1.0 INTRODUCTION

1.1 PROJECT BACKGROUND

1 On March 11, 2014, Coastal GasLink Pipeline Ltd. (Coastal GasLink) submitted an
2 Application for an Environmental Assessment Certificate (EAC) to the British
3 Columbia (BC) Environmental Assessment Office (EAO) for the Coastal GasLink
4 Pipeline Project (Project). On October 23, 2014, Coastal GasLink received an EAC
5 (No. E14-03) for the Project.

6 The EAC for the Project is located on the BC EAO website at:
7 [http://a100.gov.bc.ca/appsdata/epic/html/deploy/epic_project_doc_list_392_a_waa.ht](http://a100.gov.bc.ca/appsdata/epic/html/deploy/epic_project_doc_list_392_a_waa.html)
8 [ml](http://a100.gov.bc.ca/appsdata/epic/html/deploy/epic_project_doc_list_392_a_waa.html)

9 Coastal GasLink developed an Aboriginal Consultation Plan, which was approved by
10 the BC Environmental Assessment Office (EAO) in April 2013. In accordance with
11 the Section 11 Order issued to Coastal GasLink, Aboriginal Consultation Reports
12 were submitted to the EAO in May 2013, April 2014 and July 2014.

13 In late 2014, Coastal GasLink facilitated an opportunity for information sharing and
14 intergenerational transfer of traditional and cultural knowledge for specific areas
15 along the Certified Pipeline Corridor. Approximately 80 Wet'suwet'en people
16 identifying as members of all 13 House groups participated. Office of the
17 Wet'suwet'en was invited but did not attend. During this time, Coastal GasLink was
18 informed of a culturally important site in the eastern portion of Wet'suwet'en territory.
19 Participants expressed concern that construction and operation of a portion of the
20 Certified Pipeline Corridor in the vicinity of the cultural site could disrupt important
21 traditional and cultural activities.

22 Coastal GasLink and the Wet'suwet'en Hereditary Chiefs held a follow-up meeting in
23 April 2015 where an alternate route option was discussed in further detail. Coastal
24 GasLink sought to validate and confirm the participants' interest in an alternate route
25 option before proceeding with further engineering and environmental studies.
26 Subsequent discussions about potential SHAR routing has been ongoing with
27 Wet'suwet'en hereditary and elected leaders, elders and community members since
28 Coastal GasLink was made aware of concerns.

29 The proposed South of Houston Alternate Route (proposed SHAR) has been
30 identified as an alternate route option to minimize potential adverse effects on
31 traditional and cultural use of a portion of the Certified Pipeline Corridor. Coastal
32 GasLink is requesting an amendment to its EAC in accordance with Section 19 of the
33 *BC Environmental Assessment Act*.

34

1 The requested amendment would add the proposed SHAR to the existing Certified
2 Pipeline Corridor, and one of the two potential route options for that portion of the
3 Certified Pipeline Corridor would be chosen for construction. Either of the route
4 options are technically feasible and could be constructed in compliance with the EAC
5 and the Project's Environmental Management Plan and associated resource
6 management and contingency plans, programs and reports. The Amendment
7 Application outlines the rationale for the proposed SHAR and provides a summary of
8 relevant baseline information and an assessment of potential adverse effects
9 associated with the proposed SHAR, where appropriate.

10 The management plans for the Project have been revised as a result of ongoing
11 consultation with regulatory agencies and Aboriginal groups, and ongoing
12 construction planning. On April 29, 2016, the BC EAO confirmed its approval of the
13 Project's Environmental Management Plan (EMP) and associated resource
14 management and contingency plans, programs and reports.

1.2 DOCUMENT PURPOSE

15 This Aboriginal Consultation Report has been prepared to support the EAC
16 Amendment Application and to amend the *Oil and Gas Activities Act* Section 25
17 Permit for Pipeline Section 6 (OGC No. 9708370) and Pipeline Section 7 (OGC No.
18 9708371) issued by the OGC. The intent of the Aboriginal Consultation Report is to
19 provide information on the consultation and engagement activities that have taken
20 place with Aboriginal groups from May 19, 2016 to March 16, 2018, regarding the
21 proposed SHAR. Coastal GasLink is conducting its consultation and engagement
22 activities to support regulatory review and related decisions for the amendment
23 applications concerning the proposed SHAR.

24

2.0 ABORIGINAL CONSULTATION OBJECTIVES

1 Aboriginal consultation and engagement for the Project is guided by the Aboriginal
2 Consultation Plan, approved by the EAO, and by TransCanada's principles, policies
3 and programs. The objectives of Coastal GasLink's Aboriginal consultation and
4 engagement initiatives are to:

- 5 • build and maintain positive long-term relationships with Aboriginal groups
6 potentially affected by the Project
- 7 • develop timely, transparent and accurate information to allow for informed,
8 effective and meaningful consultation with communities
- 9 • identify acceptable community consultation protocols and practices
- 10 • ensure that Aboriginal community input and concerns are gathered, understood
11 and integrated into Project design and execution, as appropriate
- 12 • ensure that Aboriginal groups are aware of how their participation has influenced
13 the environmental assessment and Project planning
- 14 • support the participation (e.g., capacity funding and information sharing) of
15 Aboriginal groups in regulatory processes
- 16 • ensure that concerns and issues with respect to potential effects related to
17 Aboriginal groups are identified and addressed, to the extent practical

3.0 ABORIGINAL GROUPS IN THE PROJECT AREA

3.1 PROJECT ABORIGINAL CONSULTATION SCOPE: ENVIRONMENTAL ASSESSMENT OFFICE

1 On March 8, 2013, the EAO issued the Section 11 Order for the Project, identifying
2 Aboriginal groups to be consulted by Coastal GasLink. On February 21, 2014, the
3 EAO issued a Section 13 Order amending the Section 11 Order to include Blueberry
4 River First Nations and Doig River First Nation on Schedule B, and Gitga'at First
5 Nation on Schedule C. On May 13, 2014, the EAO issued a Section 13 Order
6 amending the Section 11 Order to include Cheslatta Carrier Nation on Schedule C.

7 The list of Aboriginal groups in Schedule B of the Order is as follows:

- 8 • Blueberry River First Nations
- 9 • Dark House
- 10 • Doig River First Nation
- 11 • Haisla Nation
- 12 • Kitselas First Nation
- 13 • Lheidli-T'enneh First Nation
- 14 • McLeod Lake Indian Band
- 15 • Nadleh Whut'en First Nation
- 16 • Nak'azdli Band
- 17 • Nee-Tahi-Buhn Band
- 18 • Office of the Hereditary Chiefs of the Wet'suwet'en (Office of the Wet'suwet'en)
- 19 • Saik'uz First Nation
- 20 • Saulteau First Nations
- 21 • Skin Tyee Nation (Skin Tyee First Nation)
- 22 • Stelat'en First Nation
- 23 • Ts'il Kaz Koh First Nation (Burns Lake Band)
- 24 • West Moberly First Nations
- 25 • Wet'suwet'en First Nation
- 26 • Yekooche First Nation

27 The list of Aboriginal groups in Schedule C of the Order is as follows:

- 1 • Carrier Sekani Tribal Council
- 2 • Cheslatta Carrier Nation
- 3 • Fort Nelson First Nation
- 4 • Gitga'at First Nation
- 5 • Halfway River First Nation
- 6 • Lake Babine First Nation
- 7 • Lax Kw'alaams Indian Band
- 8 • Metlakatla First Nation
- 9 • Nazko First Nation
- 10 • Prophet River First Nation
- 11 • Tl'azt'en Nation
- 12 • Treaty 8 Tribal Association

3.2 PROJECT ABORIGINAL CONSULTATION SCOPE: OIL AND GAS COMMISSION

13 The OGC has identified the following Aboriginal groups to be engaged for the
14 Project:

- 15 • Blueberry River First Nations
- 16 • Dark House
- 17 • Haisla Nation
- 18 • Kitselas First Nation
- 19 • Lheidli-T'enneh First Nation
- 20 • McLeod Lake Indian Band
- 21 • Nadleh Whut'en First Nation
- 22 • Nak'azdli Band
- 23 • Nee-Tahi-Buhn Band
- 24 • Office of the Hereditary Chiefs of the Wet'suwet'en (Office of the Wet'suwet'en)
- 25 • Saik'uz First Nation
- 26 • Saulteau First Nations
- 27 • Skin Tyee Nation (Skin Tyee First Nation)
- 28 • Stelat'en First Nation

- 1 • Ts'il Kaz Koh First Nation (Burns Lake Band)
- 2 • West Moberly First Nations
- 3 • Wet'suwet'en First Nation

4 The OGC has also identified the following Aboriginal groups to be provided with
5 notifications regarding the Project:

- 6 • Blueberry River First Nation
- 7 • Carrier Sekani Tribal Council
- 8 • Cheslatta Carrier Nation
- 9 • Moricetown Indian Band
- 10 • Yekooche First Nation

3.3 PROPOSED SHAR ABORIGINAL CONSULTATION SCOPE: EAO AND OGC

11 Consistent with Coastal GasLink's approved Aboriginal Consultation Plan, Coastal
12 GasLink is consulting and engaging with the following Aboriginal groups whose
13 traditional territory or interests are potentially affected by the proposed SHAR:

- 14 • Nee-Tahi-Buhn Band
- 15 • Office of the Hereditary Chiefs of the Wet'suwet'en (Office of the Wet'suwet'en)
- 16 • Skin Tyee Nation (Skin Tyee First Nation)
- 17 • Stelat'en First Nation
- 18 • Wet'suwet'en First Nation

19 In addition to consulting with these five Aboriginal groups, Coastal GasLink has had
20 discussions and meetings concerning the proposed SHAR with potentially affected
21 Wet'suwet'en House Chiefs and Aboriginal community members. All Aboriginal
22 groups identified by the OGC and the EAO Section 11 Order, including Carrier
23 Sekani Tribal Council, Hagwilget Village Council, Moricetown Indian Band and
24 Yekooche First Nation, were notified of amendment applications for the proposed
25 SHAR.

4.0 PROPOSED SHAR CAPACITY FUNDING

1 Through agreements with Aboriginal groups, Coastal GasLink has provided capacity
2 funding to support participation in the regulatory process and review of regulatory
3 documents concerning the Project. In addition to the funding provided previously,
4 Coastal GasLink has offered additional funds to the potentially affected Aboriginal
5 groups to facilitate review of the amendment applications to the EAO and OGC for
6 the proposed SHAR. To date, three capacity funding agreements relating to the
7 proposed SHAR have been finalized with Skin Tyee First Nation, Stelat'en First
8 Nation and Wet'suwet'en First Nation.

5.0 PROPOSED SHAR FIELD PROGRAMS AND RELATED PERMITS

1 In preparation for the 2016 field program, Coastal GasLink identified required
 2 investigative permits and other approvals for biophysical data collection work
 3 associated with the proposed SHAR. As a follow-up to the field program information
 4 package shared with Aboriginal groups in May 2016, Coastal GasLink provided
 5 information on the types of permit applications it had submitted to provincial and
 6 federal regulatory agencies to support environmental and engineering field programs,
 7 as summarized in Table 5-1. Coastal GasLink provided notification by email to the
 8 identified Aboriginal groups that may have an interest in these permits before
 9 submitting the permit applications. The permit engagement process provided
 10 Aboriginal groups with opportunities to provide comments and questions to Coastal
 11 GasLink regarding the field program and related permits.

Table 5-1: Summary of Permits Issued to Coastal GasLink for Field Programs

Field Program	Regulatory Agency	Permits
Archaeology	BC MFLNRO	Heritage Inspection Permit
Wildlife	BC MFLNRO	<i>Wildlife Act</i> Permit for aerial raptor surveys
Aquatic Studies	BC MFLNRO	Application to Collect Fish for Scientific Purposes
	DFO	Scientific Fish Collection Permit
Engineering Field Program	OGC	Land Use Policy – permissions for conducting backpack drilling along ROW

6.0 ABORIGINAL TRADITIONAL KNOWLEDGE

6.1 TRADITIONAL ECOLOGICAL KNOWLEDGE STUDIES

1 Collection of Traditional Ecological Knowledge (TEK) information during the
2 biophysical field programs has contributed to understanding the potential adverse
3 effects of the Project, and has informed the EAO and OGC permit applications, as
4 well as the proposed SHAR amendment applications. TEK information was collected
5 through community participation in the following biophysical field programs for the
6 proposed SHAR:

- 7 • wildlife
- 8 • aquatics
- 9 • wetlands
- 10 • vegetation
- 11 • archaeology studies

12 In 2016, CH2M Hill Energy Limited (CH2M) and a local third-party Aboriginal
13 contractor facilitated the participation in biophysical field studies of Aboriginal
14 groups and Wet’suwet’en community members potentially affected by the proposed
15 SHAR. Field study types, timing and locations of work to be conducted was shared
16 with the Aboriginal groups. Coastal GasLink’s 2016 field programs included over
17 7,800 hours of participation by local Aboriginal people.

18 Coastal GasLink extended the invitation to participate in the biophysical field
19 programs and to provide TEK information to the potentially affected Aboriginal
20 groups.

21 The time, effort, commitment and participation by Aboriginal groups and
22 Wet’suwet’en community members was an important part of the success of the 2016
23 biophysical field program. The SHAR 2016 Field Summary memo, summarizing
24 TEK results, was sent to participating Aboriginal groups and the Aboriginal third-
25 party contractor on August 15, 2016 for review. A summary of field program
26 participation by the Aboriginal groups potentially affected by the proposed SHAR is
27 provided in Table 6-1.

Table 6-1: 2016 SHAR Field Program Participation Summary Table

Aboriginal Group	Biophysical Field Studies		TEK Results Review Memo Provided	Days of Participation in the Field
	Participated	Provided TEK		
Nee-Tahi-Buhn Band	Yes	Yes	August 15, 2016	42
Office of the Wet’suwet’en	Yes*	No	**October 3, 2017	42
Skin Tyee First Nation	Yes	Yes	August 15, 2016	42

Table 6-1: 2016 SHAR Field Program Participation Summary Table (cont'd)

Aboriginal Group	Biophysical Field Studies		TEK Results Review Memo Provided	Days of Participation in the Field
Stellat'en First Nation	Yes	Yes	August 15, 2016	42
Wet'suwet'en First Nation	Yes	Yes	August 15, 2016	42

* Wet'suwet'en community members participated in biophysical field studies for the proposed SHAR as facilitated through a third-party Aboriginal contractor, but did not provide TEK information on behalf of Office of the Wet'suwet'en
** Results review memo provided to third-party Aboriginal contractor to share with Wet'suwet'en participants on August 15, 2017. Coastal GasLink provided the results review memo directly to Office of the Wet'suwet'en on October 3, 2017.

1 Coastal GasLink will continue to engage with Aboriginal groups about their issues,
2 concerns and interests regarding the proposed SHAR.

6.2 TRADITIONAL LAND USE STUDIES

3 Traditional Land Use (TLU) information assists in identifying potential cultural,
4 social and economic impacts or benefits that may arise as a result of the Project. The
5 TLU information collected for the Project in 2013-2014 informed the EAO and OGC
6 applications for the Project, and the proposed SHAR Amendment Applications.

7 Coastal GasLink offered funding to assist Office of the Wet'suwet'en, Nee-Tahi-
8 Buhn Band, Skin Tyee First Nation, Stellat'en First Nation and Wet'suwet'en First
9 Nation in conducting community-directed TLU studies. As part of the TLU studies
10 for the Project, each participating Aboriginal group was asked to identify potential
11 subsistence activities and sites, including hunting, trapping, fishing, plant gathering,
12 trails and travelways, habitation sites and cultural sites, including gathering places
13 and sacred areas within the study area, including, but not limited to, the Project
14 footprint.

15 Nee-Tahi-Buhn Band, Skin Tyee First Nation, Stellat'en First Nation and
16 Wet'suwet'en First Nation provided Project-specific TLU studies to Coastal GasLink
17 (summarized in Table 6-2).

18 Rather than completing a TLU study, Office of the Wet'suwet'en chose to complete
19 and submit to Coastal GasLink a Rights and Title Report that documented TLU
20 activities within their traditional territory. Furthermore, in 2014, Coastal GasLink
21 conducted a review of the Wet'suwet'en witnesses' evidence given at the
22 Delgamuukw trial, including affidavit evidence and trial transcripts. Coastal
23 GasLink's review focused on evidence regarding the exercise of Aboriginal rights
24 and the Wet'suwet'en traditional territory, with particular emphasis on the location of
25 important sites in the vicinity of the proposed pipeline route.

Table 6-2: TLU Summary Table

Aboriginal Group	Draft TK Agreement provided by Coastal GasLink	TK Agreement Execution: Community Led, Third Party, or CH2M Facilitated	Interim or Progress Report Received	Final TLU Report Received	Name of TLU Report
Stellat'en First Nation	April 15, 2013	May 27, 2013	September 17, 2013	October 1, 2014	Stellat'en First Nation Land and Resource Use Study Report
Nee-Tahi-Buhn Band	December 19, 2012	June 26, 2013	September 13, 2013 Preliminary Report	August 10, 2014	"Give Me Back My Memories & Traditions" Assessment of the Potential Conflicts from the Proposed Coastal GasLink Pipeline Project on Traditional Land Uses and Values
Office of the Hereditary Chiefs of the Wet'suwet'en	–	–	–	October 24, 2014 Rights and Title Report	Wet'suwet'en Title & Rights and Coastal GasLink
Skin Tyee First Nation	January 22, 2013	July 4, 2013	September 26, 2013 Interim Report	December 15, 2014	Skin Tyee First Nation Traditional Land Use and Ecological Knowledge Study for TransCanada Coastal GasLink Pipeline Ltd.'s Proposed Pipeline Project Public Report

Aboriginal Group	Draft TK Agreement provided by Coastal GasLink	TK Agreement Execution: Community Led, Third Party, or CH2M Facilitated	Interim or Progress Report Received	Final TLU Report Received	Name of TLU Report
Wet'suwet'en First Nation	November 29, 2012	January 17, 2013 February 7, 2014 Agreement for additional TLU work	May 15, 2013 Progress Report October 9, 2013 Draft Final Report	December 20, 2013 July 15, 2014 December 18, 2017 (SHAR supplement)	Wet'suwet'en First Nation Traditional Use and Occupancy Site Study 2013 Final Report Wet'suwet'en First Nation Traditional Use and Occupancy Site (TUOS) Information and Mitigation Issues for South of Houston Alternate Route (SHAR)

2

7.0 ABORIGINAL CONSULTATION AND ENGAGEMENT ACTIVITIES

1 Consistent with Coastal GasLink's approved Aboriginal Consultation Plan, Coastal
2 GasLink is engaging with the following Aboriginal groups whose traditional territory
3 or interests are potentially affected by the proposed SHAR:

- 4 • Nee-Tahi-Buhn Band
- 5 • Office of the Hereditary Chiefs of the Wet'suwet'en (Office of the Wet'suwet'en)
- 6 • Skin Tyee Nation (Skin Tyee First Nation)
- 7 • Stelat'en First Nation
- 8 • Wet'suwet'en First Nation

9 All Aboriginal groups identified by the OGC and the EAO Section 11 Order,
10 including Carrier Sekani Tribal Council, Hagwilget Village Council, Moricetown
11 Indian Band and Yekooche First Nation, were informed of the amendment
12 applications for the proposed SHAR. This included maps and letters providing
13 information about the proposed amendment applications, with Coastal GasLink
14 inviting feedback and questions.

15 The five Aboriginal groups noted above received a more detailed information
16 package, which included shapefiles related to the proposed amendment applications.
17 Coastal GasLink is pursuing further discussion with these Aboriginal groups and is
18 gathering feedback to address any concerns that may arise.

7.1 NEE-TAHI-BUHN BAND

19 The following section outlines the consultation and engagement activities between
20 Coastal GasLink and Nee-Tahi-Buhn Band related to the proposed SHAR.

7.1.1 Sharing of Project Information

21 Coastal GasLink sent a letter by email to Nee-Tahi-Buhn Band on May 19, 2016,
22 regarding the proposed SHAR. Coastal GasLink advised that it was considering
23 adding an alternate route to the EAC and to the Section 25 Permit for the Project and
24 provided information on the proposed alternate route. Coastal GasLink informed
25 Nee-Tahi-Buhn Band that it would be proceeding with fieldwork to collect data on
26 the proposed SHAR and would be inviting Aboriginal groups to participate in the
27 field data collection. A map of the proposed SHAR accompanied the letter, and
28 shapefiles of the alternate route were uploaded to Nee-Tahi-Buhn Band's folder on
29 the Coastal GasLink SharePoint site.

1 Following the May 19, 2016, letter, CH2M Hill, on behalf of Coastal GasLink,
2 coordinated the participation of Nee-Tahi-Buhn Band in the proposed SHAR
3 biophysical field studies and in collecting TEK information.

4 In July 2016, LNG Canada announced that due to the challenges of the global energy
5 market, their joint venture participants determined that more time was needed before
6 taking a final investment decision (FID) on the Coastal Gaslink Project. Given the
7 delay in FID, Coastal GasLink adjusted its schedule for the proposed SHAR
8 amendment applications and did not proceed with further proposed SHAR
9 engagement after completing the field studies until August 2017.

10 Coastal GasLink sent a letter by email to Nee-Tahi-Buhn Band on August 14, 2017,
11 with an update on the status of the proposed SHAR amendment applications. Coastal
12 GasLink advised that it anticipated filing an amendment application in the fall of
13 2017 and provided information about the proposed SHAR and its associated field
14 programs. A map of the proposed SHAR accompanied the letter, and shapefiles of the
15 alternate route were uploaded to Nee-Tahi-Buhn Band's folder on the Coastal
16 GasLink SharePoint site. The letter invited Nee-Tahi-Buhn Band to contact Coastal
17 GasLink with questions or to arrange further discussion about the proposed SHAR.

18 Coastal GasLink telephoned Nee-Tahi-Buhn Band on August 15, 2017, in follow-up
19 to the August 14, 2017, letter. Coastal GasLink provided information to a Nee-Tahi-
20 Buhn Band council member about the proposed SHAR and reviewed the material
21 provided in the information package. Coastal GasLink explained that it was seeking
22 Nee-Tahi-Buhn Band's feedback on the proposed alternate route and advised that it
23 would be offering capacity funding for Nee-Tahi-Buhn Band to review and
24 participate in the regulatory process. Coastal GasLink telephoned Nee-Tahi-Buhn
25 Band on August 17, 2017, and provided proposed SHAR information to the Chief of
26 Nee-Tahi-Buhn Band. Nee-Tahi-Buhn Band expressed support for the proposed
27 SHAR if it contributes to a positive final investment decision.

28 Coastal GasLink sent an email to Nee-Tahi-Buhn Band on August 17, 2017,
29 expressing appreciation for the feedback provided by Nee-Tahi-Buhn Band during the
30 August 17, 2017, telephone call. Coastal GasLink requested that Nee-Tahi-Buhn
31 Band contact Coastal GasLink if they require additional information regarding the
32 proposed SHAR or would like a meeting for further discussion. Coastal GasLink
33 provided a proposed Letter of Agreement for the provision of capacity funding to
34 facilitate Nee-Tahi-Buhn Band's review of Coastal GasLink's amendment
35 applications for the proposed SHAR.

36 Nee-Tahi-Buhn Band sent an email to Coastal GasLink on August 17, 2017, stating
37 that they would be in contact with Coastal GasLink.

1 Coastal GasLink sent a follow-up email to Nee-Tahi-Buhn Band on September 5,
2 2017, inquiring as to whether Nee-Tahi-Buhn Band had any further comments on the
3 proposed alternate route or any questions regarding the Letter of Agreement sent on
4 August 17, 2017. Nee-Tahi-Buhn Band responded by email on September 5, 2017,
5 stating that Nee-Tahi-Buhn Band's negotiation team should be included in the
6 correspondence. Coastal GasLink responded by email on September 5, 2017,
7 confirming that the Nee-Tahi-Buhn Band negotiator has been included in the
8 proposed SHAR correspondence, including the email from earlier that day.

9 Coastal GasLink sent an email to Nee-Tahi-Buhn Band on September 19, 2017, in
10 follow up to previous correspondence regarding the proposed SHAR and associated
11 Letter of Agreement. Coastal GasLink expressed interest in speaking with Nee-Tahi-
12 Buhn Band regarding the offer of capacity funding and suggested a meeting in Burns
13 Lake that week. Nee-Tahi-Buhn Band responded by email on September 19, 2017,
14 advising that at that time it was not considering the proposed Letter of Agreement due
15 to concerns about the amount of capacity funding offered.

16 Coastal GasLink telephoned Nee-Tahi-Buhn Band on September 19, 2017, and was
17 informed that Nee-Tahi-Buhn Band would not be engaging with Coastal GasLink on
18 the proposed SHAR until other pre-existing executed agreements between Nee-Tahi-
19 Buhn Band and Coastal GasLink are resolved. Coastal GasLink confirmed its
20 commitment to working to address such concerns, and Nee-Tahi-Buhn Band advised
21 that it would follow up with Coastal GasLink on its concerns regarding the pre-
22 existing executed agreements.

23 Coastal GasLink telephoned Nee-Tahi-Buhn Band on October 16, 2017, and was
24 unable to leave a voicemail. Coastal GasLink sent a text message to Nee-Tahi-Buhn
25 Band on October 16, 2017, inquiring as to whether Nee-Tahi-Buhn Band would be
26 available for a meeting in Burns Lake that week. Nee-Tahi-Buhn Band responded by
27 text message on October 16, 2017, stating that Chief and Council were not available
28 to meet.

29 Coastal GasLink sent an email to Nee-Tahi-Buhn Band on October 19, 2017, advising
30 that it will be providing Nee-Tahi-Buhn Band with a draft of the proposed SHAR
31 Aboriginal Consultation Report early the following week. Coastal GasLink stated that
32 it would appreciate Nee-Tahi-Buhn Band's feedback on the draft Aboriginal
33 Consultation Report in advance of filing the amendment applications. Coastal
34 GasLink advised that the offer of capacity funding to review the proposed SHAR
35 amendment applications remains available to Nee-Tahi-Buhn Band.

36 Coastal GasLink sent an email to Nee-Tahi-Buhn Band on October 24, 2017,
37 providing the draft Aboriginal Consultation Report. Coastal GasLink advised that it is
38 providing the draft Aboriginal Consultation Report to potentially affected Aboriginal
39 groups in advance of filing the amendment applications. Coastal GasLink asked that

1 Nee-Tahi-Buhn Band contact Coastal GasLink with any questions or comments on
2 the draft Aboriginal Consultation Report and requested feedback before November 1,
3 2017. Coastal GasLink stated that there will be opportunities to review and comment
4 on the Aboriginal Consultation Report and the amendment applications through the
5 upcoming regulatory processes.

6 Coastal GasLink telephoned Nee-Tahi-Buhn Band on October 31, 2017, regarding the
7 draft Aboriginal Consultation Report. Coastal GasLink left a voicemail stating that it
8 was seeking Nee-Tahi-Buhn Band's feedback on the draft Aboriginal Consultation
9 Report by November 1, 2017, and asked that Nee-Tahi-Buhn Band contact Coastal
10 GasLink with any comments or questions.

11 Coastal GasLink sent an email to Nee-Tahi-Buhn Band on November 9, 2017,
12 advising that amendment applications had been filed with the EAO and OGC for the
13 proposed SHAR. Coastal GasLink provided the link to access the EAC Amendment
14 Application on the EAO website and confirmed that the EAC Amendment
15 Application for the proposed SHAR had been uploaded to Nee-Tahi-Buhn Band's
16 folder on the Coastal GasLink SharePoint site. Coastal GasLink asked that Nee-Tahi-
17 Buhn Band contact Coastal GasLink with questions or to request a hard copy of the
18 EAC Amendment Application. A soft copy of the EAC Amendment Application on a
19 secure USB flash drive was couriered to Nee-Tahi-Buhn Band.

20 Nee-Tahi-Buhn Band telephoned Coastal GasLink on November 15, 2017, to confirm
21 its intent to participate in the EAO's Working Group for the proposed SHAR. Coastal
22 GasLink advised that a soft copy of the EAC Amendment Application on a secure
23 USB flash drive was couriered to Nee-Tahi-Buhn Band's office, and requested that
24 Coastal GasLink be contacted with any questions on the EAC Amendment
25 Application.

26 Coastal GasLink and Nee-Tahi-Buhn Band participated in the EAO Working Group
27 introductory teleconference on November 15, 2017. Background materials regarding
28 the proposed SHAR, including PowerPoint presentations, were provided to Nee-Tahi-
29 Buhn Band by the EAO in advance.

30 Coastal GasLink hosted a teleconference call with Nee-Tahi-Buhn Band and its legal
31 counsel on November 20, 2017, to discuss the proposed SHAR Amendment
32 Application.

33 Coastal GasLink and Nee-Tahi-Buhn Band participated in the EAO Sub-Working
34 Group meeting on November 23, 2017, to discuss grizzly bear. Coastal GasLink
35 distributed a summary and location of data references accessed for linear road density
36 analysis, as requested by a participating Working Group member, on November 24,
37 2017.

1 Coastal GasLink sent an email to Nee-Tahi-Buhn Band on November 23, 2017,
2 advising that the secure USB flash drive had been successfully delivered to the Nee-
3 Tahi-Buhn Band office. Coastal GasLink informed Nee-Tahi-Buhn Band that a
4 delivery pick-up notice had been left for Nee-Tahi-Buhn Band's negotiator because
5 the USB delivery was unsuccessful.

6 Coastal GasLink telephoned Nee-Tahi-Buhn Band on December 1, 2017, regarding
7 the proposed SHAR capacity funding but was unable to leave a voicemail because the
8 mailbox was full. Nee-Tahi-Buhn Band returned Coastal GasLink's call later that day
9 and advised that Nee-Tahi-Buhn Band would be submitting a proposed SHAR
10 workplan and budget to Coastal GasLink.

11 Nee-Tahi-Buhn Band legal counsel sent a letter by email to Coastal GasLink, EAO
12 and OGC on December 1, 2017, outlining a proposed SHAR budget and requesting
13 an extension for comments on the proposed SHAR amendment applications.

14 Coastal GasLink legal counsel sent a letter by email to Nee-Tahi-Buhn Band legal
15 counsel on December 15, 2017, in response to Nee-Tahi-Buhn Band's December 1,
16 2017, letter. Coastal GasLink reconfirmed its offer of capacity funding to support
17 Nee-Tahi-Buhn Band's review of amendment applications for the proposed SHAR
18 through a proposed Letter of Agreement originally provided on August 17, 2017.
19 Coastal GasLink provided clarification as to the scope of the review and noted the
20 work previously undertaken by Coastal GasLink and Nee-Tahi-Buhn Band with
21 respect to the Project. Coastal GasLink also forwarded this letter to Nee-Tahi-Buhn
22 Band council and negotiator on December 19, 2017.

23 Nee-Tahi-Buhn Band sent an email to Coastal GasLink on December 18, 2017,
24 requesting that the SHAR 2016 Field Summary memo originally provided by CH2M
25 Hill to Nee-Tahi-Buhn Band on August 15, 2016, be re-sent. Coastal GasLink
26 provided the memo by email to Nee-Tahi-Buhn Band on December 19, 2017, and
27 asked that Coastal GasLink be contacted with any questions on the information
28 therein.

29 Nee-Tahi-Buhn Band legal counsel sent a letter by email to Coastal GasLink, EAO
30 and OGC on January 11, 2018, outlining the tasks required by Nee-Tahi-Buhn Band
31 to comment on the EAC Amendment Application and providing reasoning behind
32 why Nee-Tahi-Buhn Band will not be able to meet the extension deadline proposed
33 by the EAO and OGC.

34 Coastal GasLink provided technical inputs to the EAO relating to Nee-Tahi-Buhn
35 Band's January 11, 2018, letter on January 18, 2018, to support its government-to-
36 government discussions with Nee-Tahi-Buhn Band. Coastal GasLink submitted its
37 responses to Working Group comments, which included responses to comments

1 discussed with Nee-Tahi-Buhn Band in relation to its January 11, 2018, letter, with
2 the EAO on January 22, 2018.

3 Coastal GasLink legal counsel sent a letter by email to Nee-Tahi-Buhn Band legal
4 counsel on January 24, 2018, in response to Nee-Tahi-Buhn Band's January 11, 2018,
5 letter.

6 Coastal GasLink telephoned Nee-Tahi-Buhn Band on January 29, 2018, and January
7 31, 2018, in follow-up to the January 24, 2018, letter. Coastal GasLink left voice
8 messages requesting that the calls be returned.

9 Coastal GasLink, Nee-Tahi-Buhn Band, EAO and OGC met on February 7, 2018, to
10 discuss Nee-Tahi-Buhn Band's comments regarding the proposed SHAR. Discussion
11 focused on Nee-Tahi-Buhn Band's interest in participating in archaeological and
12 wetlands studies for the proposed SHAR. Nee-Tahi-Buhn Band expressed concern
13 that important cultural heritage sites associated with the proposed SHAR were not
14 included in the study area of the TLU Study completed for the Certified Project. The
15 parties agreed to schedule a community workshop to consider potential information
16 gaps.

17 Coastal GasLink telephoned Nee-Tahi-Buhn Band on February 21, 2018, to follow up
18 on Coastal GasLink's action items from the February 7, 2018, meeting. Coastal
19 GasLink confirmed the record of Nee-Tahi-Buhn Band's participation in the
20 archaeology field program for the proposed SHAR and was preparing transmittal of
21 the additional information to Nee-Tahi-Buhn Band. Coastal GasLink and Nee-Tahi-
22 Buhn Band discussed the proposed community workshop and agreed to hold this
23 meeting on March 14, 2018, in the Nee-Tahi-Buhn Band community. Coastal
24 GasLink inquired as to the status of the Letter of Agreement for capacity funding to
25 support review of the proposed SHAR Amendment Application. Nee-Tahi-Buhn
26 Band confirmed that capacity funding remained an outstanding issue. Coastal
27 GasLink informed Nee-Tahi-Buhn Band that it was currently updating the Aboriginal
28 Consultation Report for the proposed SHAR to include engagement until March 1,
29 2018, and committed to providing the draft Report to Nee-Tahi-Buhn Band for
30 review and comment before submitting the final report to the EAO.

31 Nee-Tahi-Buhn Band sent an email to Coastal GasLink on February 23, 2018,
32 requesting the archaeology field program participation information, as discussed
33 during the telephone call with Coastal GasLink on February 21, 2018. Coastal
34 GasLink sent an email to Nee-Tahi-Buhn Band on February 26, 2018, attaching the
35 requested information. Coastal GasLink advised that it will be uploading the
36 Archaeology Impact Assessment (AIA), which includes the assessment for the
37 proposed SHAR corridor, to Nee-Tahi-Buhn Band's folder on the Coastal GasLink
38 SharePoint site.

1 Coastal GasLink sent an email to Nee-Tahi-Buhn Band on February 28, 2018,
2 advising that the AIA report and indexed Table of Contents, which includes historical
3 resource information for the proposed SHAR, had been uploaded to Nee-Tahi-Buhn
4 Band's folder on the Coastal GasLink SharePoint site. Coastal GasLink asked that
5 Nee-Tahi-Buhn Band contact Coastal GasLink with questions.

6 As of March 1, 2018, Nee-Tahi-Buhn Band has not requested any further meetings to
7 discuss the proposed SHAR.

8 Coastal GasLink shared the Aboriginal Consultation Report with Nee-Tahi-Buhn
9 Band for review and comment on March 13, 2018, before submitting the final
10 Aboriginal Consultation Report to the Environmental Assessment Office. Through
11 engagement activities to date, Nee-Tahi-Buhn Band has not identified any proposed
12 changes to the Aboriginal Consultation Report for the proposed SHAR.

7.1.2 Capacity Funding

13 Coastal GasLink offered capacity funding to Nee-Tahi-Buhn Band to facilitate Nee-
14 Tahi-Buhn Band's participation in the regulatory process to review Coastal GasLink's
15 amendment applications to the EAO and the OGC for the proposed SHAR. A Letter
16 of Agreement was provided to Nee-Tahi-Buhn Band on August 17, 2017 for Nee-
17 Tahi-Buhn Band's consideration.

18 As of March 16, 2018, the Letter of Agreement had not been finalized.

7.1.3 Field Programs and Related Permits

19 Coastal GasLink has engaged Nee-Tahi-Buhn Band regarding environmental and
20 engineering field programs and associated permitting for the proposed SHAR.
21 Coastal GasLink's approach to engaging Aboriginal groups in field programs and
22 permitting is outlined in Section 5, Field Programs and Related Permits.

7.1.4 Aboriginal Traditional Knowledge

23 Nee-Tahi-Buhn Band participated in biophysical field studies for the proposed SHAR
24 and provided TEK information. TEK information collected during the 2016 field
25 season was sent on August 15, 2016, for Nee-Tahi-Buhn Band to review.

26 Nee-Tahi-Buhn Band provided an interim TLU report in September 2013 and a final
27 TLU report in August 2014. The results of the TLU studies and Aboriginal
28 Traditional Knowledge informed the assessment of potential adverse effects of the
29 proposed SHAR on traditional land and resource use. Coastal GasLink will continue
30 to engage with Nee-Tahi-Buhn Band regarding their issues, concerns and interests
31 regarding the proposed SHAR.

1 A detailed description of the Aboriginal Traditional Knowledge is provided in
2 Section 6.

7.2 OFFICE OF THE WET'SUWET'EN

3 The following section outlines consultation and engagement activities between
4 Coastal GasLink and Office of the Wet'suwet'en related to the proposed SHAR
5 Route.

7.2.1 Sharing of Project Information

6 Coastal GasLink sent a letter by email to Office of the Wet'suwet'en and the
7 potentially affected House Chiefs on May 19, 2016, regarding the proposed SHAR.
8 Coastal GasLink advised that it was considering adding an alternate route to the EAC
9 and to the Section 25 Permit for the Project and provided information on the proposed
10 alternate route. Coastal GasLink informed Office of the Wet'suwet'en that it would
11 be proceeding with fieldwork to collect data on the proposed SHAR and would be
12 inviting Aboriginal groups to participate in the field data collection. A map of the
13 proposed SHAR accompanied the letter, and shapefiles of the alternate route were
14 provided to Office of the Wet'suwet'en on a USB.

15 Following the May 19, 2016, letter, CH2M Hill, on behalf of Coastal GasLink,
16 coordinated the participation of Wet'suwet'en community members in the proposed
17 SHAR biophysical field studies and in the collection of TEK information through a
18 third-party Aboriginal contractor. Participants did not provide TEK information on
19 behalf of Office of the Wet'suwet'en.

20 In July 2016, LNG Canada announced that due to the challenges of the global energy
21 market, their joint venture participants determined that more time was needed before
22 taking a final investment decision (FID) on the Coastal Gaslink Project. Given the
23 delay in FID, Coastal GasLink adjusted its schedule for the proposed SHAR
24 amendment applications and did not proceed with further proposed SHAR
25 engagement after completing the field studies until August 2017.

26 Coastal GasLink sent a letter by email to Office of the Wet'suwet'en on August 14,
27 2017, with an update on the status of the proposed SHAR amendment applications.
28 Coastal GasLink advised that it anticipated filing an amendment application in the fall
29 of 2017 and provided information about the proposed SHAR and its associated field
30 programs. A map of the proposed SHAR accompanied the letter, and shapefiles of the
31 alternate route were uploaded to Office of the Wet'suwet'en's folder on the Coastal
32 GasLink SharePoint site. The letter invited Office of the Wet'suwet'en to contact
33 Coastal GasLink with questions or to arrange further discussion about the proposed
34 SHAR.

1 Coastal GasLink sent an email to Office of the Wet'suwet'en on August 17, 2017,
2 providing a proposed Letter of Agreement for the provision of capacity funding to
3 facilitate Office of the Wet'suwet'en's review of Coastal GasLink's amendment
4 applications for the proposed SHAR.

5 Coastal GasLink sent an email to Office of the Wet'suwet'en on September 5, 2017,
6 in follow up to the previous correspondence regarding the proposed SHAR. Coastal
7 GasLink inquired as to whether Office of the Wet'suwet'en had any questions on the
8 materials provided or would like additional information.

9 Office of the Wet'suwet'en sent an email to Coastal GasLink on September 6, 2017
10 advising that it would be submitting a revised workplan and budget. Office of the
11 Wet'suwet'en provided these materials on September 7, 2017, by email. Office of the
12 Wet'suwet'en suggested a conference call with Coastal GasLink to discuss the
13 proposed Letter of Agreement.

14 Coastal GasLink and Office of the Wet'suwet'en held a conference call on September
15 25, 2017, and on October 4, 2017, to discuss the proposed SHAR workplan and
16 budget submitted by Office of the Wet'suwet'en. Coastal GasLink advised that it
17 remained of the view that the funding offered was reasonable and commensurate with
18 the small nature and scope of the proposed SHAR and related amendment
19 applications. Coastal GasLink also advised that it had followed up on Office of the
20 Wet'suwet'en's questions regarding whether funding would be offered by the
21 regulatory agencies and advised Office of the Wet'suwet'en that funding may be
22 available. Coastal GasLink committed to responding to Office of the Wet'suwet'en's
23 request for biophysical field data collected for the proposed SHAR. During the
24 September 25, 2017, call, Coastal GasLink was advised by Office of the
25 Wet'suwet'en that it had not received the TEK results review. In response, Coastal
26 GasLink provided the TEK results review memo by email on October 3, 2017, to
27 Office of the Wet'suwet'en.

28 Coastal GasLink sent an email to Office of Wet'suwet'en on October 19, 2017,
29 advising that it will be providing Office of Wet'suwet'en with a draft of the proposed
30 SHAR Aboriginal Consultation Report early the following week. Coastal GasLink
31 stated that it would appreciate Office of the Wet'suwet'en's feedback on the draft
32 Aboriginal Consultation Report in advance of filing the proposed SHAR amendment
33 applications. Coastal GasLink provided an update regarding Office of the
34 Wet'suwet'en's request for the proposed SHAR biophysical field data, advising that it
35 is pursuing sharing the data through the Environmental Stewardship Initiative.
36 Coastal GasLink also advised that it would be sending Office of the Wet'suwet'en an
37 updated TEK results review memo shortly. Coastal GasLink telephoned Office of the
38 Wet'suwet'en regarding the draft Aboriginal Consultation report on the same date
39 and left a message at reception.

1 Coastal GasLink sent an email to Office of the Wet'suwet'en on October 24, 2017,
2 providing the draft Aboriginal Consultation Report. Coastal GasLink advised that it is
3 providing the draft Aboriginal Consultation Report to potentially affected Aboriginal
4 groups in advance of filing the proposed SHAR amendment applications. Coastal
5 GasLink asked that Office of the Wet'suwet'en contact Coastal GasLink with any
6 questions or comments on the draft Aboriginal Consultation Report and requested
7 feedback before November 1, 2017. Coastal GasLink stated that there will be
8 opportunities to review and comment on the Aboriginal Consultation Report and the
9 amendment applications through the upcoming regulatory processes.

10 Coastal GasLink sent an email to Office of the Wet'suwet'en on October 25, 2017,
11 attaching a cover letter and revised TEK results review memo. The letter advised that
12 Coastal GasLink requested that CH2M Hill update the TEK results review memo to
13 address the concerns expressed by Office of the Wet'suwet'en and the revised memo
14 replaces the version provided by Coastal GasLink on October 3, 2017.

15 Coastal GasLink telephoned Office of the Wet'suwet'en on October 31, 2017,
16 regarding the draft Aboriginal Consultation Report. Coastal GasLink left a voicemail
17 stating that it was seeking Office of the Wet'suwet'en's feedback on the draft
18 Aboriginal Consultation Report by November 1, 2017, and asked that Office of the
19 Wet'suwet'en contact Coastal GasLink with any comments or questions.

20 Office of the Wet'suwet'en sent an email to Coastal GasLink on November 1, 2017,
21 in response to Coastal GasLink's email of October 25, 2017, regarding the TEK
22 results review memo. Office of the Wet'suwet'en advised that it does not have a
23 communications agreement in place with Coastal GasLink to review or comment on
24 the proposed SHAR. Office of the Wet'suwet'en advised that it has not yet received a
25 response to the workplan and budget provided to Coastal GasLink on September 7,
26 2017, and asked that Coastal GasLink contact Office of the Wet'suwet'en to establish
27 an agreement.

28 Coastal GasLink sent an email to Office of the Wet'suwet'en on November 9, 2017,
29 advising that amendment applications had been filed with the EAO and OGC for the
30 proposed SHAR. Coastal GasLink provided the link to access the EAC Amendment
31 Application on the EAO website and confirmed that the EAC Amendment
32 Application had been uploaded to Office of the Wet'suwet'en's folder on the Coastal
33 GasLink SharePoint site. Coastal GasLink asked that Office of the Wet'suwet'en
34 contact Coastal GasLink with questions or to request a hard copy of the EAC
35 Amendment Application. A soft copy of the EAC Amendment Application on a
36 secure USB flash drive was couriered to Office of the Wet'suwet'en.

37 Coastal GasLink sent a letter by email to Office of the Wet'suwet'en on November 10,
38 2017, in response to Office of the Wet'suwet'en's email of November 1, 2017,
39 regarding the proposed SHAR workplan and budget. Coastal GasLink reconfirmed its

1 offer of capacity funding to support Office of the Wet'suwet'en's review of the
2 proposed SHAR through a Letter of Agreement and provided rationale for the amount
3 offered. Coastal GasLink expressed interest in meeting with Office of the
4 Wet'suwet'en to discuss the proposed SHAR, and the Certified Project. Coastal
5 GasLink and Office of the Wet'suwet'en participated in the EAO's Working Group
6 introductory teleconference on November 15, 2017. Background materials regarding
7 the proposed SHAR, including PowerPoint presentations, were provided to Office of
8 the Wet'suwet'en by the EAO in advance.

9 Coastal GasLink and Office of the Wet'suwet'en participated in the EAO Sub-
10 Working Group meeting on November 23, 2017, to discuss grizzly bear. Coastal
11 GasLink distributed a summary and location of data references accessed for linear
12 road density analysis, as requested by Office of the Wet'suwet'en, to participating
13 Working Group members on November 24, 2017.

14 Coastal GasLink telephoned Office of the Wet'suwet'en on November 16, 2017, to
15 follow up on items regarding the proposed SHAR. Office of the Wet'suwet'en
16 advised that it had not yet received the secure USB flash drive of the amendment
17 application. Office of the Wet'suwet'en expressed concern regarding the amount of
18 capacity funding offered. Office of the Wet'suwet'en confirmed that it had received
19 Coastal GasLink's November 10, 2017, letter, but had not yet had the opportunity to
20 respond. On November 17, 2017, Office of the Wet'suwet'en confirmed receipt of the
21 secure USB flash drive.

22 Coastal GasLink telephoned Office of the Wet'suwet'en on November 23, 2017,
23 regarding the proposed SHAR capacity funding. Office of the Wet'suwet'en
24 confirmed that capacity funding remained an outstanding issue.

25 Coastal GasLink telephoned Office of the Wet'suwet'en on December 5, 2017,
26 regarding the proposed SHAR capacity funding. Coastal GasLink left a voicemail.

27 Coastal GasLink received Office of the Wet'suwet'en's comments on the proposed
28 SHAR through the EAO Working Group on December 4, 2017.

29 Coastal GasLink telephoned Office of the Wet'suwet'en on December 11, 2017,
30 regarding the proposed SHAR capacity funding and left a voice message. Office of
31 the Wet'suwet'en returned Coastal GasLink's telephone call on the same day. Coastal
32 GasLink advised that Office of the Wet'suwet'en's workplan and budget identified
33 activities that are not specifically related to the review of the EAC Amendment
34 Application for the proposed SHAR. Office of the Wet'suwet'en submitted an
35 updated budget and workplan on the same date.

1 Coastal GasLink provided technical inputs relating to the proposed SHAR on
2 December 21, 2017, to the EAO to support its government-to-government discussions
3 with Office of the Wet'suwet'en.

4 Coastal GasLink sent a letter by email to Office of the Wet'suwet'en on January 15,
5 2018, in response to Office of the Wet'suwet'en's workplan and budget submitted on
6 December 11, 2017. Coastal GasLink reconfirmed its original offer of capacity
7 funding through a Letter of Agreement and provided rationale for the amount offered.

8 Coastal GasLink submitted its responses to Working Group comments, which
9 included responses to comments discussed with Office of the Wet'suwet'en through
10 Sub-Working Group meetings, to the EAO on January 22, 2018.

11 Coastal GasLink telephoned Office of the Wet'suwet'en on January 30, 2018, to
12 inform that a secure USB flash drive containing biophysical field data collected for
13 the proposed SHAR would be couriered that week to Office of the Wet'suwet'en, per
14 their request. Office of the Wet'suwet'en acknowledged receipt of the January 15,
15 2018, letter and committed to review their funding requirements for the amendment
16 application review.

17 Coastal GasLink couriered a secure USB flash drive containing biophysical field data
18 to Office of the Wet'suwet'en on February 2, 2018.

19 Coastal GasLink sent an email to Office of the Wet'suwet'en on February 21, 2018,
20 in response to Office of the Wet'suwet'en's request to the EAO for ancillary site
21 shapefiles for the proposed SHAR. Coastal GasLink provided information regarding
22 the ancillary site permitting process and confirmed its understanding that the OGC
23 had provided the requested information to Office of the Wet'suwet'en. Office of the
24 Wet'suwet'en responded by email on the same date emphasizing the importance of
25 shapefiles to assess the potential effects of the Project. Coastal GasLink responded by
26 email on the same date advising that a secure USB flash drive was delivered to Office
27 of the Wet'suwet'en on February 13, 2018, per the courier delivery notice. Coastal
28 GasLink confirmed that the requested shapefiles could also be accessed through
29 Office of the Wet'suwet'en's folder on Coastal GasLink's SharePoint site and offered
30 to provide assistance in retrieving the information. Office of the Wet'suwet'en
31 responded by email on February 22, 2018, advising that a courier delivery had not
32 been made and requesting that the secure USB flash drive be re-sent. Office of the
33 Wet'suwet'en provided a new address for delivery. Coastal GasLink telephoned
34 Office of the Wet'suwet'en on the same date to confirm delivery details. Office of the
35 Wet'suwet'en confirmed receipt of the secure USB flash drive on March 2, 2018.

36 Coastal GasLink telephoned Office of the Wet'suwet'en on February 28, 2018,
37 inquiring as to whether Office of the Wet'suwet'en would be proceeding with
38 finalizing the proposed SHAR Letter of Agreement. Office of the Wet'suwet'en

1 indicated that it would review the Letter of Agreement and was considering accepting
2 the funding. Coastal GasLink informed Office of the Wet'suwet'en that it was
3 currently updating the proposed SHAR Aboriginal Consultation Report to include
4 engagement until March 1, 2018, and committed to providing the draft Report to
5 Office of the Wet'suwet'en for review and comment before submitting the final
6 report to the EAO.

7 Coastal GasLink sent an email to Office of the Wet'suwet'en on February 28, 2018,
8 advising that an AIA report and indexed Table of Contents, which includes historical
9 resource information for the proposed SHAR corridor, had been uploaded to Office of
10 the Wet'suwet'en's folder on the Coastal GasLink SharePoint site. Coastal GasLink
11 asked that Office of the Wet'suwet'en contact Coastal GasLink with questions.

12 Coastal GasLink shared the Aboriginal Consultation Report with Office of the
13 Wet'suwet'en for review and comment on March 13, 2018, before submitting the
14 final Aboriginal Consultation Report to the Environmental Assessment Office.
15 Through engagement activities to date, Office of the Wet'suwet'en has not identified
16 any proposed changes to the Aboriginal Consultation Report for the proposed SHAR.

7.2.2 Additional Consultation and Engagement

17 In addition to the above-noted consultation and engagement, Coastal GasLink has
18 also had discussions and meetings concerning the proposed SHAR with potentially
19 affected House Chiefs and community members.

7.2.3 Capacity Funding

20 Coastal GasLink offered capacity funding to Office of the Wet'suwet'en to facilitate
21 its participation in the regulatory process to review Coastal GasLink's amendment
22 applications to the EAO and the OGC for the proposed SHAR. A Letter of
23 Agreement was provided to Office of the Wet'suwet'en on August 17, 2017, for
24 Office of the Wet'suwet'en's consideration. As of March 16, 2018, the Letter of
25 Agreement had not been finalized.

7.2.4 Field Programs and Related Permits

26 Coastal GasLink has engaged Office of the Wet'suwet'en regarding environmental
27 and engineering field programs and associated permitting for the proposed SHAR.
28 Coastal GasLink's approach to engaging Aboriginal groups in field programs and
29 permitting is outlined in Section 5, Field Programs and Related Permits.

7.2.5 Aboriginal Traditional Knowledge

30 Wet'suwet'en Hereditary Chiefs, community members and Elders participated in
31 biophysical field studies for the proposed SHAR, but did not provide TEK

1 information on behalf of Office of the Wet'suwet'en. Participants in the field studies
2 were not selected by Office of the Wet'suwet'en; instead participation was facilitated
3 through a third-party Aboriginal contractor as was the practice from previous field
4 studies in the region. TEK information collected during the 2016 field season was
5 sent on August 15, 2016, to the third-party Aboriginal contractor. In September 2017,
6 Coastal GasLink became aware that the TEK results review memo was not provided
7 to Office of the Wet'suwet'en. Coastal GasLink provided the results review memo
8 directly to Office of the Wet'suwet'en on October 3, 2017. Coastal GasLink provided
9 the revised TEK results review memo on October 25, 2017, to respond to concerns
10 expressed by Office of the Wet'suwet'en.

11 Office of the Wet'suwet'en elected not to participate in TLU studies, and instead
12 chose to author a Title and Rights Report that was submitted to the EAO and Coastal
13 GasLink in October 2014. This Title and Rights report informed the assessment of
14 potential adverse effects of the proposed SHAR on traditional land and resource use.
15 Coastal GasLink will continue to engage with Office of the Wet'suwet'en regarding
16 their issues, concerns and interests regarding the proposed SHAR.

17 A detailed description of the Aboriginal Traditional Knowledge is provided in
18 Section 6.

7.3 SKIN TYEE FIRST NATION

19 The following section outlines the consultation and engagement activities between
20 Coastal GasLink and Skin Tyee First Nation related to the proposed SHAR.

7.3.1 Sharing of Project Information

21 Coastal GasLink sent a letter by email to Skin Tyee First Nation on May 19, 2016,
22 regarding the proposed SHAR. Coastal GasLink advised that it was considering
23 adding an alternate route to the EAC and to the Section 25 Permit for the Project and
24 provided information on the proposed alternate route. Coastal GasLink informed Skin
25 Tyee First Nation that it would be proceeding with fieldwork to collect data on the
26 proposed SHAR and would be inviting Aboriginal groups to participate in the field
27 data collection. A map of the proposed SHAR accompanied the letter, and shapefiles
28 of the alternate route were uploaded to Skin Tyee First Nation's folder on the Coastal
29 GasLink SharePoint site.

30 Following the May 19, 2016, letter, CH2M Hill, on behalf of Coastal GasLink,
31 coordinated the participation of Skin Tyee First Nation in the proposed SHAR
32 biophysical field studies and in collecting TEK information.

33 In July 2016, LNG Canada announced that due to the challenges of the global energy
34 market, their joint venture participants determined that more time was needed before

1 taking a final investment decision (FID) on the Coastal Gaslink Project. Given the
2 delay in FID, Coastal GasLink adjusted its schedule for the proposed SHAR
3 amendment applications and did not proceed with further proposed SHAR
4 engagement after completing the field studies until August 2017.

5 Coastal GasLink sent a letter by email to Skin Tyee First Nation on August 14, 2017,
6 with an update on the status of the proposed SHAR amendment applications. Coastal
7 GasLink advised that it anticipated filing an amendment application in the fall of
8 2017 and provided information about the proposed SHAR and its associated field
9 programs. A map of the proposed SHAR accompanied the letter, and shapefiles of the
10 alternate route were uploaded to Skin Tyee First Nation's folder on the Coastal
11 GasLink SharePoint site. The letter invited Skin Tyee First Nation to contact Coastal
12 GasLink with questions or to arrange further discussion about the proposed SHAR.

13 Coastal GasLink telephoned Skin Tyee First Nation on August 15, 2017, in follow up
14 to the August 14, 2017, letter. Coastal GasLink provided information on the proposed
15 SHAR and reviewed the material provided in the information package. Coastal
16 GasLink explained that it was seeking Skin Tyee First Nation's feedback on the
17 proposed alternate route and advised that it would be offering capacity funding for
18 Skin Tyee First Nation to review and participate in the regulatory process. The parties
19 agreed that the proposed SHAR would be added to the agenda for the Liaison
20 Committee meeting scheduled for September 5, 2017.

21 Coastal GasLink sent an email to Skin Tyee First Nation on August 17, 2017,
22 providing a proposed Letter of Agreement for the provision of capacity funding to
23 facilitate Skin Tyee First Nation's review of Coastal GasLink's amendment
24 applications for the proposed SHAR.

25 Coastal GasLink met with Skin Tyee First Nation on September 5, 2017. Coastal
26 GasLink provided information about the proposed SHAR and provided hard copies of
27 the proposed SHAR map and a mapbook. Skin Tyee First Nation did not have
28 comments on the proposed SHAR at that time, and expressed interest in reviewing the
29 amendment applications.

30 Skin Tyee First Nation hand delivered the executed proposed SHAR Letter of
31 Agreement to Coastal GasLink on September 19, 2017.

32 Coastal GasLink telephoned Skin Tyee First Nation on October 19, 2017, advising
33 that it will be providing Skin Tyee First Nation with a draft of the SHAR Aboriginal
34 Consultation Report early the following week. Coastal GasLink explained the
35 purpose of the draft Aboriginal Consultation Report and stated that it would
36 appreciate Skin Tyee First Nation's feedback on the draft Aboriginal Consultation
37 Report before it is filed with the amendment applications. The parties agreed to a
38 meeting on October 29, 2017, to review the draft Aboriginal Consultation Report.

1 Coastal GasLink sent a follow-up email on October 19, 2017, thanking Skin Tyee
2 First Nation for the telephone conversation and restating the information provided
3 over the phone.

4 Coastal GasLink sent an email to Skin Tyee First Nation on October 24, 2017,
5 providing the draft Aboriginal Consultation Report. Coastal GasLink advised that it is
6 providing the draft Aboriginal Consultation Report to potentially affected Aboriginal
7 groups in advance of filing the proposed SHAR amendment applications. Coastal
8 GasLink asked that Skin Tyee First Nation contact Coastal GasLink with any
9 questions or comments on the draft Aboriginal Consultation Report and requested
10 feedback before November 1, 2017. Coastal GasLink stated that there will be
11 opportunities to review and comment on the draft Aboriginal Consultation Report and
12 the amendment applications through the upcoming regulatory processes.

13 Coastal GasLink met with Skin Tyee First Nation on October 29, 2017, and provided
14 information on the proposed SHAR. On October 30, 2017, Coastal GasLink met with
15 Skin Tyee First Nation and discussed the draft Aboriginal Consultation Report. Skin
16 Tyee First Nation did not have comments on the draft Aboriginal Consultation Report.

17 Coastal GasLink sent an email to Skin Tyee First Nation on November 9, 2017,
18 advising that the amendment applications had been filed with the EAO and OGC for
19 the proposed SHAR. Coastal GasLink provided the link to access the EAC
20 Amendment Application on the EAO website and confirmed that the EAC
21 Amendment Application had been uploaded to Skin Tyee First Nation's folder on the
22 Coastal GasLink SharePoint site. Coastal GasLink asked that Skin Tyee First Nation
23 contact Coastal GasLink with questions or to request a hard copy of the EAC
24 Amendment Application. A soft copy of the EAC Amendment Application on a
25 secure USB flash drive was hand delivered to Skin Tyee First Nation on November 9,
26 2017.

27 Coastal GasLink met with Skin Tyee First Nation on November 23, 2017. Skin Tyee
28 First Nation advised that it would be reviewing the amendment applications for the
29 proposed SHAR with Chief and Council and would provide comments through the
30 Working Group process, as appropriate.

31 Coastal GasLink sent an email to Skin Tyee First Nation on February 22, 2018, in
32 follow-up to previous correspondence regarding the proposed SHAR. Coastal
33 GasLink expressed its understanding that Skin Tyee First Nation had not provided
34 comments on the proposed SHAR as part of the Working Group process. Coastal
35 GasLink asked that Skin Tyee First Nation contact Coastal GasLink if they wish to
36 discuss the proposed SHAR or to provide feedback. Coastal GasLink informed Skin
37 Tyee First Nation that it was currently updating the proposed SHAR Aboriginal
38 Consultation Report to include engagement until March 1, 2018, and committed to

1 providing the draft Report to Skin Tyee First Nation for review and comment before
2 submitting the final report to the EAO.

3 Coastal GasLink sent an email to Skin Tyee First Nation on February 28, 2018,
4 advising that the AIA report and indexed Table of Contents, which includes historical
5 resource information for the proposed SHAR corridor, had been uploaded to Skin
6 Tyee First Nation's folder on the Coastal GasLink SharePoint site. Coastal GasLink
7 asked that Skin Tyee First Nation contact Coastal GasLink with questions.

8 Coastal GasLink shared the Aboriginal Consultation Report with Skin Tyee First
9 Nation for review and comment on March 13, 2018, before submitting the final
10 Aboriginal Consultation Report to the Environmental Assessment Office. Through
11 engagement activities to date, Skin Tyee First Nation has not identified any proposed
12 changes to the Aboriginal Consultation Report for the proposed SHAR.

7.3.2 Capacity Funding

13 Coastal GasLink offered capacity funding to Skin Tyee First Nation to facilitate Skin
14 Tyee First Nation's participation in the regulatory process to review Coastal
15 GasLink's amendment applications to the EAO and the OGC for the proposed SHAR.
16 A Letter of Agreement was provided to Skin Tyee First Nation on August 17, 2017,
17 for Skin Tyee First Nation's consideration. Skin Tyee First Nation provided the
18 executed Letter of Agreement on September 19, 2017.

7.3.3 Field Programs and Related Permits

19 Coastal GasLink has engaged Skin Tyee First Nation regarding environmental and
20 engineering field programs and associated permitting for the proposed SHAR.
21 Coastal GasLink's approach to engaging Aboriginal groups in field programs and
22 permitting is outlined in Section 5, Field Program and Related Permits.

7.3.4 Aboriginal Traditional Knowledge

23 Skin Tyee First Nation participated in biophysical field studies for the proposed
24 SHAR and provided TEK information. TEK information collected during the 2016
25 field season was sent on August 15, 2016, for Skin Tyee First Nation to review.

26 Skin Tyee First Nation provided an interim TLU report in September 2013 and a final
27 TLU report in December 2014. The results of the TLU studies and Aboriginal
28 Traditional Knowledge informed the assessment of potential adverse effects of the
29 proposed SHAR on traditional land and resource use. Coastal GasLink will continue
30 to engage with Skin Tyee First Nation regarding their issues, concerns and interests
31 regarding the proposed SHAR.

1 A detailed description of the Aboriginal Traditional Knowledge is provided in
2 Section 6.

7.4 STELLAT'EN FIRST NATION

3 The following section outlines the consultation and engagement activities between
4 Coastal GasLink and Stellat'en First Nation related to the proposed SHAR.

7.4.1 Sharing of Project Information

5 Coastal GasLink sent a letter by email to Stellat'en First Nation on May 19, 2016,
6 regarding the proposed SHAR. Coastal GasLink advised that it was considering
7 adding an alternate route to the EAC and to the Section 25 Permit for the Project and
8 provided information on the proposed alternate route. Coastal GasLink informed
9 Stellat'en First Nation that it would be proceeding with fieldwork to collect data on
10 the proposed SHAR and would be inviting Aboriginal groups to participate in the
11 field data collection. A map of the proposed SHAR accompanied the letter, and
12 shapefiles of the alternate route were uploaded to Stellat'en First Nation's folder on
13 the Coastal GasLink SharePoint site.

14 Following the May 19, 2016, letter, CH2M Hill, on behalf of Coastal GasLink,
15 coordinated the participation of Stellat'en First Nation in the proposed SHAR
16 biophysical field studies and in collecting TEK information.

17 In July 2016, LNG Canada announced that due to the challenges of the global energy
18 market, their joint venture participants determined that more time was needed before
19 taking a final investment decision (FID) on the Coastal Gaslink Project. Given the
20 delay in FID, Coastal GasLink adjusted its schedule for the proposed SHAR
21 amendment applications and did not proceed with further proposed SHAR
22 engagement after completing the field studies until August 2017.

23 Coastal GasLink sent a letter by email to Stellat'en First Nation on August 14, 2017,
24 with an update on the status of the proposed SHAR amendment applications. Coastal
25 GasLink advised that it anticipated filing an amendment application in the fall of
26 2017 and provided information about the proposed SHAR and its associated field
27 programs. A map of the proposed SHAR accompanied the letter, and shapefiles of the
28 alternate route were uploaded to Stellat'en First Nation's folder on the Coastal
29 GasLink SharePoint site. The letter invited Stellat'en First Nation to contact Coastal
30 GasLink with questions or to arrange further discussion about the proposed SHAR.

31 Stellat'en First Nation responded by email to Coastal GasLink on August 14, 2017,
32 requesting a map outlining Stellat'en territory with the EAC route and the proposed
33 SHAR. Coastal GasLink emailed Stellat'en First Nation on August 15, 2017,

1 attaching the map requested by Stelat'en First Nation and reiterating Coastal
2 GasLink's interest in Stelat'en First Nation's input on the alternate route.

3 Coastal GasLink telephoned Stelat'en First Nation on August 15, 2017, in follow up
4 to the August 14, 2017, letter. Coastal GasLink provided information on the proposed
5 SHAR and reviewed the material provided in the information package. Coastal
6 GasLink explained that it was seeking Stelat'en First Nation's feedback on the
7 proposed alternate route and advised that it would be offering capacity funding for
8 Stelat'en First Nation to review the amendment applications and participate in the
9 regulatory process.

10 Coastal GasLink sent an email to Stelat'en First Nation on August 17, 2017,
11 providing a proposed Letter of Agreement for the provision of capacity funding to
12 facilitate Stelat'en First Nation's review of Coastal GasLink's amendment
13 applications for the proposed SHAR.

14 Coastal GasLink telephoned Stelat'en First Nation on September 6, 2017, in follow
15 up to the previous correspondence regarding the proposed SHAR. Stelat'en First
16 Nation advised that the proposed SHAR increases the amount of pipeline in Stelat'en
17 territory and proposed further discussion. The parties discussed scheduling a meeting
18 to review the proposed SHAR in late September 2017.

19 Coastal GasLink sent an email to Stelat'en First Nation on September 19, 2017, in
20 follow up to previous correspondence regarding the proposed SHAR and the
21 associated Letter of Agreement. Coastal GasLink asked when a meeting to discuss the
22 proposed SHAR could be scheduled. Stelat'en First Nation responded by email on
23 September 21, 2017, providing a potential meeting date to Coastal GasLink.
24 Stelat'en First Nation telephoned Coastal GasLink on September 21, 2017 regarding
25 the email of the same date, and the parties agreed to schedule a presentation on the
26 proposed SHAR in the Stelat'en community in October 2017 and to hold further
27 discussions about the proposed SHAR's increased project footprint.

28 Coastal GasLink sent an email to Stelat'en First Nation on September 25, 2017,
29 providing potential dates for the October proposed SHAR community meeting.

30 Coastal GasLink telephoned Stelat'en First Nation on October 10, 2017, to confirm a
31 date for the proposed SHAR community meeting. The parties agreed to a meeting on
32 November 9, 2017.

33 Coastal GasLink telephoned Stelat'en First Nation on October 19, 2017, advising
34 that it will be providing Stelat'en First Nation with a draft of the SHAR Aboriginal
35 Consultation Report early the following week. Coastal GasLink explained the
36 purpose of the draft Aboriginal Consultation Report and stated that it would
37 appreciate Stelat'en First Nation's feedback on the draft Aboriginal Consultation

1 Report in advance of filing the proposed SHAR amendment applications. Coastal
2 GasLink sent a follow-up email on October 19, 2017, thanking Stellat'en First Nation
3 for the telephone conversation and committing to providing the draft Aboriginal
4 Consultation Report the following week.

5 Coastal GasLink sent an email to Stellat'en First Nation on October 24, 2017,
6 providing the draft Aboriginal Consultation Report. Coastal GasLink advised that it is
7 providing the draft Aboriginal Consultation Report to potentially affected Aboriginal
8 groups in advance of filing the proposed SHAR amendment applications. Coastal
9 GasLink asked that Stellat'en First Nation contact Coastal GasLink with any
10 questions or comments on the draft Aboriginal Consultation Report and requested
11 feedback before November 1, 2017. Coastal GasLink stated that there will be
12 opportunities to review and comment on the Aboriginal Consultation Report and the
13 amendment applications through the upcoming regulatory processes.

14 Coastal GasLink telephoned Stellat'en First Nation on October 31, 2017, regarding
15 the draft Aboriginal Consultation Report. Coastal GasLink left a voicemail stating
16 that it was seeking Stellat'en First Nation's feedback on the draft Aboriginal
17 Consultation Report by November 1, 2017, and asked that Stellat'en First Nation
18 contact Coastal GasLink with any comments or questions.

19 Coastal GasLink sent an email to Stellat'en First Nation on November 9, 2017,
20 advising that amendment applications had been filed with the EAO and OGC for the
21 proposed SHAR. Coastal GasLink provided the link to access the amendment
22 application on the EAO website and confirmed that the amendment application had
23 been uploaded to Stellat'en First Nation's folder on the Coastal GasLink SharePoint
24 site. Coastal GasLink asked that Stellat'en First Nation contact Coastal GasLink with
25 questions or to request a hard copy of the amendment application. A soft copy of the
26 EAC Amendment Application on a secure USB flash drive was hand delivered to
27 Stellat'en First Nation on November 9, 2017.

28 Coastal GasLink met with the Stellat'en First Nation Industry Working Group,
29 including members of Chief and Council, on November 9, 2017. Coastal GasLink
30 delivered a Project update presentation, which included information for the proposed
31 SHAR. Coastal GasLink acknowledged the potential change in the Project footprint
32 within Stellat'en First Nation territory associated with the proposed SHAR, and
33 committed to discussions with Stellat'en First Nation if the Project takes a positive
34 final investment decision and the proposed SHAR is selected for construction.
35 Stellat'en First Nation provided Coastal GasLink with the executed Letter of
36 Agreement for the proposed SHAR.

37 Coastal GasLink telephoned Stellat'en First Nation on November 23, 2017, regarding
38 Stellat'en First Nation's participation in the EAO's Working Group and left a voice
39 message.

1 Stellat'en First Nation telephoned Coastal GasLink on November 27, 2017,
2 confirming intent to review the EAC Amendment Application for the proposed
3 SHAR.

4 Coastal GasLink sent an email to Stellat'en First Nation on February 22, 2018, in
5 follow-up to previous correspondence regarding the proposed SHAR. Coastal
6 GasLink expressed its understanding that Stellat'en First Nation had not provided
7 comments through the EAO Working Group for the proposed SHAR. Coastal
8 GasLink asked that Stellat'en First Nation contact Coastal GasLink if they wish to
9 discuss the proposed SHAR or to provide feedback. Coastal GasLink informed
10 Stellat'en First Nation that it was currently updating the proposed SHAR Aboriginal
11 Consultation Report to include engagement until March 1, 2018, and committed to
12 providing the draft report to Stellat'en First Nation for review and comment before
13 submitting the final report to the EAO. Stellat'en First Nation responded by email on
14 February 23, 2018, advising that it has held two meetings regarding the proposed
15 SHAR and is planning a final meeting. Stellat'en First Nation committed to provide
16 comments following the final meeting.

17 Coastal GasLink attended a Stellat'en First Nation community meeting on February
18 27, 2018, and provided a Project update presentation, which included information for
19 the proposed SHAR. As a follow-up to the meeting, Coastal GasLink emailed
20 Stellat'en First Nation on February 28, 2018, attaching a map of the proposed SHAR
21 and providing the link to access the draft Aboriginal Consultation Report on the
22 Coastal GasLink SharePoint Site. Coastal GasLink asked that the information be
23 shared with any interested community members and to contact Coastal GasLink with
24 any questions.

25 Coastal GasLink advised that an AIA report and indexed Table of Contents, which
26 includes historical resource information on the proposed SHAR corridor, had been
27 uploaded to Stellat'en First Nation's folder on the Coastal GasLink SharePoint site.
28 Coastal GasLink asked that Stellat'en First Nation contact Coastal GasLink with
29 questions.

30 Coastal GasLink shared the Aboriginal Consultation Report with Stellat'en First
31 Nation for review and comment on March 13, 2018, before submitting the final
32 Aboriginal Consultation Report to the Environmental Assessment Office. Through
33 engagement activities to date, Stellat'en First Nation has not identified any proposed
34 changes to the Aboriginal Consultation Report for the proposed SHAR.

7.4.2 Capacity Funding

35 Coastal GasLink offered capacity funding to Stellat'en First Nation to facilitate
36 Stellat'en First Nation's participation in the regulatory process to review Coastal
37 GasLink's amendment applications to the EAO and the OGC for the proposed SHAR.

1 A Letter of Agreement was provided to Stellat'en First Nation on August 17, 2017,
2 for Stellat'en First Nation's consideration. Stellat'en First Nation provided the
3 executed Letter of Agreement on November 9, 2017.

7.4.3 Field Program and Related Permits

4 Coastal GasLink has engaged Stellat'en First Nation regarding environmental and
5 engineering field programs and associated permitting for the proposed SHAR.
6 Coastal GasLink's approach to engaging Aboriginal groups in field programs and
7 permitting is outlined in Section 5, Field Program and Related Permits.

7.4.4 Aboriginal Traditional Knowledge

8 Stellat'en First Nation participated in biophysical field studies for the proposed
9 SHAR and provided TEK information. TEK information collected during the 2016
10 field season was sent on August 15, 2016, for Stellat'en First Nation to review.

11 Stellat'en First Nation provided an interim TLU report in September 2013 and a final
12 TLU report in October 2014. The results of the TLU studies and Aboriginal
13 Traditional Knowledge informed the assessment of potential adverse effects of the
14 proposed SHAR on traditional land and resource use. Coastal GasLink will continue
15 to engage with Stellat'en First Nation regarding their issues, concerns and interests
16 regarding the proposed SHAR.

17 A detailed description of the Aboriginal Traditional Knowledge is provided in
18 Section 6

7.5 WET'SUWET'EN FIRST NATION

19 The following section outlines the consultation and engagement activities between
20 Coastal GasLink and Wet'suwet'en First Nation related to the proposed SHAR.

7.5.1 Sharing of Project Information

21 Coastal GasLink sent a letter by email to Wet'suwet'en First Nation on May 19, 2016,
22 regarding the proposed SHAR. Coastal GasLink advised that it was considering
23 adding an alternate route to the EAC and to the Section 25 Permit for the Project and
24 provided information on the proposed alternate route. Coastal GasLink informed
25 Wet'suwet'en First Nation that it would be proceeding with fieldwork to collect data
26 on the proposed SHAR and would be inviting Aboriginal groups to participate in the
27 field data collection. A map of the proposed SHAR accompanied the letter, and
28 shapefiles of the alternate route were uploaded to Wet'suwet'en First Nation's folder
29 on the Coastal GasLink SharePoint site.

1 Following the May 19, 2016, letter, CH2M Hill, on behalf of Coastal GasLink,
2 coordinated the participation of Wet'suwet'en First Nation in the proposed SHAR
3 biophysical field studies and in collecting TEK.

4 In July 2016, LNG Canada announced that due to the challenges of the global energy
5 market, their joint venture participants determined that more time was needed before
6 taking a final investment decision (FID) on the Coastal Gaslink Project. Given the
7 delay in FID, Coastal GasLink adjusted its schedule for the proposed SHAR
8 amendment applications and did not proceed with further proposed SHAR
9 engagement after completing the field studies until August 2017.

10 Coastal GasLink sent a letter by email to Wet'suwet'en First Nation on August 14,
11 2017, with an update on the status of the proposed SHAR amendment applications.
12 Coastal GasLink advised that it anticipated filing an amendment application in the fall
13 of 2017 and provided information about the proposed SHAR and its associated field
14 programs. A map of the proposed SHAR accompanied the letter, and shapefiles of the
15 alternate route were uploaded to Wet'suwet'en First Nation's folder on the Coastal
16 GasLink SharePoint site. The letter invited Wet'suwet'en First Nation to contact
17 Coastal GasLink with questions or to arrange further discussion about the proposed
18 SHAR.

19 Coastal GasLink telephoned Wet'suwet'en First Nation on August 15, 2017, in
20 follow up to the August 14, 2017, letter. Coastal GasLink provided information about
21 the proposed SHAR and reviewed the material provided in the information package.
22 Coastal GasLink explained that it was seeking Wet'suwet'en First Nation's feedback
23 on the proposed alternate route and advised that it would be offering capacity funding
24 for Wet'suwet'en First Nation to review the amendment applications and participate
25 in the regulatory process. The parties agreed to meet on August 29, 2017, to discuss
26 the proposed SHAR.

27 Coastal GasLink sent an email to Wet'suwet'en First Nation on August 17, 2017,
28 providing a proposed Letter of Agreement for the provision of capacity funding to
29 facilitate Wet'suwet'en First Nation's review of Coastal GasLink's amendment
30 applications for the proposed SHAR.

31 Coastal GasLink met with Wet'suwet'en First Nation on August 29, 2017. Coastal
32 GasLink provided information on the proposed SHAR and provided hard copies of
33 the proposed SHAR map and a mapbook. Wet'suwet'en First Nation expressed
34 concern that its members may not have been included in the 2016 field program due
35 to staffing issues at that time. Coastal GasLink committed to confirm Wet'suwet'en
36 First Nation's participation in the proposed SHAR field program and to provide
37 Wet'suwet'en First Nation with any proposed SHAR materials previously distributed.

1 Coastal GasLink sent an email to Wet'suwet'en First Nation on September 7, 2017,
2 confirming Wet'suwet'en First Nation's participation in the biophysical field studies
3 for the proposed SHAR and providing the details of this participation. Coastal
4 GasLink provided Wet'suwet'en First Nation with the May 19, 2016, proposed
5 SHAR information package and the Coastal GasLink Field Program Summary
6 initially provided to Wet'suwet'en First Nation in May 2016. Coastal GasLink
7 committed to provide a map showing Wet'suwet'en First Nation territory, the EAC
8 route and the proposed SHAR, as well as information on the EAO working group
9 when it is made available.

10 Coastal GasLink sent an email to Wet'suwet'en First Nation on September 13, 2017,
11 providing a map of the EAC route and the proposed SHAR overlaid on Wet'suwet'en
12 First Nation territory. Coastal GasLink invited questions on the information provided.

13 Coastal GasLink telephoned Wet'suwet'en First Nation on September 26, 2017, in
14 follow up to its emails of September 7 and 13, 2017, regarding action items from the
15 September 5, 2017 meeting. Wet'suwet'en First Nation advised that internal follow
16 up was required to review the materials provided. The parties agreed to a meeting on
17 October 16, 2017, to discuss the proposed SHAR and other items.

18 Wet'suwet'en First Nation emailed Coastal GasLink on October 3, 2017, requesting
19 that the TEK results review memo, dated August 15, 2016, be resent to Wet'suwet'en
20 First Nation. Wet'suwet'en First Nation requested that Coastal GasLink provide any
21 additional information regarding its participation in the SHAR field program,
22 including invoicing details and any summaries of findings. Wet'suwet'en First Nation
23 inquired as to the status of Coastal GasLink's proposed SHAR amendment
24 submission and an update on the EAO working group . Coastal GasLink responded to
25 Wet'suwet'en First Nation on October 4, 2017, providing the requested information.

26 Coastal GasLink met with Wet'suwet'en First Nation on October 16, 2017, and
27 discussed the proposed SHAR. Coastal GasLink provided information on the
28 proposed SHAR, including Coastal GasLink's rationale for studying an alternate
29 route option, details regarding the 2016 biophysical field program, and regulatory
30 processes, including the EAO working group. Wet'suwet'en First Nation advised that
31 it is considering holding community information sessions about the proposed SHAR
32 for its members living off-reserve and expressed concern that the amount of capacity
33 funding offered may not be sufficient to undertake this engagement. Coastal GasLink
34 stated that it believes that the capacity funding offered is sufficient for Wet'suwet'en
35 First Nation to review the proposed SHAR amendment applications. Coastal GasLink
36 advised that community information sessions could be held at TransCanada regional
37 offices, which would reduce costs, and asked that Wet'suwet'en First Nation notify
38 Coastal GasLink if they wish to proceed with these sessions. Coastal GasLink advised
39 that it would be providing Wet'suwet'en First Nation with the draft SHAR Aboriginal
40 Consultation Report the following week in advance of filing the proposed SHAR

1 amendment applications. The parties agreed to meet on October 25, 2017, to review
2 the draft Aboriginal Consultation Report.

3 Coastal GasLink sent an email to Wet'suwet'en First Nation on October 24, 2017,
4 providing the draft Aboriginal Consultation Report. Coastal GasLink advised that it is
5 providing the draft Aboriginal Consultation Report to potentially affected Aboriginal
6 groups in advance of filing the proposed SHAR amendment applications. Coastal
7 GasLink asked that Wet'suwet'en First Nation contact Coastal GasLink with any
8 questions or comments on the draft Aboriginal Consultation Report and requested
9 feedback before November 1, 2017. Coastal GasLink stated that there will be
10 opportunities to review and comment on the Aboriginal Consultation Report and the
11 amendment applications through the upcoming regulatory processes.

12 Coastal GasLink met with Wet'suwet'en First Nation on October 25, 2017, regarding
13 the draft Aboriginal Consultation Report. Coastal GasLink reviewed the Wet'suwet'en
14 First Nation section of the draft Aboriginal Consultation Report and outlined the
15 engagement activities that have taken place up to October 1, 2017, regarding the
16 proposed SHAR. Coastal GasLink advised that Wet'suwet'en First Nation's concern
17 regarding their participation in the SHAR field program is referenced in the draft
18 Aboriginal Consultation Report, and inquired as to whether Wet'suwet'en First
19 Nation had other concerns they would like to see documented. Wet'suwet'en First
20 Nation requested that their concern with respect to the capacity funding offered be
21 added. Coastal GasLink committed to add this concern to the Aboriginal Consultation
22 Report and reaffirmed that information sessions with off-reserve community
23 members could be held at TransCanada regional offices to reduce costs.

24 Wet'suwet'en First Nation sent an email to Coastal GasLink on November 4, 2017,
25 expressing concern regarding the proposed SHAR capacity funding. Wet'suwet'en
26 First Nation expressed its understanding that the EAO was unaware of these concerns.
27 Coastal GasLink telephoned Wet'suwet'en First Nation on the same day confirming
28 that the concerns were included in the SHAR Aboriginal Consultation Report and had
29 also been reported to the EAO. Coastal GasLink sent an email to Wet'suwet'en First
30 Nation on November 7, 2017, in follow-up to the telephone call. Coastal GasLink
31 provided rationale behind the amount of capacity funding offered and noted that the
32 regulatory agencies would also be providing funding to review the proposed SHAR.

33 Coastal GasLink sent an email to Wet'suwet'en First Nation on November 9, 2017,
34 advising that amendment applications had been filed with the EAO and OGC for the
35 proposed SHAR. Coastal GasLink provided the link to access the EAC Amendment
36 Application on the EAO website and confirmed that the EAC Amendment
37 Application had been uploaded to Wet'suwet'en First Nation's folder on the Coastal
38 GasLink SharePoint site. Coastal GasLink asked that Wet'suwet'en First Nation
39 contact Coastal GasLink with questions or to request a hard copy of the EAC
40 Amendment Application. A soft copy of the EAC Amendment Application on a

1 secure USB flash drive was hand delivered to Wet'suwet'en First Nation on
2 November 9, 2017.

3 Coastal GasLink and Wet'suwet'en First Nation participated in the EAO's Working
4 Group introductory teleconference for the proposed SHAR on November 15, 2017.
5 Background materials regarding the proposed SHAR, including PowerPoint
6 presentations, were provided to Wet'suwet'en First Nation by the EAO in advance.

7 Coastal GasLink and Wet'suwet'en First Nation met on November 23, 2017.
8 Wet'suwet'en First Nation provided Coastal GasLink with an executed Letter of
9 Agreement for the proposed SHAR. Wet'suwet'en First Nation confirmed that
10 outstanding capacity funding issues were resolved and that they would be reviewing
11 and providing comments on the amendment applications.

12 Coastal GasLink received Wet'suwet'en First Nation's comments and additional TLU
13 information through EAO's Working Group on December 18, 2017.

14 Coastal GasLink telephoned Wet'suwet'en First Nation on January 10, 2018,
15 regarding Wet'suwet'en First Nation's comments to the EAO Working Group for the
16 proposed SHAR. The parties discussed the manner in which Wet'suwet'en First
17 Nation's comments and Coastal GasLink's responses would be captured and
18 documented. Wet'suwet'en First Nation confirmed its preference to maintain the
19 confidentiality of TLU information.

20 Coastal GasLink provided responses to Wet'suwet'en First Nation's Working Group
21 comments to the EAO on January 22, 2018. Coastal GasLink provided its responses
22 outside of the Working Group to respect TLU confidentiality interests.

23 Coastal GasLink telephoned Wet'suwet'en First Nation on January 29, 2018,
24 regarding Coastal GasLink's responses to Wet'suwet'en First Nation's comments on
25 the proposed SHAR. Wet'suwet'en First Nation did not have feedback on the
26 responses at that time and confirmed that a meeting had been scheduled for February
27 6, 2018, with the EAO, OGC and Coastal GasLink, on this subject. Wet'suwet'en
28 First Nation advised that it has requested information on fish-bearing stream
29 crossings as related to SHAR through the OGC. Coastal GasLink committed to
30 providing this information.

31 Coastal GasLink, Wet'suwet'en First Nation, the EAO and OGC met on February 6,
32 2018, to discuss Wet'suwet'en First Nation's comments on the proposed SHAR.
33 Wet'suwet'en First Nation requested respect of its TLU confidentiality interests.

34 Coastal GasLink sent an email to Wet'suwet'en First Nation on February 26, 2018,
35 responding to Coastal GasLink's action items from the February 6, 2018 meeting.
36 Coastal GasLink informed Wet'suwet'en First Nation that it was currently updating

1 the proposed SHAR Aboriginal Consultation Report to include engagement until
2 March 1, 2018, and committed to providing the draft report to Wet'suwet'en First
3 Nation for review and comment before submitting the final report to the EAO.
4 Coastal GasLink asked Wet'suwet'en First Nation to provide a proposed date for
5 Coastal GasLink to provide a Project update presentation. Wet'suwet'en First Nation
6 sent an email to Coastal GasLink on February 27, 2018, acknowledging receipt of the
7 requested information from the February 7, 2018, meeting, and committing to
8 providing Coastal GasLink with the date of the next community meeting once it has
9 been established.

10 Coastal GasLink sent an email to Wet'suwet'en First Nation on February 28, 2018,
11 advising that an AIA report and index Table of Contents, which includes historical
12 resource information for the proposed SHAR corridor, had been uploaded to
13 Wet'suwet'en First Nation's folder on the Coastal GasLink SharePoint site. Coastal
14 GasLink asked that Wet'suwet'en First Nation contact Coastal GasLink with
15 questions.

16 Wet'suwet'en First Nation telephoned Coastal GasLink on February 28, 2018, to
17 clarify its request regarding the location of culturally modified trees (blaze trails)
18 observed during the archaeology investigation studies for the proposed SHAR.
19 Coastal GasLink sent a follow-up email to Wet'suwet'en First Nation on the same
20 date confirming that the information was reported in the AIA report posted to
21 Wet'suwet'en First Nation's folder on the Coastal GasLink SharePoint site earlier
22 that day and attached the AIA notification email. Wet'suwet'en First Nation
23 responded by email on the same date acknowledging receipt of Coastal GasLink's
24 email.

25 Coastal GasLink shared the Aboriginal Consultation Report with Wet'suwet'en First
26 Nation for review and comment on March 13, 2018, before submitting the final
27 Aboriginal Consultation Report to the Environmental Assessment Office. Through
28 engagement activities to date, Wet'suwet'en First Nation has not identified any
29 proposed changes to the Aboriginal Consultation Report for the proposed SHAR.

7.5.2 Capacity Funding

30 Coastal GasLink offered capacity funding to Wet'suwet'en First Nation to facilitate
31 Wet'suwet'en First Nation's participation in the regulatory process to review Coastal
32 GasLink's amendment applications to the EAO and the OGC for the proposed SHAR.
33 A Letter of Agreement was provided to Wet'suwet'en First Nation on August 17,
34 2017, for Wet'suwet'en First Nation's consideration. Wet'suwet'en First Nation
35 provided the executed Letter of Agreement on November 23, 2017.

7.5.3 Field Program and Related Permits

1 Coastal GasLink has engaged Wet’suwet’en First Nation regarding environmental
2 and engineering field programs and associated permitting for the proposed SHAR.
3 Coastal GasLink’s approach to engaging Aboriginal groups in field programs and
4 permitting is outlined in Section 5, Field Program and Related Permits.

7.5.4 Aboriginal Traditional Knowledge

5 Wet’suwet’en First Nation participated in biophysical field studies for the proposed
6 SHAR, and provided TEK information. TEK information collected during the 2016
7 field season was sent on August 15, 2016, for Wet’suwet’en First Nation to review.

8 Wet’suwet’en First Nation provided an interim TLU report in October 2013, a final
9 site-specific TLU report in December 2013 and a final regional impacts TLU report
10 in July 2014. Wet’suwet’en First Nation provided additional TLU information in its
11 Traditional Use and Occupancy Site (TUOS) Information and Mitigation Issues for
12 the South of Houston Alternate Route report on December 18, 2017. The results of
13 the TLU studies and Aboriginal Traditional Knowledge informed the assessment of
14 potential adverse effects of the proposed SHAR on traditional land and resource use.
15 Coastal GasLink will continue to engage with Wet’suwet’en First Nation regarding
16 their issues, concerns and interests regarding the proposed SHAR.

17 A detailed description of the Aboriginal Traditional Knowledge is provided in
18 Section 6.

19

8.0 SUMMARY OF ISSUES, CONCERNS AND INTERESTS

1 Coastal GasLink has documented the issues, concerns and interests identified by
2 Aboriginal groups through consultation and engagement that has occurred to date
3 regarding the proposed SHAR. A summary of these issues, concerns and interests,
4 and Coastal GasLink’s corresponding response is provided in Table 8-1. Coastal
5 GasLink’s responses to comments provided through the EAO’s Working Group
6 review of the EAC Amendment Application for the proposed SHAR are tracked and
7 posted by the EAO on its Project website at:

8 <https://projects.eao.gov.bc.ca/p/coastal-gaslink-pipeline/docs?folder=173>

Table 8-1: Issues Tracking Table

Aboriginal Group	Issue, Concern or Interest	Coastal GasLink Response
Nee-Tahi-Buhn Band	Expressed support for the proposed SHAR if it contributes to a positive final investment decision.	Coastal GasLink appreciates Nee-Tahi-Buhn Band’s support of the proposed SHAR.
Nee-Tahi-Buhn Band	Expressed concern with the capacity funding offered by Coastal GasLink to review the proposed SHAR amendment applications.	Coastal GasLink believes that the capacity funding offered is sufficient to carry out the proposed SHAR amendment applications review.
Office of the Wet’suwet’en	Expressed concern with the capacity funding offered by Coastal GasLink to review the proposed SHAR amendment applications.	Coastal GasLink believes that the capacity funding offered is sufficient to carry out the proposed SHAR amendment applications review.
Office of the Wet’suwet’en	Expressed concern that the TEK results review memo was not provided in August 2016.	Coastal GasLink provided the TEK results review memo on October 3, 2017.
Office of the Wet’suwet’en	Expressed concern with the TEK results review memo in that the field engagement summary is portrayed as being representative of Office of the Wet’suwet’en.	Coastal GasLink updated the TEK results review memo to address the concerns expressed by Office of the Wet’suwet’en and provided the revised memo on October 25, 2017.
Skin Tyee First Nation	None expressed.	
Stellat’en First Nation	Expressed concern that the proposed SHAR increases the length of pipeline in Stellat’en territory and requested discussion with Coastal GasLink on this matter as it relates to the agreement in place with Coastal GasLink.	Coastal GasLink is committed to engaging with Stellat’en First Nation on the increased Project footprint of the proposed SHAR.
Wet’suwet’en First Nation	Expressed concern that members may not have participated in the proposed SHAR field studies or received 2016 correspondence regarding the proposed SHAR.	Coastal GasLink confirmed that Wet’suwet’en First Nation members participated in the proposed SHAR biophysical field studies and provided Wet’suwet’en First Nation with the participation details. Coastal GasLink confirmed that Wet’suwet’en First Nation received 2016 proposed SHAR correspondence and re-sent the information for review.

9

Table 8-1: Issues Tracking Table (cont'd)

Aboriginal Group	Issue, Concern or Interest	Coastal GasLink Response
Wet'suwet'en First Nation	Expressed concern with the capacity funding offered by Coastal GasLink to review the proposed SHAR amendment applications as Wet'suwet'en First Nation would like to undertake community engagement with off-reserve members.	Coastal GasLink believes that the capacity funding offered is sufficient to carry out the proposed SHAR amendment applications review. Coastal GasLink has offered to hold community information sessions at TransCanada regional offices; thereby limiting community engagement costs for Wet'suwet'en First Nation.

9.0 FUTURE CONSULTATION

1 Coastal GasLink will continue to consult with and engage the five Aboriginal groups
2 that are potentially affected by the proposed SHAR in accordance with the Aboriginal
3 Consultation Plan and regulatory requirements, including permit conditions, which
4 includes sharing Project information with Aboriginal groups, through construction
5 and operation of the Project. Coastal GasLink will also continue to consider feedback
6 from Aboriginal groups, where appropriate and when made available, as construction
7 planning and detailed engineering design advances.
