follow-up program shall include:</p>	<ul style="list-style-type: none"> <li>• Pre-construction</li> </ul>	<p><b>CEAA</b></p>	
<ul style="list-style-type: none"> <li>• 6.5.1 prior to the commencement of marine in-water construction activities, establishing baseline conditions in the tissue of shellfish and groundfish for polycyclic aromatic hydrocarbons, polychlorinated dibenzo-p-dioxins and furans, copper, lead, zinc, tributyltin, arsenic, cadmium and methylmercury and using this information to update the human health risk assessment for the consumption of shellfish and groundfish;</li> </ul>	<ul style="list-style-type: none"> <li>• Pre-construction</li> </ul>	<p><b>CEAA</b></p>	
<ul style="list-style-type: none"> <li>• 6.5.2 during marine in-water construction activities, monitoring the re-suspension and bioavailability of polycyclic aromatic hydrocarbons, dioxins, furans, copper, lead, zinc, tri-n-butyltin, arsenic, cadmium and</li> </ul>	<ul style="list-style-type: none"> <li>• Pre-construction</li> </ul>	<p><b>CEAA</b></p>	

<p>methyl-mercury in the tissue of shellfish and groundfish; and</p>			
<ul style="list-style-type: none"> <li>6.5.3 if a potential for human health risk is identified in the updated human health risk assessment for the consumption of shellfish and groundfish referred in condition 6.5.1 or through monitoring referred in condition 6.5.2, conducting additional sampling of polycyclic aromatic hydrocarbons, dioxins, furans, copper, lead, zinc, tri-n-butyltin, arsenic, cadmium and methyl-mercury in the tissue of shellfish and groundfish to confirm the assessment predictions regarding the bioavailability and bioaccumulation of contaminants in fish consumed by humans. If required, additional sampling shall start immediately upon completion of marine in-water construction activities and continue for one year following completion of marine in-water construction activities. The Proponent shall communicate the results of the follow-up program, including the results of any additional sampling, to Aboriginal groups.</li> </ul>	<ul style="list-style-type: none"> <li>Pre-construction</li> </ul>	<p><b>CEAA</b></p>	
<p><b>7 Current use of lands and resources for traditional purposes and socioeconomic conditions</b></p>			

<p>7.1 The Proponent shall, in consultation with Aboriginal groups and other marine users, develop, prior to construction, and implement, during all phases of the Designated Project, a communication protocol related to marine transportation. The communication protocol shall include procedures and practices for sharing information between the Proponent and Aboriginal groups and other marine users on the following:</p>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	
<ul style="list-style-type: none"> <li>• 7.1.1 location and timing of construction activities associated with the Designated Project-related, location and timing of ferry and water taxi traffic associated with the Designated Project and location of the marine access route to be used by LNG vessels associated with the Designated Project in Howe Sound;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	
<ul style="list-style-type: none"> <li>• 7.1.2 location and timing of traditional activities by Aboriginal groups and of activities by other marine users;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	
<ul style="list-style-type: none"> <li>• 7.1.3 Designated Project-related safety procedures, such as navigation aids, updated navigational charts and use of escort tugboats;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>	
<ul style="list-style-type: none"> <li>• 7.1.4 areas where navigation may be controlled for safety reasons;</li> </ul>	<ul style="list-style-type: none"> <li>• All phases</li> </ul>	<p><b>CEAA</b></p>
