

Galore Creek Project Application for Environmental Assessment Certificate

TABLE OF CONTENTS

VOLUME I

Preface	i
Project Area	i
Project Components	ii
Acknowledgements.....	v
Disclaimer	xi
Table of Contents.....	xii
List of Figures	xlvi
List of Tables	lxv
List of Plates	lxxxvii
List of Appendices	xcii
Table of Concordance.....	C-1
1. Introduction	1-1
1.1 Galore Creek Project Overview	1-1
1.2 Proponent Overview	1-5
1.2.1 NovaGold Canada Inc. Corporate Profile.....	1-5
1.2.2 NovaGold Management.....	1-7
1.3 Project Development Philosophy.....	1-9
1.3.1 Precautionary Principle.....	1-9
1.3.2 Integration of Traditional Knowledge	1-9
1.3.3 Baseline Research.....	1-9
1.3.4 Valued Ecosystem Components	1-10
1.3.5 Environmental Assessment Strategy and Scope.....	1-10
1.3.6 Ecosystem Integrity	1-10
1.3.7 Biodiversity and Protected Species	1-10
1.3.8 NovaGold Environmental Policy Statement.....	1-11
1.3.9 Sustainability Principles	1-12
1.3.9.1 Overview	1-12
1.3.9.2 Renewable Resources.....	1-13

 **NOTE: Contents of this volume are highlighted in light blue.**

Table of Contents

	1.3.9.3	Non-renewable Resources.....	1-15
	1.3.9.4	Social.....	1-15
	1.3.9.5	Economic.....	1-15
1.4		Land Tenure.....	1-16
	1.4.1	Tenures Controlled by NovaGold.....	1-16
	1.4.2	Other Tenures	1-23
	1.4.2.1	Mineral Tenures	1-23
	1.4.2.2	Trapper and Guide Outfitter Tenures	1-24
1.5		Project Rationale.....	1-24
	1.5.1	Purpose of the Project.....	1-24
	1.5.2	Need for the Project.....	1-27
	1.5.3	Global Markets for Copper, Gold and Silver.....	1-27
	1.5.3.1	Copper	1-27
	1.5.3.2	Gold.....	1-29
	1.5.3.3	Silver	1-30
	1.5.4	Implications for Regional, Provincial and National Economies.....	1-30
	1.5.5	Alternative Methods to Extract the Resource	1-32
	1.5.6	Economic Feasibility	1-32
1.6		Development Schedule	1-33
	1.6.1	Access Development	1-34
	1.6.2	Mine Site Development	1-37
1.7		Project Setting.....	1-38
	1.7.1	Location and Topography.....	1-38
	1.7.2	Traditional Territory	1-40
	1.7.3	Climate	1-40
	1.7.4	Regional Ecosystems.....	1-41
	1.7.5	Regional Land Use	1-41
2.		Regulatory Framework.....	2-1
	2.1	British Columbia Environmental Assessment Process	2-1
	2.1.1	<i>British Columbia Environmental Assessment Act</i>	2-1
	2.1.2	Project BCEAA History	2-2
	2.1.3	Project Technical Working Groups	2-7
	2.1.4	Tahltan Nation Participation.....	2-7
	2.1.5	Concurrent Permitting	2-9
	2.2	Federal Environmental Assessment Process.....	2-10
	2.2.1	<i>Canadian Environmental Assessment Act</i>	2-10
	2.2.2	Project CEAA Process History	2-11
	2.2.3	Federal Review Process.....	2-11
	2.2.4	Metal Mining Effluent Regulations.....	2-13
	2.3	Canada-British Columbia Cooperation Agreement	2-13
	2.4	Alaskan and Federal United States Participation.....	2-14
	2.4.1	Trans-boundary Management.....	2-14
	2.5	Regional Land Use Planning Process	2-16
	2.5.1	Cassiar Iskut-Stikine Land and Resource Management Plan	2-17
	2.5.2	Project Adherence to the CIS-LRMP	2-22
	2.6	Licences, Permits and Approvals.....	2-23

Table of Contents

2.6.1	Federal Licences and Approvals.....	2-23
2.7	Regulatory Schedule	2-25
3.	Consultation	3-1
3.1	First Nation Consultation.....	3-1
3.1.1	Summary and Evaluation of Tahltan Consultation Activities	3-1
3.1.2	General	3-2
3.1.3	Special Assembly	3-4
3.1.4	Participation Agreement.....	3-6
3.1.5	Open Houses.....	3-8
3.1.6	Integration of Traditional Knowledge	3-13
3.1.6.1	Definition	3-13
3.1.6.2	Tahltan Traditional Knowledge Research Program	3-13
3.1.6.3	Use of Traditional Knowledge in Project Description	3-16
3.1.6.4	Galore Creek Pilot Project.....	3-17
3.1.7	Newsletter.....	3-23
3.1.8	Site Visits.....	3-23
3.1.9	Tuh' da det' ah.....	3-23
3.1.10	Proposal for a First Nations Consultation Program.....	3-24
3.2	Public Consultation.....	3-24
3.2.1	Summary and Evaluation of Public Consultation Activities	3-24
3.2.2	Open Houses.....	3-25
3.2.3	Presentations at Public Conferences.....	3-29
3.2.3.1	Mineral Exploration Roundup, Vancouver, January 2005	3-29
3.2.3.2	Minerals North, Stewart, April 2005.....	3-29
3.2.3.3	Southeast Alaska Conference, September 2005.....	3-30
3.2.3.4	Mineral Exploration Roundup, Vancouver, January 2006.....	3-30
3.2.4	Newsletters	3-31
3.2.5	Stakeholder Consultation.....	3-31
3.2.6	Proposal for a Public Consultation Program	3-31
3.3	Government Participation and Consultation.....	3-32
3.3.1	Summary and Evaluation of Government Consultation Activities	3-32
3.3.2	Meetings	3-32
3.3.2.1	Overall.....	3-32
3.3.2.2	Technical Working Groups	3-33
3.3.2.3	Site Tours NovaGold hosted	3-34
3.4	Transboundary Consultation.....	3-34
4.	Valued Ecosystem Components	4-1
4.1	Valued Ecosystem Component Approach to Environmental Assessment.....	4-1
4.2	Methodology for Determining Valued Ecosystem Components	4-1
4.3	Summary of Selected VECs.....	4-2
4.4	Air Quality	4-3
4.5	Climate.....	4-3
4.6	Noise	4-4
4.7	Surface Water	4-4

Table of Contents

4.7.1	Surface Water Quantity	4-4
4.7.2	Surface Water Quality	4-5
4.8	Groundwater	4-6
4.9	Sediment Quality	4-6
4.10	Aquatic Resources	4-7
4.11	Fish and Fish Habitat	4-7
4.12	Wetlands	4-8
4.13	Terrestrial Ecosystems, Vegetation, and Soil Landscapes.....	4-9
4.14	Wildlife and Wildlife Habitat	4-10
4.15	Archaeology.....	4-11
4.16	Socio-Economic.....	4-14
4.17	Country Foods.....	4-16
4.18	Visual and Aesthetic Resources.....	4-17
4.19	Navigable Waters.....	4-17
5.	Project Description	5-1
5.1	Project History	5-1
5.2	Location and Access	5-2
5.2.1	Location Plan with Site Layout	5-4
5.2.2	Access Description and Plan	5-4
5.3	Geology and Mineralization	5-8
5.3.1	Regional Geology	5-8
5.3.1.1	Stratigraphy	5-8
5.3.1.2	Intrusive Rocks.....	5-8
5.3.1.3	Regional Structure.....	5-12
5.3.2	Local Geology	5-13
5.3.2.1	Volcanic Rocks	5-13
5.3.2.2	Sedimentary Rocks.....	5-16
5.3.2.3	Intrusive Rocks.....	5-17
5.3.2.4	Breccias (B1, B2, & B3)	5-18
5.3.3	Mineralization.....	5-19
5.3.3.1	Central Zone.....	5-19
5.3.3.2	Southwest Zone.....	5-21
5.3.3.3	Junction Zones	5-21
5.3.3.4	West Fork Zone.....	5-26
5.3.3.5	Other Zones	5-26
5.3.4	Alteration.....	5-28
5.3.4.1	Potassic Alteration Associated with Cu-sulphide Introduction	5-28
5.3.4.2	Later Potassic Alteration	5-28
5.3.4.3	Sericite-Anhydrite-Carbonate (SAC) Alteration.....	5-28
5.3.4.4	Propylitic Alteration.....	5-29
5.3.5	Structure	5-29
5.3.6	Metal Leaching and Acid Rock Drainage	5-30
5.3.6.1	Geological Summary.....	5-30
5.3.6.2	Static Geochemical Characteristics	5-31

Table of Contents

	5.3.6.3	Occurrence of Metals	5-34
	5.3.6.4	Occurrence of Buffering Capacity	5-35
	5.3.6.5	Potential for ARD.....	5-35
	5.3.6.6	Kinetic Geochemical Characteristics	5-36
	5.3.6.7	Relationships between Weathering Rates and Bulk Characteristics of Rock	5-37
	5.3.6.8	Oxidized Rocks	5-38
	5.3.6.9	Static Geochemical Characteristics	5-38
	5.3.6.10	Natural Leaching.....	5-38
	5.3.6.11	Overburden.....	5-40
	5.3.6.12	Summary	5-40
5.4		Mineral Resource and Mineral Reserve Estimates	5-41
	5.4.1	Central Zone	5-43
		5.4.1.1 Data Analysis	5-43
	5.4.2	Southwest Zone	5-53
		5.4.2.1 Data Analysis	5-53
	5.4.3	Junction Zone	5-60
		5.4.3.1 Data Analysis	5-60
	5.4.4	West Fork Zone	5-69
		5.4.4.1 Data Analysis	5-69
	5.4.5	Total Resource.....	5-79
5.5		Mining.....	5-79
	5.5.1	Geotechnical Evaluation.....	5-79
		5.5.1.1 Pit Slope Stability.....	5-80
		5.5.1.2 Hazards Evaluation	5-83
	5.5.2	Open Pit Optimization.....	5-92
		5.5.2.1 Economic Pit Limits – Central Area	5-93
		5.5.2.2 Economic Pit Limits – Junction	5-94
	5.5.3	Mine Design	5-94
		5.5.3.1 Pit Phases	5-95
		5.5.3.2 Phase Designs.....	5-97
	5.5.4	Mining Method.....	5-97
		5.5.4.1 Pre-Stripping	5-97
		5.5.4.2 Operations	5-97
	5.5.5	Ore Grade and Waste Control	5-97
		5.5.5.1 Ore – Waste Separation.....	5-97
		5.5.5.2 PAG and Not-PAG Segregation.....	5-104
	5.5.6	Mine Road Construction and Maintenance	5-105
	5.5.7	Topsoil Salvage and Storage	5-106
	5.5.8	Marginal Ore Storage	5-109
	5.5.9	Ore Stockpile	5-109
	5.5.10	Mine Production Schedule.....	5-111
	5.5.11	Mining Equipment.....	5-111
	5.5.12	Explosives Storage, Handling and Use.....	5-114
	5.5.13	Winter Operations	5-116
		5.5.13.1 Operating Scenarios	5-117
		5.5.13.2 Snow Fleet Proposal.....	5-117
5.6		Mill Operations	5-117

Table of Contents

5.6.1	Metallurgical Description of Ore.....	5-117
5.6.1.1	Ore Recoveries	5-118
5.6.2	Plant Layout.....	5-119
5.6.3	Mineral Processing	5-120
5.6.3.1	Crushing	5-120
5.6.3.2	Grinding	5-120
5.6.3.3	Flotation	5-126
5.6.3.4	Rougher Concentrate Regrind.....	5-126
5.6.3.5	Cleaner Flotation.....	5-126
5.6.3.6	Concentrate Thickening and Storage Tanks.....	5-126
5.6.3.7	Tailings Disposal Pumping System.....	5-131
5.6.3.8	Reagent Handling System	5-131
5.7	Concentrate Handling and Transport	5-133
5.7.1	Concentrate Pipeline.....	5-133
5.7.1.1	Pumping System, Alignment, Specifications and Operations....	5-133
5.7.1.2	Protection System.....	5-138
5.7.2	Filtration, Storage and Loadout Facility.....	5-138
5.7.2.1	Location.....	5-138
5.7.2.2	Plant Layout and Process	5-140
5.7.2.3	Water Treatment and Discharge.....	5-140
5.7.2.4	Concentrate Storage	5-146
5.7.2.5	Loadout Facility	5-147
5.7.3	Concentrate Truck Haul.....	5-147
5.7.3.1	Type of Equipment.....	5-147
5.7.3.2	Spillage and Dusting Control System	5-148
5.7.3.3	Highway and Stewart Traffic Evaluation.....	5-148
5.7.4	Port of Stewart.....	5-148
5.7.4.1	Operation.....	5-148
5.7.4.2	Safety and Environmental Controls	5-148
5.7.4.3	Shipping Schedule.....	5-149
5.8	Water Supply	5-149
5.8.1	Potable Water Supply	5-149
5.8.1.1	Source.....	5-149
5.8.1.2	Treatment	5-149
5.8.1.3	Storage.....	5-149
5.8.2	Fire Water.....	5-149
5.8.2.1	Supply and Storage.....	5-149
5.8.2.2	Fire Water Protection Against Freezing.....	5-151
5.8.3	Process Water	5-151
5.8.3.1	Freshwater Requirements and Storage	5-151
5.8.3.2	Reclaim Water.....	5-151
5.9	Geotechnical Waste and Water Management Design.....	5-151
5.9.1	General Site Conditions.....	5-153
5.9.1.1	Terrain.....	5-153
5.9.1.2	Surficial Geology	5-153
5.9.1.3	Bedrock Geology.....	5-153
5.9.2	Field investigations.....	5-154
5.9.2.1	Geotechnical Drilling	5-154

Table of Contents

	5.9.2.2	Geological Mapping.....	5-155
	5.9.2.3	Hydrogeological Investigations.....	5-155
	5.9.2.4	Hydrogeologic Setting.....	5-156
	5.9.2.5	Geophysical Investigations	5-156
	5.9.2.6	Test Pit Excavations	5-156
	5.9.2.7	Laboratory Testing	5-157
5.9.3		Design Criteria.....	5-157
	5.9.3.1	Geotechnical Design Criteria	5-157
	5.9.3.2	Hydrologic Design Criteria	5-158
	5.9.3.3	Seismic Design Criteria.....	5-159
5.9.4		Main Tailings Dam.....	5-160
	5.9.4.1	Location.....	5-160
	5.9.4.2	Geological Conditions.....	5-160
	5.9.4.3	Main Tailings Dam Design	5-165
	5.9.4.4	Emergency Spillways	5-166
	5.9.4.5	Geomembrane Liner.....	5-169
	5.9.4.6	Dam Height	5-169
	5.9.4.7	Tailings Dam Construction	5-169
	5.9.4.8	Borrow for Dam Construction.....	5-171
	5.9.4.9	Stability Analysis	5-171
	5.9.4.10	Seepage Analysis.....	5-171
5.9.5		East Fork Diversion Structure	5-172
	5.9.5.1	Location.....	5-172
	5.9.5.2	Geological Conditions.....	5-172
	5.9.5.3	Structure Design.....	5-172
5.9.6		West Fork Diversion Structure	5-174
	5.9.6.1	Location.....	5-174
	5.9.6.2	Geological Conditions.....	5-174
	5.9.6.3	Structure Design.....	5-174
5.9.7		Closure Concepts.....	5-174
5.10		Mine Area Water Management.....	5-176
	5.10.1	Water Storage in the Tailings Pond.....	5-176
	5.10.1.1	Tailings Deposition	5-180
	5.10.2	Freshwater Diversion.....	5-180
	5.10.3	Construction Diversion Channels and Structures	5-183
	5.10.3.1	Starter Dam Diversion Channels.....	5-183
	5.10.3.2	Primary Cofferdam and Secondary Earthfill Dam	5-184
	5.10.4	Operating Diversion Channels and Structures.....	5-184
	5.10.4.1	West Fork Diversion Channel	5-184
	5.10.4.2	West Fork Diversion Structure.....	5-184
	5.10.4.3	Dendritic Creek Diversion – North Channel	5-184
	5.10.4.4	Dendritic Creek Diversion – South Channel	5-185
	5.10.4.5	Main Diversion Channel	5-185
	5.10.4.6	East Fork Diversion Structure	5-187
	5.10.4.7	East Fork Aqueduct.....	5-187
	5.10.4.8	Channel Crossings.....	5-188
	5.10.4.9	Minor Crossings	5-191
5.11		Waste Management.....	5-191
	5.11.1	Waste Rock and Tailings.....	5-192

Table of Contents

	5.11.1.1	Waste Rock Handling and Storage.....	5-192
	5.11.1.2	In-Valley Dump.....	5-195
	5.11.1.3	North Junction Not-PAG Waste Dumps	5-196
	5.11.1.4	Tailings Handling and Storage.....	5-199
5.11.2		Domestic Wastes and Industrial Wastes.....	5-200
	5.11.2.1	Hazardous Wastes	5-200
	5.11.2.2	Non-Hazardous Wastes	5-200
	5.11.2.3	Domestic and Industrial Waste Management Facilities	5-203
	5.11.2.4	Sewage Treatment Plant.....	5-204
5.12		Road Access.....	5-207
	5.12.1	Construction Phase	5-207
	5.12.1.1	Road Design Assumptions	5-207
	5.12.1.2	Route Description.....	5-209
	5.12.1.3	Borrow Sources	5-212
	5.12.1.4	Construction Schedule.....	5-215
	5.12.1.5	Construction Methodology.....	5-215
	5.12.1.6	Water Management	5-221
	5.12.1.7	Hazards Evaluation	5-222
	5.12.1.8	Fish Bearing Crossings.....	5-223
	5.12.1.9	Navigable Water Crossings	5-236
	5.12.1.10	Scotsimpson Creek Tunnel.....	5-236
	5.12.1.11	Glacier Access.....	5-243
	5.12.2	Operations Phase	5-243
	5.12.2.1	Access Control	5-243
	5.12.2.2	Equipment and Supplies Transportation	5-245
	5.12.2.3	Fuel, Mill Reagents and Grinding Steel Transportation.....	5-246
	5.12.2.4	Road Maintenance.....	5-246
	5.12.2.5	Avalanche Control.....	5-248
	5.12.2.6	Milepost Operation.....	5-253
5.13		Infrastructure and Support Facilities.....	5-253
	5.13.1	Air Support Operations.....	5-253
	5.13.1.1	Commercial Airlift Strategy	5-254
	5.13.1.2	Design Aircraft Selection	5-257
	5.13.1.3	Air Service and Schedule	5-259
	5.13.1.4	Aerodrome Operations	5-260
	5.13.2	Bulk Fuel Storage and Handling	5-261
	5.13.2.1	Diesel Pipeline	5-262
	5.13.2.2	Tank Farm	5-262
	5.13.2.3	Dispensing.....	5-262
	5.13.3	Mine and Mill Maintenance and Service Facilities	5-264
	5.13.4	Personnel Accommodations	5-264
	5.13.4.1	Construction Camps	5-265
	5.13.4.2	Permanent Camps.....	5-265
	5.13.5	Employee Transportation	5-266
	5.13.6	Site Communication System	5-266
	5.13.7	Power Supply.....	5-267
	5.13.7.1	Power Requirements	5-267
	5.13.7.2	Transmission Line and Corridor	5-268
	5.13.7.3	Emergency Power	5-272

Table of Contents

5.13.8	Manpower and Employment	5-275
5.13.9	Work Schedule	5-279
5.14	Procurement, Hiring and Training	5-279
5.14.1	Procurement Plan and Policy	5-279
5.15	Organization and Employment	5-280
5.15.1	Mine and Mill Organization Structure.....	5-280
5.15.2	Hiring Policy	5-280
5.15.3	Training	5-280
5.16	Project Schedule	5-282
5.16.1	Construction Schedule.....	5-282
5.16.2	Operation Schedule	5-285
6.	Environmental and Socio-Economic Setting	6-1
6.1	Introduction.....	6-1
6.2	Climate.....	6-6
6.3	Air Quality	6-12
6.4	Noise	6-14
6.5	Surface Water	6-16
6.5.1	Quantity	6-16
6.5.1.1	Regional Hydrological Setting	6-18
6.5.1.2	Access Corridor.....	6-28
6.5.1.3	Filter Plant.....	6-28
6.5.1.4	Aerodrome Facility	6-32
6.5.1.5	Mine Area.....	6-32
6.5.2	Surface Water Quality	6-32
6.5.2.1	Overview	6-32
6.5.2.2	Filter Plant and Access Corridor	6-46
6.5.2.3	Aerodrome Facilities	6-47
6.5.2.4	Mine Area.....	6-48
6.5.2.5	Stikine River.....	6-51
6.6	Groundwater	6-52
6.6.1	Quantity	6-52
6.6.1.1	Geological Controls.....	6-52
6.6.1.2	Hydrostratigraphy.....	6-52
6.6.1.3	Groundwater Recharge and Discharge	6-53
6.6.1.4	Groundwater Flow.....	6-56
6.6.2	Quality	6-63
6.6.2.1	Summary of Chemistry	6-64
6.6.2.2	Trace Metals, Total Carbon and Nutrients in Groundwater	6-74
6.6.2.3	Summary of Mine Site Groundwater Quality	6-76
6.7	Sediment Quality	6-78
6.7.1	Overview	6-78
6.7.2	Filter Plant and Access Corridor	6-78
6.7.3	Aerodrome Facility.....	6-82
6.7.4	Mine Area.....	6-82
6.7.5	Stikine River.....	6-82
6.8	Aquatic Resources	6-83

Table of Contents

6.8.1	Overview	6-83
6.8.2	Filter Plant and Access Corridor	6-83
6.8.2.1	Primary Producers	6-83
6.8.2.2	Secondary Producers	6-86
6.8.3	Aerodrome Facility	6-90
6.8.3.1	Primary Producers	6-90
6.8.3.2	Secondary Producers	6-91
6.8.4	Mine Area	6-91
6.8.4.1	Primary Producers	6-91
6.8.4.2	Secondary Producers	6-91
6.8.5	Stikine River	6-92
6.8.5.1	Primary Producers	6-92
6.8.5.2	Secondary Producers	6-92
6.9	Fish Habitat and Community	6-93
6.9.1	Overview	6-93
6.9.2	Filter Plant and Access Corridor	6-93
6.9.2.1	Locations and Surveys	6-93
6.9.2.2	Fish Habitat	6-94
6.9.2.3	Fish Community	6-98
6.9.3	Aerodrome Facility	6-101
6.9.3.1	Locations and Surveys	6-101
6.9.3.2	Fish Habitat	6-101
6.9.3.3	Fish Community	6-103
6.9.4	Mine Area	6-104
6.9.4.1	Locations and Surveys	6-104
6.9.4.2	Fish Habitat	6-104
6.9.4.3	Fish Community	6-108
6.9.5	Stikine River	6-110
6.9.5.1	Locations and Surveys	6-110
6.9.5.2	Fish Habitat	6-113
6.9.5.3	Fish Community	6-113
6.10	Wetlands	6-116
6.10.1	Regional Project Area	6-116
6.10.2	Wetland Study Area	6-116
6.10.3	Filter Plant and Access Corridor	6-118
6.10.3.1	Iskut Wetland Region	6-118
6.10.3.2	East More Creek Wetland Region	6-121
6.10.3.3	Central More Creek Wetland Region	6-121
6.10.3.4	West More Creek Wetland Region	6-121
6.10.3.5	Sphaler Creek Wetland Region	6-122
6.10.3.6	Porcupine River Wetland Region	6-122
6.10.3.7	Scotsimpson Creek/Galore Creek Wetland Region	6-122
6.10.4	Aerodrome Facility	6-122
6.10.4.1	Porcupine Wetland Region	6-122
6.10.5	Mine Area	6-123
6.10.5.1	Scotsimpson Creek and Galore Creek Wetland Region	6-123
6.11	Landscape	6-124
6.11.1	Geology	6-124

Table of Contents

6.11.1.1	Regional Project Area	6-124
6.11.1.2	Filter Plant and Access Corridor	6-125
6.11.1.3	Aerodrome Facility	6-126
6.11.1.4	Mine Area.....	6-126
6.11.2	Topography, Terrain and Geohazards	6-128
6.11.2.1	Regional Project Area	6-128
6.11.2.2	Filter Plant and Access Corridor	6-128
6.11.2.3	Aerodrome Facility	6-130
6.11.2.4	Mine Site	6-130
6.11.3	Acid Rock Drainage and Metal Leaching	6-133
6.11.3.1	Overview	6-133
6.11.3.2	Mine Area.....	6-133
6.11.3.3	Access Corridor.....	6-137
6.12	Terrestrial Ecosystems, Vegetation and Soils.....	6-141
6.12.1	Regional Project Area.....	6-142
6.12.1.1	Rare Elements	6-142
6.12.1.2	Soils.....	6-143
6.12.2	Filter Plant and Access Corridor	6-145
6.12.2.1	Rare Elements	6-148
6.12.2.2	Invasive Plants	6-149
6.12.2.3	Metal Concentrations in Plant Tissue.....	6-149
6.12.2.4	Soils.....	6-150
6.12.2.5	Metal Concentrations in Soils	6-150
6.12.3	Mine Area.....	6-153
6.12.3.1	Rare Elements	6-153
6.12.3.2	Invasive Plants	6-153
6.12.3.3	Metal Concentrations in Plant Tissue.....	6-153
6.12.3.4	Soils.....	6-154
6.12.3.5	Land Suitability and Productivity	6-163
6.12.3.6	Soil Suitability for Reclamation.....	6-164
6.12.3.7	Metal Concentrations	6-164
6.13	Wildlife and Wildlife Habitat	6-166
6.13.1	Mammals	6-166
6.13.1.1	Moose.....	6-166
6.13.1.2	Mountain Goats.....	6-169
6.13.1.3	Grizzly Bears.....	6-173
6.13.1.4	Small Mammals	6-179
6.13.1.5	Bats.....	6-180
6.13.2	Birds	6-181
6.13.2.1	Waterfowl.....	6-181
6.13.2.2	Trumpeter Swans.....	6-195
6.13.2.3	Harlequin Ducks.....	6-196
6.13.2.4	Marbled Murrelets.....	6-196
6.13.2.5	Raptors	6-197
6.13.2.6	Songbirds.....	6-202
6.13.3	Herpetiles.....	6-203
6.13.4	Wildlife Habitat Suitability	6-205
6.13.4.1	Moose.....	6-207
6.13.4.2	Mountain Goat	6-208

Table of Contents

	6.13.4.3	Grizzly Bear	6-215
	6.13.4.4	American Marten.....	6-225
	6.13.4.5	Hoary Marmot.....	6-225
	6.13.4.6	Western Toad	6-226
6.14		Archaeological and Heritage Sites.....	6-228
	6.14.1	Regional Project Area.....	6-228
	6.14.2	Filter Plant and Access Corridor	6-229

	6.14.4	Mine Area.....	6-234
6.15		Traditional Land Use	6-235
6.16		Socio-economic	6-238
	6.16.1	Regional Mine Development Planning.....	6-238
	6.16.2	Tahltan Nation	6-241
	6.16.2.1	General Demography and Culture.....	6-241
	6.16.2.2	Description of Tahltan Communities	6-242
	6.16.2.3	Tahltan Economic Development	6-245
	6.16.3	District of Stewart.....	6-248
	6.16.4	Secondary Impact Area	6-250
	6.16.5	Land Use.....	6-250
	6.16.5.1	Traditional Activities.....	6-250
	6.16.5.2	Commercial Activities.....	6-251
	6.16.6	Transportation.....	6-252
6.17		Country Foods.....	6-255
6.18		Traditional Knowledge Studies.....	6-257
	6.18.1	Study Methodology and Consultation	6-258
	6.18.2	Field Research	6-259
	6.18.3	Recent and Current Traditional Knowledge Studies	6-260
	6.18.3.1	Galore Creek Pilot Project.....	6-261
	6.18.3.2	Country Foods.....	6-267
	6.18.3.3	Wildlife and Wildlife Habitat.....	6-267
6.19		Navigable Waters.....	6-270

VOLUME II

Table of Contents.....	i
7. Environmental and Socio-Economic Effects Assessment.....	7-1
7.1 Introduction: Assessment Objectives and Methodology	7-1
7.1.1 Assessment Objectives	7-1
7.1.1.1 Scope of Assessment.....	7-1
7.1.1.2 Spatial Boundary	7-1
7.1.1.3 Temporal Boundary.....	7-2
7.1.1.4 Project Components	7-2
7.1.1.5 Project Issues.....	7-8
7.1.2 Assessment Methodology.....	7-8
7.1.2.1 Step 1 – Relationships between Project Components and Project Issues.....	7-8

Table of Contents

	7.1.2.2	Step 2 – Effects Assessment.....	7–9
	7.1.2.3	Step 3 – Assessment of Significance.....	7–11
	7.1.2.4	Step 4 – Cumulative Effects Assessment.....	7–12
7.2		Climate Effects Assessment.....	7–13
	7.2.1	Introduction	7–13
		7.2.1.1 Effects Assessment Scope.....	7–13
		7.2.1.2 Methodology	7–14
		7.2.1.3 Spatial Boundaries.....	7–14
		7.2.1.4 Regulatory Framework.....	7–15
	7.2.2	Projected GHG Emissions	7–17
	7.2.3	Project Effect on Large-Scale Carbon Sinks	7–21
	7.2.4	GHG Emission Mitigation.....	7–22
	7.2.5	GHG Emissions Summary.....	7–22
7.3		Air Quality Effects Assessment.....	7–27
	7.3.1	Introduction	7–27
		7.3.1.1 Effects Assessment Scope.....	7–27
		7.3.1.2 Methodology	7–27
		7.3.1.3 Spatial Boundaries.....	7–30
	7.3.2	Air Quality Modelling	7–30
		7.3.2.1 Criteria Compounds and Objectives.....	7–30
		7.3.2.2 Acid Deposition.....	7–40
		7.3.2.3 Air Quality Modelling Approach	7–41
		7.3.2.4 Air Quality Model Results	7–48
	7.3.3	Mitigation and Monitoring	7–90
	7.3.4	Effects on Biological Receptors	7–90
7.4		Noise Effects Assessment.....	7–99
	7.4.1	Introduction	7–99
		7.4.1.1 Effects Assessment Scope.....	7–99
		7.4.1.2 Methodology	7–99
		7.4.1.3 Spatial Boundaries.....	7–105
	7.4.2	Noise Modelling	7–105
		7.4.2.1 Noise Objectives	7–107
		7.4.2.2 Noise Modelling Approach	7–108
		7.4.2.3 Noise Modelling Results	7–110
	7.4.3	Mitigation and Monitoring	7–135
	7.4.4	Effects on Biological Receptors	7–137
7.5		Surface Water Quantity Effects Assessment	7–138
	7.5.1	Introduction	7–138
		7.5.1.1 Methodology	7–139
		7.5.1.2 Spatial Boundaries.....	7–139
		7.5.1.3 Effects Assessment Scope.....	7–139
		7.5.1.4 Modelling Tools	7–144
	7.5.2	Mine Site	7–145
		7.5.2.1 Changes to flow pathways and drainage areas.....	7–145
		7.5.2.2 Annual flow volume.....	7–151
		7.5.2.3 Seasonal Flow Distribution	7–152
		7.5.2.4 Peak Flows	7–169
		7.5.2.5 Low Flows.....	7–178

Table of Contents

7.5.3	Access Corridor.....	7-181
7.5.3.1	Bridges and Stream Crossings.....	7-182
7.5.3.2	Interception of natural flow paths and road drainage issues	7-186
7.5.3.3	Change in Runoff Characteristics Due to Forest Clearance and Presence of Compacted Road Surfaces	7-187
7.5.3.4	Pipeline Rupture.....	7-192
7.5.4	Filter Plant	7-192
7.5.5	Porcupine Aerodrome.....	7-195
7.5.6	Summary.....	7-196
7.6	Surface Water Quality Effects Assessment	7-198
7.6.1	Introduction	7-198
7.6.1.1	Effects Assessment Scope.....	7-198
7.6.1.2	Temporal and Spatial Boundaries	7-199
7.6.1.3	Methodology	7-199
7.6.2	Modelling Tools	7-215
7.6.2.1	Tailings and Waste Rock Impoundment Water Quality Prediction Model.....	7-215
7.6.2.2	Hydrodynamic Model of Galore Creek and Scud River Mixing.....	7-216
7.6.2.3	CALPUFF Air Dispersion Model	7-217
7.6.2.4	Plume Model for Filter Plant Diffuser	7-217
7.6.3	Contaminant Loading	7-217
7.6.3.1	Metal Leaching and Acid Rock Drainage (ML/ARD).....	7-218
7.6.3.2	Leaching of Nitrogen Residues Generated from Blasting.....	7-225
7.6.3.3	Atmospheric Deposition.....	7-230
7.6.4	Discharges	7-231
7.6.4.1	Effluent Discharge.....	7-231
7.6.4.2	Sewage	7-266
7.6.4.3	Seepages.....	7-267
7.6.4.4	Spills.....	7-267
7.6.5	Surface Runoff and Siltation and Associated Water Chemistry Effects	7-268
7.6.5.1	Introduction	7-268
7.6.5.2	Mine Area and Receiving Environment.....	7-269
7.6.5.3	Access Corridor.....	7-269
7.6.6	Significance of Residual Adverse Effects	7-269
7.7	Groundwater Effects Assessment	7-270
7.7.1	Introduction	7-270
7.7.1.1	Existing Environment.....	7-270
7.7.1.2	Groundwater Effects Assessment Scope.....	7-270
7.7.1.3	Methodology	7-270
7.7.1.4	Environmental Assessment Boundaries	7-273
7.7.2	Groundwater Quantity	7-273
7.7.2.1	Environmental Impacts During Construction and Operation	7-273
7.7.2.2	Environmental Impacts During Closure and Post-Closure	7-282
7.7.3	Groundwater Quality	7-283
7.7.3.1	Environmental Impacts During Construction and Operation	7-283
7.7.3.2	Environmental Impacts During Closure and Post-Closure	7-291
7.7.4	Environmental Design and Mitigation	7-291
7.7.5	Residual Environmental Impacts.....	7-291

Table of Contents

7.8	Sediment Quality Effects Assessment	7-297
7.8.1	Introduction	7-297
7.8.1.1	Effects Assessment Scope	7-297
7.8.1.2	Methodology	7-297
7.8.1.3	Spatial Boundaries.....	7-298
7.8.2	Discharges	7-301
7.8.2.1	Introduction	7-301
7.8.2.2	Mine Area, Scud and Stikine Rivers	7-301
7.8.2.3	Filter Plant and Access Corridor	7-318
7.8.2.4	Aerodrome Facility	7-320
7.8.3	Siltation.....	7-320
7.8.3.1	Introduction	7-320
7.8.3.2	Mine Area, Scud and Stikine Rivers	7-320
7.8.3.3	Filter Plant and Access Corridor	7-321
7.8.3.4	Aerodrome Facility	7-322
7.8.4	Significance of Residual Adverse Effects	7-322
7.9	Aquatic Resources Effects Assessment	7-323
7.9.1	Introduction	7-323
7.9.1.1	Effects Assessment Components	7-323
7.9.1.2	Spatial Boundaries.....	7-324
7.9.1.3	Methodology	7-328
7.9.2	Habitat Loss and Alteration.....	7-348
7.9.2.1	Introduction	7-348
7.9.2.2	Mine Area, Scud and Stikine Rivers	7-348
7.9.2.3	Access Corridor.....	7-351
7.9.2.4	Filter Plant.....	7-353
7.9.2.5	Aerodrome Facility	7-353
7.9.3	Direct Mortality and Sublethal Effects	7-353
7.9.3.1	Introduction	7-353
7.9.3.2	Mine Area, Scud and Stikine Rivers	7-354
7.9.3.3	Access Corridor.....	7-356
7.9.3.4	Filter Plant.....	7-358
7.9.3.5	Aerodrome Facility	7-359
7.9.4	Reduced Productive Capacity.....	7-360
7.9.4.1	Mine Area, Scud and Stikine Rivers	7-360
7.9.4.2	Access Corridor.....	7-363
7.9.4.3	Filter Plant.....	7-365
7.9.4.4	Aerodrome Facility	7-365
7.9.5	Significance of Residual Adverse Effects	7-366
7.10	Fish and Fish Habitat Effects Assessment	7-368
7.10.1	Introduction	7-368
7.10.1.1	Effects Assessment Scope	7-368
7.10.1.2	Spatial Boundaries.....	7-369
7.10.1.3	Methodology	7-370
7.10.1.4	Valued Ecosystem Component Background.....	7-379
7.10.2	Productive Capacity of Habitat.....	7-380
7.10.2.1	Introduction	7-380
7.10.2.2	Mine Area.....	7-380

Table of Contents

	7.10.2.3	Mill Tailings and Waste Rock Facility.....	7-381
	7.10.2.4	Site Runoff and Diversion Channel	7-393
	7.10.2.5	Access Corridor and Pipelines	7-394
	7.10.2.6	Porcupine Aerodrome	7-396
	7.10.2.7	Filter Plant Effluent.....	7-397
7.10.3		Habitat Loss and Alteration.....	7-398
	7.10.3.1	Introduction	7-398
	7.10.3.2	Mine Area.....	7-398
	7.10.3.3	Mill Tailings and Waste Rock Facility.....	7-398
	7.10.3.4	Site Runoff and Diversion Channel	7-409
	7.10.3.5	Access Corridor and Pipelines	7-409
	7.10.3.6	Porcupine Aerodrome	7-411
	7.10.3.7	Filter Plant.....	7-412
7.10.4		Direct and Indirect Mortality	7-412
	7.10.4.1	Introduction	7-412
	7.10.4.2	Mine Area.....	7-412
	7.10.4.3	Mill Tailings and Waste Rock Facility.....	7-412
	7.10.4.4	Site Runoff and Diversion Channel	7-415
	7.10.4.5	Access Corridor and Pipelines	7-415
	7.10.4.6	Porcupine Aerodrome	7-416
	7.10.4.7	Filter Plant.....	7-416
7.10.5		Sublethal Effects.....	7-416
	7.10.5.1	Introduction	7-416
	7.10.5.2	Mine Area.....	7-417
	7.10.5.3	Mill Tailings and Waste Rock Facility.....	7-417
	7.10.5.4	Site Runoff and Diversion Channel	7-418
	7.10.5.5	Access Corridor and Pipelines	7-423
	7.10.5.6	Porcupine Aerodrome	7-424
	7.10.5.7	Filter Plant.....	7-425
7.10.6		Significance of Adverse Residual Effects	7-425
7.11		Wetland Functions Effects Assessment	7-428
	7.11.1	Wetland Area Lost or Altered Due to Project	7-428
		7.11.1.1 Direct loss.....	7-428
		7.11.1.2 Indirect loss and alteration	7-428
	7.11.2	Effect of Project on Wetland Functions	7-436
		7.11.2.1 Biodiversity Function.....	7-436
		7.11.2.2 Hydrological Function.....	7-441
		7.11.2.3 Water Quality Function.....	7-442
		7.11.2.4 Carbon Sequestration Function	7-443
	7.11.3	Summary.....	7-444
7.12		Terrestrial Ecosystems, Vegetation, and Soils Effects Assessment.....	7-445
	7.12.1	Introduction	7-445
		7.12.1.1 Spatial Boundaries.....	7-445
		7.12.1.2 Effects Assessment Scope.....	7-445
		7.12.1.3 Methodology	7-447
	7.12.2	Filter Plant and Access Corridor	7-458
		7.12.2.1 Ecosystem Alteration	7-458
		7.12.2.2 Effects on Plant Species of Conservation Concern	7-463
		7.12.2.3 Potential Introduction of Invasive Species	7-464

Table of Contents

7.12.3	Aerodrome Facility.....	7-464
7.12.3.1	Ecosystem Alteration	7-464
7.12.3.2	Effects on Plant Species of Conservation Concern	7-468
7.12.3.3	Potential Introduction of Invasive Species	7-468
7.12.4	Mine Area.....	7-468
7.12.4.1	Ecosystem Alteration	7-469
7.12.4.2	Effects on Plant Species of Conservation Concern	7-479
7.12.4.3	Potential Introduction of Invasive Species	7-479
7.13	Wildlife and Wildlife Habitat	7-481
7.13.1	Introduction	7-481
7.13.1.1	Effects Assessment Scope.....	7-481
7.13.1.2	Methodology	7-481
7.13.1.3	Spatial Boundaries.....	7-495
7.13.2	Habitat Alteration	7-495
7.13.2.1	Direct Terrestrial Habitat Loss	7-495
7.13.2.2	Wetland and River Habitat Loss	7-517
7.13.2.3	Indirect Habitat Loss	7-519
7.13.3	Disruption, Blockage and Impediment to Movements	7-519
7.13.3.1	Introduction	7-519
7.13.3.2	Grizzly Bear	7-520
7.13.3.3	Mountain Goat	7-523
7.13.3.4	Moose.....	7-523
7.13.3.5	American Marten.....	7-525
7.13.3.6	Hoary Marmot.....	7-525
7.13.3.7	Birds	7-526
7.13.3.8	Western Toad	7-526
7.13.4	Sensory Disturbance	7-527
7.13.4.1	Introduction	7-527
7.13.4.2	Noise – General.....	7-528
7.13.4.3	Traffic and Road Noise	7-528
7.13.4.4	Aircraft Noise.....	7-535
7.13.4.5	Industrial Noise	7-539
7.13.4.6	Explosives and Avalanche Control	7-541
7.13.4.7	Light	7-543
7.13.5	Disturbance of Feeding, Breeding and Denning Habitats or Behaviours... ..	7-545
7.13.5.1	Introduction	7-545
7.13.5.2	Feeding.....	7-545
7.13.5.3	Denning and Breeding.....	7-554
7.13.6	Features Acting as an Attractant.....	7-559
7.13.6.1	Introduction	7-559
7.13.6.2	Galore Creek Valley/Filter Plant/Air Access Facilities.....	7-560
7.13.6.3	Access Road and Transmission Line.....	7-566
7.13.7	Chemical Hazards.....	7-569
7.13.7.1	Introduction	7-569
7.13.7.2	Galore Creek Valley.....	7-571
7.13.7.3	Access Road and Concentrate/Diesel Pipelines	7-579
7.13.7.4	Filter Plant.....	7-580
7.13.7.5	Aerodrome Facilities	7-581
7.13.7.6	Conclusions	7-582

Table of Contents

7.13.8	Reduction in Wildlife Productivity.....	7-583
7.13.8.1	Introduction	7-583
7.13.8.2	Grizzly Bear	7-583
7.13.8.3	Mountain Goat	7-584
7.13.8.4	Moose	7-589
7.13.8.5	American Marten.....	7-589
7.13.8.6	Hoary Marmot.....	7-590
7.13.8.7	Bats.....	7-590
7.13.8.8	Birds	7-590
7.13.8.9	Western Toad	7-593
7.13.9	Mortality.....	7-594
7.13.9.1	Introduction	7-594
7.13.9.2	Direct Mortality.....	7-594
7.13.9.3	Indirect Mortality	7-610
7.13.10	Significance of Adverse Residual Effects	7-613
7.13.10.1	Grizzly Bear	7-613
7.13.10.2	Mountain Goat	7-615
7.14	Archaeological and Heritage Resources Effects Assessment.....	7-617
7.14.1	Introduction	7-617
7.14.1.1	Effects Assessment Scope.....	7-617
7.14.1.2	Methods.....	7-617
7.14.1.3	Spatial Boundaries.....	7-618
7.14.1.4	Temporal Boundaries	7-618
7.14.1.5	Assessment Limitations.....	7-620
7.14.2	Existing Conditions	7-620
7.14.3	Likely Future Conditions.....	7-627
7.14.4	Environmental Effects Assessment	7-627
7.14.4.1	Definitions.....	7-627
7.14.4.2	Effects during Project Phases.....	7-628
7.14.4.3	Environmental Design and Mitigation	7-628
7.14.5	Residual Environmental Effects	7-629
7.14.5.1	Significance Criteria.....	7-629
7.14.5.2	Residual Effects of Project Phases	7-629
7.15	Socio-Economic Effects Assessment.....	7-632
7.15.1	Introduction	7-632
7.15.1.1	Effects Assessment Scope.....	7-632
7.15.1.2	Methodology	7-634
7.15.1.3	Assessment Limits	7-638
7.15.2	Existing Conditions	7-639
7.15.3	Likely Future Conditions: No Galore Creek Project	7-639
7.15.4	Socio-Economic Impacts on the Primary Impact Area	7-647
7.15.4.1	An Overview	7-647
7.15.4.2	Socio-Economic Impacts on Dease Lake.....	7-649
7.15.4.3	Socio-Economic Impacts on Iskut.....	7-663
7.15.4.4	Socio-Economic Impacts on Telegraph Creek.....	7-674
7.15.4.5	Socio-Economic Impacts on Stewart	7-685
7.15.4.6	Land Use Impacts.....	7-692
7.15.5	Socio-Economic Impacts on the Secondary Impact Areas: Smithers and Terrace	7-694

Table of Contents

7.15.6	Tertiary Impact Area	7-700
7.15.7	Impact Mitigation	7-703
7.15.7.1	Enhancement and Mitigation of Socio-Economic Impacts on Tahltan Communities	7-705
7.15.7.2	Enhancement and Mitigation of Socio-Economic Impacts on Stewart.....	7-713
7.15.8	Assessment of the Significance of Residual Adverse Effects	7-714
7.15.9	Socio-Economic Impact Monitoring	7-727
7.16	Visual and Aesthetic Resources Effects Assessment.....	7-729
7.16.1	Methods	7-729
7.16.2	Viewshed Analysis	7-729
7.16.3	Line-of-Sight Analysis	7-733
7.17	Traditional Use Effects Assessment	7-734
7.17.1	Introduction	7-734
7.17.1.1	Effects Assessment Scope.....	7-734
7.17.1.2	Methods.....	7-734
7.17.1.3	Spatial Boundaries.....	7-739
7.17.1.4	Assessment Limitations.....	7-739
7.17.2	Existing Conditions	7-739
7.17.3	Likely Future Conditions.....	7-741
7.17.4	Environmental Effects Assessment	7-741
7.17.5	Potential Effects for Future Traditional Use.....	7-743
7.17.6	Summary.....	7-743
7.18	Navigable Water Effects Assessment	7-744

VOLUME III

Table of Contents.....		i
8.	Environmental Management and Mitigation Measures	8-1
8.1	Introduction.....	8-1
8.2	Air Emissions and Fugitive Dust Management Plan	8-4
8.2.1	Construction Phase	8-4
8.2.2	Operations Phase	8-6
8.2.2.1	Mining Activities	8-6
8.2.2.2	Ore Processing Area.....	8-7
8.2.2.3	Access Corridor and Transportation.....	8-7
8.2.2.4	Filter Plant and Porcupine Aerodrome.....	8-7
8.2.2.5	Tailings and Waste Rock Disposal/Storage	8-8
8.2.2.6	Miscellaneous Items.....	8-8
8.2.3	Workplace Air Quality Control	8-8
8.2.3.1	Ore Processing Areas and Indoor Operations	8-8
8.2.3.2	Mining Activities	8-9
8.2.4	Monitoring and Implementation	8-9
8.3	Water Management Plan.....	8-10
8.3.1	Water Management Philosophy.....	8-11
8.3.2	Changes to Flow Pathways and Drainage Areas	8-11

Table of Contents

8.3.3	Water Balance	8-19
8.3.3.1	Predicted Water Volumes.....	8-23
8.3.3.2	Pumped Flows and Downstream Flow Rates.....	8-23
8.3.3.3	Predicted Water Levels	8-33
8.3.4	Water Management Structures	8-33
8.3.4.1	Planning and Design Criteria	8-33
8.3.4.2	Diversion Structures.....	8-34
8.3.4.3	Diversion Channels	8-36
8.3.5	Tailings and Waste Rock Impoundment Water Management.....	8-41
8.3.6	Open Pit Water Management	8-41
8.3.7	Plant Site Water Management	8-41
8.3.8	Filter Plant Water Management.....	8-42
8.3.9	Waste Rock Dumps Water Management.....	8-42
8.3.10	Access Corridor Water Management	8-44
8.4	Tailings and Waste Rock Management Plan	8-45
8.4.1	Classification of the Tailings.....	8-46
8.4.2	Tailings Management Structures.....	8-46
8.4.2.1	Overall Design Criteria for Tailings Management Structures.....	8-47
8.4.2.2	Main Tailings Dam.....	8-52
8.4.2.3	Freshwater Diversions.....	8-53
8.4.2.4	Seepage Recovery Dams.....	8-53
8.4.3	Surveillance of the Tailings Management Structures and Dam Safety	8-55
8.4.3.1	Operation Maintenance and Surveillance Plan	8-56
8.4.3.2	Types of surveillance	8-57
8.4.4	In-Impoundment Water Quality Monitoring	8-58
8.4.5	Seepage Reduction, Control Measures and Water Quality Monitoring	8-59
8.4.6	Tailings Beach Development and Dust Management	8-60
8.4.7	Waste and Water Storage in the Tailings and Waste Rock Impoundment.....	8-60
8.4.7.1	Tailings and Waste Rock Production	8-60
8.4.7.2	Water Storage in Impoundment	8-61
8.4.8	Surplus Water Discharge.....	8-64
8.4.9	Construction Considerations.....	8-65
8.4.10	Summary of Closure Concepts	8-67
8.4.11	Contingency for Non-Compliant Effluent.....	8-67
8.5	Pipelines Environmental Management Plan	8-68
8.5.1	Introduction	8-68
8.5.2	Pipeline Design Criteria.....	8-68
8.5.3	Pipeline System Considerations	8-71
8.5.3.1	Pipeline Integrity	8-71
8.5.3.2	Construction Phase.....	8-72
8.5.3.3	Operations Phase.....	8-72
8.5.3.4	Risk Assessment.....	8-73
8.5.3.5	Contingency Plans.....	8-73
8.5.4	Environmental Management.....	8-74
8.5.4.1	Concentrate Pipeline	8-74
8.5.4.2	Diesel Fuel Pipeline	8-78
8.5.4.3	Filter Plant Discharge Water Pipeline.....	8-80
8.5.5	Environmental Training and Awareness	8-81

Table of Contents

8.6	Filter Plant and Concentrate Loadout Environmental Management Plan.....	8-83
8.6.1	Introduction	8-83
8.6.2	Regulatory Considerations	8-83
8.6.3	Filter Plant Considerations in the LRMP.....	8-84
8.6.4	Site Description	8-84
8.6.5	Design Basis and Design Criteria.....	8-85
8.6.5.1	Filter Plant.....	8-85
8.6.5.2	Loadout Plant	8-85
8.6.5.3	Water Treatment Plant	8-85
8.6.5.4	Risk Management.....	8-85
8.6.6	Main Features and Environmental Considerations.....	8-87
8.6.6.1	Overview	8-87
8.6.6.2	Construction Phase.....	8-87
8.6.6.3	Operations Phase.....	8-89
8.6.6.4	Pipeline Management Plan.....	8-93
8.6.6.5	Erosion Control	8-93
8.6.6.6	Sediment and Dust Control	8-93
8.6.6.7	Winter Operation.....	8-96
8.6.6.8	Wildlife Considerations.....	8-97
8.6.7	Closure and Post-Closure Phases	8-97
8.6.8	Access Control.....	8-98
8.7	ML/ARD Prediction and Prevention Management Plan.....	8-99
8.7.1	Prediction Program.....	8-99
8.7.2	Methods.....	8-99
8.7.2.1	Waste Delineation and Segregation	8-99
8.7.2.2	Analytical Methods	8-102
8.7.2.3	Management Criteria.....	8-103
8.7.3	Access Tunnel Waste Rock	8-103
8.7.3.1	Summary of Proposed Development and Disposal Method.....	8-103
8.7.3.2	Existing Data	8-104
8.7.3.3	Sampling and Testing During Development.....	8-104
8.7.3.4	Management Criteria.....	8-105
8.7.3.5	Performance Monitoring and Additional Testing	8-105
8.7.4	Waste Rock for Construction	8-105
8.7.4.1	Summary of Proposed Development and Disposal Method.....	8-105
8.7.4.2	Existing Data	8-106
8.7.4.3	Routine Sampling and Testing During Development	8-106
8.7.4.4	Management Criteria.....	8-106
8.7.4.5	Performance Monitoring and Additional Testing	8-107
8.7.5	Mine Area Overburden.....	8-107
8.7.5.1	Summary of Proposed Disposal Method.....	8-107
8.7.5.2	Existing Data	8-107
8.7.5.3	Routine Sampling and Testing	8-108
8.7.5.4	Management Criteria.....	8-108
8.7.5.5	Performance Monitoring and Additional Testing	8-108
8.7.6	Oxide Waste Rock.....	8-109
8.7.6.1	Summary of Proposed Development and Disposal Method.....	8-109
8.7.6.2	Existing Data	8-109
8.7.6.3	Routine Sampling and Testing	8-109

Table of Contents

	8.7.6.4	Management Criteria.....	8-109
	8.7.6.5	Performance Monitoring and Additional Testing	8-110
8.7.7		Unoxidized Waste Rock	8-110
	8.7.7.1	Summary of Proposed Development and Disposal Method.....	8-110
	8.7.7.2	Existing Data	8-110
	8.7.7.3	Routine Sampling and Testing	8-110
	8.7.7.4	Management Criteria.....	8-111
	8.7.7.5	Performance Monitoring and Additional Testing	8-111
8.7.8		Tailings.....	8-113
	8.7.8.1	Summary of Proposed Development and Disposal Method.....	8-113
	8.7.8.2	Existing Data	8-113
	8.7.8.3	Routine Sampling and Testing	8-113
	8.7.8.4	Management Criteria.....	8-113
	8.7.8.5	Performance Monitoring and Additional Testing	8-113
8.7.9		Post-Closure Monitoring	8-114
8.7.10		Summary of Monitoring Program	8-114
8.8		Access Corridor Preliminary ARD Management Plan	8-115
	8.8.1	Introduction	8-115
	8.8.2	Purpose of the Preliminary Management Plan	8-119
	8.8.3	Modifications to Road Design.....	8-119
	8.8.3.1	Consideration of Alignment Modifications.....	8-119
	8.8.3.2	Revision of Cut-and-Fill Schedules	8-120
	8.8.4	Field Laboratory	8-120
	8.8.5	Construction	8-121
	8.8.5.1	Roles and Responsibilities	8-121
	8.8.5.2	Grubbing and Stripping.....	8-122
	8.8.5.3	Rock Excavation	8-122
	8.8.6	Operations and Monitoring.....	8-124
	8.8.7	Closure and Reclamation.....	8-125
8.9		Materials Management Plan	8-126
	8.9.1	Purpose and Overview.....	8-126
	8.9.2	Design Considerations.....	8-126
	8.9.3	Materials Management Components	8-127
	8.9.3.1	Transportation to Site	8-127
	8.9.3.2	Logistics/Freight.....	8-128
	8.9.3.3	Site Storage Facilities.....	8-130
	8.9.3.4	Off-Site Facilities	8-134
	8.9.4	Hazardous Materials Management Plan	8-137
	8.9.4.1	Introduction	8-137
	8.9.4.2	Purpose and Scope	8-140
	8.9.4.3	Hazardous Substances Inventory	8-140
	8.9.4.4	Handling and Storage of Hazardous Materials.....	8-143
	8.9.5	Nuclear Equipment Handling and Disposal Plan	8-145
	8.9.6	Petroleum Products Management Plan.....	8-145
	8.9.7	Process Reagents Management Plan	8-146
	8.9.8	Explosives Management Plan.....	8-147
	8.9.8.1	Regulatory Setting.....	8-148
	8.9.8.2	Safety Considerations.....	8-149
	8.9.8.3	In-Pit Explosives Handling Plan	8-149

Table of Contents

	8.9.8.4	Additional Considerations.....	8-150
8.10		Erosion Control and Sediment Management Plan	8-151
	8.10.1	Introduction	8-151
		8.10.1.1 Control Issues.....	8-151
		8.10.1.2 Main Plan Components	8-152
		8.10.1.3 Avalanche Assessment.....	8-156
	8.10.2	Design Specifications	8-156
		8.10.2.1 General Considerations	8-156
		8.10.2.2 Diversion Channels and Ditches	8-157
		8.10.2.3 Erosion Control	8-159
		8.10.2.4 Sediment Control.....	8-161
	8.10.3	Mitigation Measures	8-162
		8.10.3.1 Construction Phase.....	8-163
		8.10.3.2 Operations Phase.....	8-164
		8.10.3.3 Final Closure	8-165
	8.10.4	Management Areas	8-165
		8.10.4.1 Access Road	8-166
		8.10.4.2 Haul Roads and Open Pits.....	8-167
		8.10.4.3 Waste Rock Dumps.....	8-167
		8.10.4.4 Plant Site Area.....	8-167
		8.10.4.5 Tailings and Waste Rock Storage Facility	8-168
		8.10.4.6 Borrow Areas	8-168
		8.10.4.7 Heliport Facilities.....	8-168
		8.10.4.8 Filter Plant.....	8-171
	8.10.5	Monitoring and Surveillance Program	8-171
8.11		Spill Contingency and Emergency Response Plan	8-172
	8.11.1	Introduction	8-172
	8.11.2	Purpose and Scope.....	8-172
		8.11.2.1 Regulatory Framework.....	8-175
	8.11.3	Spill Prevention	8-176
	8.11.4	Potential Uncontrolled Releases	8-176
	8.11.5	Hazard Assessment.....	8-177
	8.11.6	Risk Analysis and Management	8-178
	8.11.7	Emergency Response.....	8-181
	8.11.8	Spill Response Procedures.....	8-181
		8.11.8.1 Spill Action Steps.....	8-182
		8.11.8.2 Initial Spill Assessment.....	8-182
		8.11.8.3 Spill Reporting Procedure	8-184
		8.11.8.4 Spill Cleanup Procedures	8-187
		8.11.8.5 Contaminant and Debris Disposal.....	8-188
		8.11.8.6 Training and Testing	8-189
	8.11.9	Additional Components of Emergency Response Plan	8-190
		8.11.9.1 Triggering of Emergency Plan	8-190
		8.11.9.2 Communications Plan	8-191
		8.11.9.3 Mine and Mill Operations	8-191
		8.11.9.4 Access Corridor.....	8-193
		8.11.9.5 Air Support Operations	8-193
		8.11.9.6 Response Organization.....	8-193
		8.11.9.7 Evacuation Plan.....	8-194

Table of Contents

	8.11.9.8	Site Security	8-194
	8.11.9.9	Evaluation and Continual Improvement.....	8-195
8.12		Fish and Fish Habitat Management Plan	8-197
	8.12.1	Introduction	8-197
	8.12.2	Environmental Management System.....	8-197
	8.12.2.1	Environmental Policy	8-197
	8.12.2.2	Environmental Management Objectives	8-197
	8.12.2.3	Environmental Responsibilities.....	8-198
	8.12.3	Fisheries Management Plan.....	8-198
	8.12.3.1	Objectives.....	8-198
	8.12.3.2	Fisheries Protection	8-199
	8.12.4	Fish Habitat Compensation Plan	8-218
	8.12.4.1	Residual HADD of Fish Habitat	8-218
	8.12.4.2	General Approach to Compensation Planning	8-223
	8.12.4.3	Conceptual Habitat Compensation Plan.....	8-224
	8.12.4.4	Monitoring of Compensation Areas	8-230
8.13		Wildlife Management Plan	8-232
	8.13.1	Introduction	8-232
	8.13.1.1	Objectives.....	8-232
	8.13.1.2	Overview	8-233
	8.13.1.3	Adaptive Management Approach.....	8-233
	8.13.1.4	Land Use Resource Management Plan.....	8-233
	8.13.2	General Management Practices	8-235
	8.13.2.1	Access Restrictions	8-235
	8.13.2.2	No Hunting.....	8-236
	8.13.2.3	Wildlife Right-of-Way	8-236
	8.13.2.4	No Feeding of Wild Animals	8-236
	8.13.2.5	Waste Management	8-236
	8.13.2.6	Avoidance of Wildlife Sensitive Areas.....	8-236
	8.13.2.7	Avoidance of Wildlife Sensitive Periods	8-237
	8.13.2.8	Wildlife Exclusion.....	8-237
	8.13.2.9	Wildlife Habitat Management.....	8-237
	8.13.2.10	Employee Education Program.....	8-237
	8.13.3	Filter Plant	8-239
	8.13.3.1	Project Specific Issues for Wildlife.....	8-239
	8.13.3.2	Construction Phase.....	8-239
	8.13.3.3	Operation Phase.....	8-239
	8.13.3.4	Decommissioning and Reclamation Phase.....	8-240
	8.13.4	Access Road	8-240
	8.13.4.1	Project Specific Issues for Wildlife.....	8-240
	8.13.4.2	Detailed Design and Pre-construction Phase.....	8-241
	8.13.4.3	Construction Phase.....	8-241
	8.13.4.4	Operation Phase.....	8-243
	8.13.4.5	Decommissioning Phase	8-245
	8.13.5	Transmission Line	8-246
	8.13.5.1	Project Specific Issues for Wildlife.....	8-246
	8.13.5.2	Detailed Design and Pre-Construction Phase.....	8-246
	8.13.5.3	Construction Phase.....	8-248
	8.13.5.4	Operation Phase.....	8-249

Table of Contents

	8.13.5.5	Decommissioning and Reclamation Phase.....	8-249
8.13.6		Aerodrome and Aircraft Activity	8-250
	8.13.6.1	Overview of Management Approach	8-250
	8.13.6.2	Project Specific Issues for Wildlife.....	8-250
	8.13.6.3	Construction Phase.....	8-251
	8.13.6.4	Operation Phase.....	8-251
	8.13.6.5	Decommissioning and Reclamation Phase.....	8-255
8.13.7		Mine Site	8-255
	8.13.7.1	Project Specific Issues for Wildlife.....	8-255
	8.13.7.2	Construction phase	8-255
	8.13.7.3	Operation phase.....	8-256
	8.13.7.4	Decommissioning and Reclamation Phase.....	8-256
8.14		Domestic and Industrial Waste Management Plan	8-258
	8.14.1	Domestic and Industrial Waste Management	8-259
	8.14.1.1	Domestic and Industrial Waste Management Plan.....	8-259
	8.14.1.2	Waste Types and Sources.....	8-261
	8.14.1.3	Waste Collection/Disposal Facilities.....	8-261
	8.14.1.4	Procedures for Managing Specific Wastes.....	8-268
	8.14.2	Closure and Decommissioning	8-274
	8.14.2.1	Waste Management during Closure	8-274
	8.14.2.2	Decommissioning of the Waste Management Facilities	8-275
8.15		Access Road Management Plan.....	8-276
	8.15.1	Introduction	8-276
	8.15.1.1	Regulatory Considerations	8-278
	8.15.1.2	Access Management Considerations.....	8-281
	8.15.2	Design Basis and Design Criteria.....	8-281
	8.15.2.1	Road Design Basis	8-281
	8.15.2.2	Road Design Criteria.....	8-287
	8.15.2.3	Access Road Tunnel Design Basis and Criteria.....	8-287
	8.15.2.4	Concentrate and Diesel Pipelines	8-288
	8.15.2.5	Power Transmission Line.....	8-290
	8.15.3	Main Features and Environmental Considerations.....	8-293
	8.15.3.1	Construction Phase.....	8-294
	8.15.3.2	Operations Phase.....	8-310
	8.15.3.3	Closure and Post-Closure Phases	8-321
	8.15.3.4	Requirement for Adaptive Management Plans	8-321
	8.15.4	Access Control.....	8-321
	8.15.4.1	Construction Phase Access Control	8-322
	8.15.4.2	Operations Phase Access Control	8-322
8.16		Aerodrome and Aircraft Operations Environmental Management Plan.....	8-324
	8.16.1	Introduction	8-324
	8.16.1.1	Aerodrome Components	8-326
	8.16.1.2	Aerodrome Management Plans	8-326
	8.16.2	Regulatory Requirements	8-331
	8.16.3	Phased Air Operations	8-331
	8.16.3.1	Construction Phase.....	8-331
	8.16.3.2	Operations Phase.....	8-336
	8.16.3.3	Decommissioning and Closure Phase	8-336

9.10.1	Assessment Boundaries	9-74
9.10.1.1	Spatial Boundaries	9-74
9.10.1.2	Temporal Boundaries	9-74
9.10.2	Linkage with Other Human Actions	9-74
9.10.3	Assessment of Cumulative Effects	9-74
10.	Environmental Effects Monitoring and Follow-Up Program	10-1
10.1	Overview	10-1
10.2	Climate Change and Glacier Monitoring	10-2
10.2.1	Climate Change and Glacial Monitoring Follow-up	10-3
10.3	Air Quality Monitoring	10-4
10.3.1	Air Quality Follow-up	10-5
10.4	Noise Monitoring	10-5
10.5	Wildlife and Wildlife Habitat	10-6

Table of Contents

10.5.1	Introduction and Objectives.....	10-6
10.5.2	Monitoring of Project Components	10-6
10.5.2.1	Access Road	10-7
10.5.2.2	Aerodrome and Air Traffic	10-7
10.5.2.3	Transmission Line	10-7
10.5.2.4	Pit Walls	10-8
10.5.2.5	Waste and Wildlife Attractant Management	10-8
10.5.2.6	Tailings Facility	10-9
10.5.3	Monitoring of Focal Species.....	10-9
10.5.3.1	Moose (<i>Alces alces</i>)	10-10
10.5.3.2	Mountain Goat (<i>Oreamnos americanus</i>).....	10-10
10.5.3.3	Western Toad (<i>Bufo boreas</i>)	10-11
10.5.3.4	Grizzly Bear (<i>Ursus arctos horribilis</i>)	10-11
10.5.4	Monitoring Habitat Loss, Change and Reclamation.....	10-12
10.5.4.1	Footprint Expansion and Reclamation	10-12
10.5.4.2	Plant Establishment	10-12
10.5.4.3	Soil Movement	10-12
10.5.4.4	Soil Erosion.....	10-13
10.5.4.5	Metals and Chemicals of Potential Concern in Soils and Plants	10-13
10.5.4.6	Spill Monitoring	10-13
10.5.4.7	Invasive Species	10-13
10.5.5	Wildlife and Wildlife Habitat Follow-up	10-13
10.6	Aquatic Effects Monitoring Program.....	10-14
10.6.1	Hydrology.....	10-16
10.6.2	Surface Water Quality	10-19
10.6.3	Toxicity Testing (Acute and Chronic).....	10-24
10.6.4	Sediment Quality	10-24
10.6.5	Benthic Invertebrates	10-25
10.6.6	Fish	10-26
10.6.7	Groundwater Monitoring.....	10-27
10.6.8	AEMP Follow-up	10-27
11.	Analysis of Alternatives	11-1
11.1	Access Road Alternatives	11-1
11.1.1	Screening Level Evaluation of Seven Alternatives	11-3
11.1.1.1	Original Northern Route.....	11-3
11.1.1.2	Southern Route.....	11-8
11.1.1.3	Bradfield Canal	11-12
11.1.1.4	Berg Bay.....	11-14
11.1.1.5	Babbler Bay.....	11-15
11.1.1.6	Mess Creek.....	11-16
11.1.1.7	Stikine River Barge	11-17
11.1.1.8	Summary of Seven Alternatives.....	11-19
11.1.2	Detailed Evaluation of Two Options	11-19
11.1.3	Selection of Preferred Alternative	11-28
11.2	Location of Site Infrastructure	11-28
11.2.1	Project Infrastructure with Processing Facilities in More Valley.....	11-28

Table of Contents

11.2.2	Project Infrastructure all in Galore Creek Valley	11-31
11.2.3	Project Infrastructure in Galore Creek Valley and Adjacent to Highway 37	11-33
11.3	Mining Method, Rate and Sequence	11-35
11.3.1	Open Pit Versus Underground.....	11-35
11.3.2	Investigation of Various Throughput Rates.....	11-36
11.3.3	Investigation of Various Production Sequences	11-37
11.3.4	Selection of Preferred Alternative	11-39
11.4	Mineral Processing	11-40
11.4.1	Mineral Processing Alternatives Investigated	11-40
11.4.2	Concentrate Refining Evaluated	11-41
11.4.3	Selection of Preferred Alternative	11-41
11.5	Tailings Storage and Management Alternatives	11-41
11.5.1	Evaluation of Eleven Tailings Storage Sites	11-42
11.5.1.1	Site T-1, West Galore Creek	11-42
11.5.1.2	Site T-2, Anuk River Tributary	11-42
11.5.1.3	Site T-3, Galore Creek Valley	11-44
11.5.1.4	Sites T-4 and T-5, Round Lake	11-45
11.5.1.5	Site T-6, Scotsimpson Creek	11-46
11.5.1.6	Site T-7, Scotsimpson Creek	11-46
11.5.1.7	Site T-8, Galore Creek Tributary	11-47
11.5.1.8	Site T-9, Upper Scud River	11-47
11.5.1.9	Sites T-10U and T-10L, Contact Creek.....	11-48
11.5.1.10	Site T-11, Northwest Creek.....	11-48
11.5.2	Evaluation of Two Options in Detail.....	11-49
11.5.3	Selection of Preferred Alternative	11-57
11.6	Waste Rock Storage Alternatives	11-59
11.6.1	Storage of PAG and Non-PAG Waste Rock Adjacent to Open Pit.....	11-59
11.6.2	Storage of PAG and Non-PAG Waste Rock Under Water.....	11-59
11.6.3	Storage of PAG Waste Rock Under Water and Storage of Non-PAG above Water.....	11-60
11.6.4	Backfilling Open Pits	11-60
11.6.5	Selection of Preferred Alternative	11-60
11.7	Effluent Discharge Alternatives.....	11-61
11.7.1	Direct Discharge into Galore Creek	11-62
11.7.2	Discharge into Diversion Channel.....	11-62
11.7.3	Discharge Concentrate Slurry Water to Iskut River	11-62
11.7.4	Discharge Concentrate Slurry Water to Iskut River Tributary	11-63
11.7.5	Selection of Preferred Discharge Locations	11-63
11.8	Water Supply Alternatives.....	11-64
11.8.1	Groundwater Supply Evaluation	11-64
11.8.2	Surface Water Containment.....	11-64
11.8.3	Combination of Groundwater and Surface Containment	11-65
11.8.4	Surface Water Containment.....	11-65
11.8.5	Combination of Groundwater and Surface Containment	11-65
11.8.6	Selection of Preferred Alternative	11-67
11.9	Concentrate Management and Transportation Alternatives.....	11-67

Table of Contents

11.9.1	Dewatering Onsite and Transportation by Truck From the Mine Site to the Port for Shipment Offshore	11-67
11.9.2	Thickening Onsite and Transportation by Slurry Pipeline to Port for Dewatering and Shipment Offshore	11-68
11.9.3	Thickening Onsite and Transportation to Highway 37 by Slurry Pipeline for Dewatering and Transportation by Truck to Port for Shipment Offshore.....	11-69
11.9.4	Transport by Truck From the Mine Site or From the Slurry Pipeline Terminus to Kitwanga for Shipment by Rail to Port.....	11-70
11.9.5	Selection of Preferred Alternative	11-71
11.10	Power Supply Alternatives	11-72
11.10.1	Onsite Diesel Generation.....	11-72
11.10.2	Forest Kerr Power Generation.....	11-72
11.10.3	On-site Hydro Generation	11-73
11.10.4	BC Hydro Grid	11-73
11.10.5	Selection of Preferred Alternative	11-74
11.11	Power Transmission Line Alternatives.....	11-74
11.11.1	Power Transmission Line Along Iskut and Stikine Valleys to Galore Valley (Southern Route Option).....	11-75
11.11.2	Power Transmission Line from Forrest Kerr up Forest Kerr Valley to More Valley and to Galore Valley Through Tunnel	11-76
11.11.3	Power Transmission Line Along North Access Road to Galore Valley.....	11-76
11.11.4	Distribution Line from Bob Quinn to Filter Plant Along Highway 37.....	11-78
11.11.5	Distribution Line from Bob Quinn to Filter Plant as a Straight Line	11-78
11.11.6	Selection of Preferred Alternative	11-79
11.12	Employee Transportation and Accommodation Alternatives.....	11-79
11.12.1	Transportation by Personal Vehicles.....	11-79
11.12.2	Transportation by Bus along Access Road.....	11-80
11.12.3	Transportation by Air to Porcupine Aerodrome	11-80
11.12.4	Transportation by Air to Bob Quinn and by Bus to Site	11-80
11.12.5	Accommodation on Site in Permanent Accommodation.....	11-80
11.12.6	Accommodation in Camp.....	11-81
11.12.7	Selection of Preferred Transportation and Accommodation	11-81
11.13	Employee Work Schedule Alternatives	11-82
11.13.1	Schedule Alternatives Reviewed.....	11-82
11.13.2	Selection of Preferred Alternative	11-82
11.14	Aerodrome Location Alternatives.....	11-82
11.14.1	Selection of Preferred Aerodrome Site.....	11-83
12.	Effects of the Environment on the Project.....	12-1
12.1	Extreme Weather Events	12-1
12.1.1	Drought.....	12-1
12.1.1.1	Effects on the Project	12-1
12.1.1.2	Mitigation Measures.....	12-1
12.1.2	Storms.....	12-2
12.1.2.1	Severe Rainstorms.....	12-2
12.1.2.2	Thunderstorms.....	12-2
12.1.2.3	Snowstorms	12-3

Table of Contents

12.1.3	Temperature Extremes.....	12-4
12.1.3.1	Extended Periods of Higher Temperature	12-4
12.1.3.2	Extended Periods of Lower Temperatures	12-5
12.2	Floods	12-5
12.2.1	Effects on the Project.....	12-6
12.2.2	Mitigation Measures	12-8
12.3	Forest Fires	12-11
12.3.1	Susceptibility of the Project Area to Fires.....	12-11
12.3.2	Effects on the Project.....	12-12
12.3.3	Mitigation Measures	12-13
12.4	Climate Change.....	12-14
12.4.1	Climate Change vs. Climate Variability	12-14
12.4.2	Climate Change Projections	12-15
12.4.3	Effects on the Project.....	12-20
12.4.4	Mitigation Measures	12-22
12.5	Seismic Activity.....	12-22
12.5.1	Seismicity of the Project Area	12-22
12.5.2	Effects on the Project.....	12-23
12.5.3	Mitigation Measures	12-24
12.6	Volcanic Activity	12-24
12.6.1	Volcanic Hazards.....	12-25
12.6.2	Effects on the Project.....	12-25
12.6.3	Mitigation Measures	12-25
13.	Accidents and Malfunctions	13-1
13.1	Introduction.....	13-1
13.2	Project-Wide Risk Analysis.....	13-2
13.2.1	Scope and Objective	13-3
13.2.2	Methodology.....	13-3
13.2.2.1	Likelihood of Occurrence.....	13-4
13.2.2.2	Consequence	13-4
13.2.2.3	Risk Matrix/Ranking	13-4
13.2.2.4	Risk Review Components	13-7
13.2.2.5	Qualitative Risk Analysis.....	13-7
13.3	Geotechnical Failure Modes and Effects Assessment (FMEA).....	13-30
13.3.1	Introduction	13-30
13.3.2	Methodology.....	13-31
13.3.3	FMEA Components.....	13-32
13.3.3.1	Mine Area/Components	13-32
13.3.3.2	Identification Code.....	13-32
13.3.3.3	Failure Mode	13-32
13.3.3.4	Effects	13-32
13.3.3.5	Project Stage.....	13-33
13.3.3.6	Likelihood	13-33
13.3.3.7	Consequences	13-33
13.3.3.8	Level of Confidence	13-35
13.3.3.9	Mitigation/Comments.....	13-35

Table of Contents

13.3.4	Representation of Results	13-35
13.3.5	Risk Evaluation Summary	13-36
13.4	Catastrophic Dam Break Analysis	13-66
14.	Mine Closure and Reclamation	14-1
14.1	Regulatory Framework and Requirements	14-2
14.1.1	Mine Plan and Reclamation Program Submission	14-2
14.1.2	Permit Amendments	14-3
14.1.3	Reclamation Cost Reporting.....	14-4
14.2	Closure and Reclamation Objectives	14-4
14.2.1	Provision of Stable Landforms	14-5
14.2.2	Re-establishment of Productive Land Use	14-5
14.2.2.1	Ecosystem Mapping	14-6
14.2.2.2	Terrestrial and Aquatic Wildlife	14-6
14.2.2.3	Traditional and Current Human Use	14-6
14.2.3	Protection of Terrestrial and Aquatic Resources	14-7
14.2.4	Protection of Heritage and Archaeological Resources	14-7
14.2.5	Progressive Reclamation	14-7
14.3	Reclamation Components	14-8
14.3.1	General End Land Use and Capability Objectives	14-8
14.3.1.1	Post-Mine Wildlife Habitat Objectives	14-9
14.3.1.2	Post-Mine Forest Productivity Objectives	14-9
14.3.2	Soil Handling Plan.....	14-10
14.3.2.1	Stripping Sequence and Methods.....	14-12
14.3.2.2	Stockpile Locations, Volumes and Configuration	14-14
14.3.3	Reclamation	14-20
14.3.3.1	Reclamation Schedule	14-20
14.3.3.2	Soil Material Replacement	14-21
14.3.3.3	Materials Handling Balance	14-24
14.3.4	Post-Mine Capability and Suitability	14-25
14.3.4.1	Post-Mine Ecosystem Units	14-25
14.3.5	Facility-Specific Post-Mine Capability	14-26
14.3.5.1	Open Pits	14-26
14.3.5.2	Waste Rock Dumps.....	14-26
14.3.5.3	Tailings Storage Facility	14-31
14.3.5.4	Plant Site Crusher and Maintenance/Office	14-31
14.3.5.5	Water Management Structures and Reservoirs	14-31
14.3.6	Assessment of Reclamation.....	14-31
14.3.6.1	Assessment Parameters	14-32
14.3.6.2	Reclamation Monitoring	14-32
14.4	Description of Closure Works	14-32
14.4.1	Mine Infrastructure	14-32
14.4.1.1	Mine Buildings.....	14-35
14.4.1.2	Open Pits	14-36
14.4.1.3	Waste Rock	14-36
14.4.1.4	Tailings and Waste Rock Containment Facility	14-36
14.4.1.5	Diversions and Associated Dams	14-37
14.4.2	Ancillary Facilities and Access Road	14-37

Table of Contents

14.4.2.1	Filter Plant.....	14-37
14.4.2.2	Pipelines.....	14-38
14.4.2.3	Aerodrome and Heliport.....	14-38
14.4.2.4	Access Road and Tunnel.....	14-38
14.5	Socio-Economic Issues.....	14-39
14.6	Closure Cost Estimate.....	14-39
14.7	Post-Closure Monitoring.....	14-39
15.	Summary of Commitments.....	15-1
15.1	Introduction.....	15-1

6.13-13 Enhanced Habitat Suitability Goat (Winter) Model and Goat Survey Observations.....	6-211
6.13-14 Enhanced Habitat Suitability Goat (Summer) Model and Goat Survey Observations.....	6-213
6.13-15 Enhanced Habitat Suitability Model for Grizzly Bear (Spring)	6-217
6.13-16 Enhanced Habitat Suitability Model for Grizzly Bear (Summer).....	6-219
6.13-17 Enhanced Habitat Suitability Model for Grizzly Bear (Fall).....	6-221
6.14-1 Locations of Heritage Sites Recorded for the Galore Creek Project	6-230
6.15-1 Traditional Land Use – Localized Study Area	6-236
6.16-1 Socio-Economic Impact Areas	6-239
6.15-2 Highway 37, 37A, Projected Truck Traffic.....	6-254
6.18-1 Traditional Knowledge Base Map.....	6-265
6.19-1 Bridge Crossings Over Potentially Navigable Water	6-271
7.1-1 Environmental Effects Assessment Area for the Galore Creek Project	7-3
7.1-2a Location of Project Components (A)	7-5
7.1-2b Location of Project Components (B)	7-6
7.1-2c Location of Project Components (C)	7-7
7.1-3 Relationship between Project Components, Impacts, Effects and Issues (example).....	7-8
7.2-1 Estimated Annual Direct GHG Emissions from the Galore Creek Project	7-19
7.3-1 Study Areas for the Air Quality Effects Assessment for the Galore Project	7-35
7.3-2 CALPUFF Line and Area Sources in the Mine Area	7-44
7.3-3 Regional, Local and Nested Receptor Grids for the CALPUFF Air Quality Modelling Study	7-49
7.3-4 Predicted Maximum 1-Hour SO ₂ (µg/m ³) Concentrations for June/July (Year 3, Worst Case).....	7-55
7.3-5 Predicted Maximum 1-Hour SO ₂ (µg/m ³) Concentrations for January (Year 3, Worst Case).....	7-57

Table of Contents

Figure	Page
7.3-6 Predicted Average Runtime (1444 hours) SO ₂ (µg/m ³) Concentrations for June/July (Year 3, Worst Case)	7-59
7.3-7 Predicted Average Runtime (1444 hours) SO ₂ (µg/m ³) Concentrations for January (Year 3, Worst Case)	7-61
7.3-8 Predicted Maximum 1-Hour NO _x as NO ₂ (µg/m ³) Concentrations for June/July (Year 3, Worst Case)	7-65
7.3-9 Predicted Maximum 1-Hour NO _x as NO ₂ (µg/m ³) Concentrations for January (Year 3, Worst Case)	7-67
7.3-10 Predicted Maximum 24-Hour NO _x as NO ₂ (µg/m ³) Concentrations for June/July (Year 3, Worst Case)	7-69
7.3-11 Predicted Maximum 24-Hour NO _x as NO ₂ (µg/m ³) Concentrations for January (Year 3, Worst Case)	7-71
7.3-12 Predicted Maximum 1-Hour CO (µg/m ³) Concentrations for June/July (Year 3, Worst Case)	7-73
7.3-13 Predicted Maximum 1-Hour CO (µg/m ³) Concentrations for January (Year 3, Worst Case)	7-75
7.3-14 Predicted Maximum 24-Hour PM _{2.5} (µg/m ³) Concentrations for June/July (Year 3, Worst Case)	7-77
7.3-15 Predicted Maximum 24-Hour PM _{2.5} (µg/m ³) Concentrations for January (Year 3, Worst Case)	7-79
7.3-16 Predicted Maximum 24-Hour TSP (µg/m ³) Concentrations for June/July (Year 3, Worst Case)	7-81
7.3-17 Predicted Maximum 24-Hour TSP (µg/m ³) Concentrations for January (Year 3, Worst Case)	7-83
7.3-18 Predicted Average Runtime (1444 hours) TSP (µg/m ³) Concentrations for June/July (Year 3, Worst Case)	7-85
7.3-19 Predicted Average Runtime (697 hours) TSP (µg/m ³) Concentrations for January (Year 3, Worst Case)	7-87
7.3-20 Predicted Potential Runtime (1444 hours) Sulphate (kg/ha/yr) Deposition for June/July (Year 3, Worst Case)	7-91
7.3-21 Predicted Potential Runtime (1444 hours) Nitrate (kg/ha/yr) Deposition for June/July (Year 3, Worst Case)	7-93

Table of Contents

Figure	Page
7.3-22 Predicted Average (1444 hours) Dustfall (TSP) (kg/ha/yr) Deposition for June/July (Year 3, Worst Case).....	7–95
7.3-23 Predicted Average Runtime (1444 hours) SO ₂ Concentrations (µg/m ³) Along the Galore Access Road for June /July (Year 3, Worst Case).....	7–97
7.4-1 Daytime Average Sound Levels (Leq) From Access Road Construction and Helicopter Flight Paths.....	7–113
7.4-2 Typical Day and Night Average Sound Levels (Leq) for Construction at Galore Creek Mine Site (Year -2)	7–115
7.4-3 Typical Day and Night Average Sound Levels (Leq) for Construction at Galore Creek Mine Site (Year -1)	7–119
7.4-4 1.5 Minute Equivalent Sound Level for Dash 8 Takeoff from Porcupine Aerodrome Runway	7–121
7.4-5 Daytime Average Sound Levels (Leq) at the Porcupine Aerodrome: Construction Phase and Midlife	7–123
7.4-6 Maximum Helicopter (Sikorsky S-61) Pass-By Sound Levels (185 km/hr, 150 m above ground).....	7–125
7.4-7 Daytime and Night Time Average Sound Levels (Leq) Along the Access Road (Midlife)	7–129
7.4-8 Typical Day and Night Time Average Sound Levels (Leq) for Galore Creek Mine Site (Year 10).....	7–131
7.4-9 Maximum Sound Levels from Central Pit Mine Blast (Years 1 and 10) and Howitzer Avalanche Control (Year 10)	7–133
7.5-1 Scale and Specific Locations Considered for Impact Assessment of Surface Hydrology VEC	7–141
7.5-2 Minesite Drainage Areas – Pre-development.....	7–146
7.5-3 Minesite Drainage Areas – Year 1	7–147
7.5-4 Minesite Drainage Areas, Year 2 to 20	7–148
7.5-5 Minesite Drainage Areas - Closure	7–149
7.5-6 Proposed Annual Paced Discharge Schedule for Average Year and Compressed Paced Discharge	7–160
7.5-7 Proposed Annual Paced Discharge Schedule for 1 in 200 Wet Year and Compressed Paced Discharge	7–161

Table of Contents

Figure	Page
7.5-8	Proposed Annual Paced Discharge Schedule for 1 in 200 Dry Year and Compressed Paced Discharge 7-162
7.5-9	Baseline and Predicted Flows within the Scud River Downstream of Galore Creek for an Average Year 7-163
7.5-10	Baseline and Predicted Flows within the Scud River Downstream of Galore Creek for a 1 in 200 Wet Year 7-164
7.5-11	Baseline and Predicted Flows within the Scud River Downstream of Galore Creek for a 1 in 200 Dry Year 7-165
7.5-12	Effects of the Galore Creek Project on the Annual Hydrograph at the Mouth of Galore Creek 7-166
7.5-13	Tailings and Waste Rock Storage Facility Storage Volumes 7-170
7.5-14	Simulated Effects to the Q_{200} Peak Flow Event at the Mouth of Galore Creek 7-177
7.5-15	Stage at the Mouth of Galore Creek During Annual Low Flow Conditions..... 7-180
7.5-16	Potential Effects of the Access Corridor on Hydrological Processes 7-185
7.5-17	Potential for Road Related Drainage Effects..... 7-189
7.5-18	Iskut River Watershed above Filter Plant..... 7-194
7.6-1	Water Quality Effect Assessment Boundaries for the Galore Creek Project..... 7-201
7.6-2	Mine Area and Receiving Environment for the Galore Creek Project 7-203
7.6-3	Location of Project Components in Project Area..... 7-205
7.6-4	Location of Project Components in Galore Valley..... 7-206
7.6-5	Location of Project Components at the Mine Site 7-207
7.6-6	Relative Loadings of Selected Variables from Mine and Background Inputs to Tailings Facility over the Life of the Mine..... 7-223
7.6-7	Relative Loadings of Nitrogen-Nutrients from Mine and Baseline Inputs to Tailings Facility over the Life of the Mine..... 7-224
7.6-8	Proposed Annual Pace Discharge Schedule (May 15 – Oct. 15) for Average Year and Compressed Pace Discharge (July 15 – Oct. 15) 7-232
7.6-9	Tailings Pond Discharge Point and Receiving Environment 7-234
7.6-10	Plan View of Hydrodynamic Model Area 7-235

Table of Contents

Figure	Page
7.6-11 Velocity Distribution in Scud River Downstream of Galore Creek During Winter Low Flow.....	7-237
7.6-12 Velocity Distribution in Scud River Downstream of Galore Creek During Summer High Flow	7-237
7.6-13 Background Average Sulphate Concentrations in Scud River Downstream of Galore Creek during Winter Low Flow.....	7-239
7.6-14 Background Average Sulphate Concentrations in Scud River Downstream of Galore Creek during Summer High Flow.....	7-239
7.6-15 Predicted average sulphate concentrations in Scud River downstream of Galore Creek during winter low flow (effluent storage).....	7-241
7.6-16 Predicted average sulphate concentrations in Scud River downstream of Galore Creek during summer high flow (effluent discharge)	7-241
7.6-17a Background average dissolved zinc concentrations in Scud River downstream of Galore Creek during winter low flow	7-243
7.6-17b Background average dissolved zinc concentrations in Scud River downstream of Galore Creek during summer high flow	7-243
7.6-17c Predicted Average Dissolved Zinc Concentrations in Scud River Downstream of Galore Creek during Winter Low Flow (Effluent Storage).....	7-245
7.6-17d Predicted Average Dissolved Zinc Concentrations in Scud River Downstream of Galore Creek during Summer High Flow (Effluent Discharge)	7-245
7.6-18 Comparison of Annual Distribution of Mean “Best Science” Model and Baseline Concentrations for Selected Variables in Galore Creek	7-248
7.6-19 Stream and Left Bank Section Showing Treated Filtrate Effluent Pipeline and Diffuser	7-258
7.6-20 Filter Plant Diffuser Discharge Point and Receiving Environment	7-259
7.6-21 Illustration of Effluent Dilution at Annual Low Flow from the Iskut River Diffuser...	7-260
7.6-22 Dilution of Treated Filtrate Water in the Iskut River at Average Flow Conditions...	7-262
7.7-1 Environmental Assessment Boundaries for the Groundwater Valued Ecosystem Components.....	7-275
7.7-2 Pre-development Elevation of the Water Table and Predicted Groundwater Flow Direction	7-277

Table of Contents

Figure		Page

7.6-12	HQ values for Baseline Water Quality in Mine Area Receiving Environment from May to October (2004 to 2005) 7-250
7.6-13	HQ ¹ values (TRV = guideline concentration) for "Best Science" Model of Water Quality in the Mine Area Receiving Environment, May 15 to October 15 7-251
7.6-14	HQ ¹ values (TRV = guideline concentration) for "Worst Case" Model of Water Quality in the Mine Area Receiving Environment, May 15 to October 15 7-252
7.6-15	HQ ¹ Values (TRV = baseline concentrations) for "Best Science" Model of Water Quality in the Mine Area Receiving Environment, May 15 to October 15 .. 7-253
7.6-16	HQ ¹ Values (TRV = baseline concentrations) for "Worst Case" Model of Water Quality in the Mine Area Receiving Environment, May 15 to October 15 7-254
7.6-17	Rationale for HQ Calculations Using Baseline Data 7-255
7.6-18	Dilution Ratios of Intervals Downstream of Diffuser 7-261
7.6-19	HQ values for Baseline Water Quality in Filter Plant Receiving Environment 7-263
7.6-20	Hazard Quotients for Filter Plant Effluent Discharge in Iskut River 7-264
7.6-21	Assessment of the Significance of Residual Adverse Effects for Surface Water Quality 7-269
7.7-1	Environmental Effects Assessment Criteria 7-271
7.7-2	Descriptor Definitions for the Environmental Effects Assessment 7-272

Table of Contents

LIST OF PLATES

Plate	Page
3.1-1 Kimberley Lee, Tahltan member, receives Statement of Completion Certificate for Basics in Environmental Monitoring Course. Kimberley worked at Galore Creek during the 2005 field season.	3–3
3.1-2 Tahltan graduates from the Environmental Monitoring Course. Representatives from Rescan, NovaGold and Kwantlen College are also in photo.	3–3
3.1-3 RTEC Logo	3–4
3.1-4 Dancing at Special Assembly.	3–5
3.1-5 Review of the model at the Special Assembly	3–6
3.1-6 Ceremonial wall hanging with Jerry Asp (Chief Tahltan Band), Rick Van Nieuwenhuyse (President & CEO NovaGold), Curtis Rattray (Chair Tahltan Central Council) and Marie Quock (Chief Iskut First Nation).	3–8
3.1-7 Winning logo for helicopter.	3–23
3.1-8 Tuh'da det'ah helicopter.	3–23
6.2-1 Meteorological station installed near West More Creek. GEONOR precipitation gauge can be seen on the left.	6–9
6.3-1 R & P Partisol Model 2000H air sampler in operation at the Porcupine River sample site. Partisol air samplers were used to determine background concentrations for fine particulate (<i>i.e.</i> , PM10 and PM2.5).	6–12
6.4-1 Quest 2900 sound level meter within environmental enclosure kit monitoring baseline noise levels during July 2005. Microphone protected by a wind screen/weather shield and bird spikes. Weather-resistant case protects the meter and battery pack and provides a stable base for the kit.	6–14
6.5-1 View of Galore Creek – East Fork.	6–18
6.5-2 View of More Creek looking east.	6–21
6.8-1 Lake site on the access corridor, July 2005.	6–84
6.8-2 Upper Sphaler Creek, August 2004.	6–89
6.8-3 Wetland on south slope of the Porcupine Valley near the proposed aerodrome site, July 2005.	6–90

Table of Contents

Plate	Page
6.9-1	Proposed crossing site over the Porcupine River, looking upstream, with Sphaler Creek entering from the left.....6-94
6.9-2	Typical fish habitat in the Iskut River, looking upstream near the proposed dewatering plant discharge.....6-98
6.9-3	Fish habitat at the upstream entrance to “Airstrip Channel” northwest of the proposed Porcupine Airstrip, 2005.6-103
6.9-4	Upper Galore Creek (Galore-1C), looking downstream, showing poor fish habitat.6-107
6.9-5	Lower Galore Creek: Galore-3 looking upstream.6-107
6.9-6	Scud River (Scud-2) looking upstream toward Galore Creek (entering from right).....6-108
6.9-7	Typical habitat looking upstream along the Stikine River (Stikine-5).....6-113
6.10-1	Examples of each federal wetland class from within the Galore Creek Project area.....6-119
6.12-1	ATp heather heath meadow and herbaceous meadow.6-144
6.12-2	ICHwc zonal (01) forest in eastern More Creek area.6-144
6.12-3	ESSFwv zonal (01) forest in the proposed access corridor.....6-147
6.12-4	ESSFwvp heath and herbaceous meadow.....6-147
6.12-5	<i>Eriophorum vaginatum</i> ssp. <i>vaginatum</i>6-148
6.12-6	Habitat for <i>Oxytropis jordalii</i> ssp. <i>jordalii</i>6-149
6.12-7	The ridged landscape of the Iskut River Lowlands physiographic subdivision is typical of the filter plant area.....6-151
6.12-8	Landscape of the aerodrome area is typical of the slightly elevated former floodplain of the Porcupine River Valley.6-151
6.12-9	Steep forested landscape typical of SMU Cw1, Site 1272.6-154
6.12-10	Soil profile for a rapidly drained, deep colluvial soil, SMU Cw1, Site 1272.....6-160
6.12-11	Looking northeast across the strongly sloping landscape of recent morainal deposits from Site 1167 above West Fork creek, typical of SMU Mp3.....6-160

Table of Contents

Plate	Page
6.12-12 Site 24 exhibits a soil profile with very weak horizonation (Regosolic), developed in slightly calcareous, gravelly morainal material, as typical of soils in SMU Mp3.	6-163
6.13-1 Moose winter habitat along the floodplain of the Porcupine and Stikine rivers.....	6-167
6.13-2 Incidental mountain goat observations, June 2005.	6-171
6.13-3 Lakes supporting lesser scaup broods, lower Mess Creek.	6-186
6.13-4 Lake supporting common loon brood, lower More Creek.	6-186
6.13-5 Lake used by waterfowl in the ESSF zone of Sphaler Creek.	6-191
6.13-6 Round Lake.	6-191
6.13-7 Swamp/fen habitat associated with waterfowl observations, Porcupine and Stikine rivers.	6-195
6.13-8 Marsh habitat associated with waterfowl observations, Porcupine and Stikine rivers.	6-195
6.13-9 Location of golden eagle nest sites, Sphaler Creek.	6-201
6.13-10 Least sandpiper nest habitat, Roca Creek.....	6-203
6.13-11 Semi-palmated plover habitat, Round Lake.....	6-203
6.13-12 Highly suitable winter habitat for moose, Porcupine River, 2005.....	6-208
6.13-13 Highly suitable summer habitat for mountain goat, More Canyon, June 2005.	6-215
6.13-14 Highly suitable late spring/early summer habitat for grizzly bear, east of Round Lake, 2005.	6-223
6.13-15 Highly suitable summer habitat for grizzly bear, mine area, 2005.	6-224
6.14-1 George Kaufman and Don Asp testing at HgTs-2 looking north.....	6-231
6.14-2 View of HgTr-1 looking south.....	6-231
6.14-3 Don Asp and George Kaufman at cabin remains at TCH-T1.	6-232
6.14-4 Don Asp at lean-to remains at TCH-T2.	6-232
6.14-5 One of the artifacts found at HgTs-1.....	6-233
7.5-1 Lower More Valley at Muskwie Creek.	7-187

Table of Contents

Plate		Page
7.5-2	Looking downstream on the Iskut River from near the proposed Filter Plant Diffuser site	7-193
7.5-3	Porcupine River flowing from the outlet of Porcupine Lake.	7-196
7.14-1	One of the artifacts found at HgTs-1	7-622
7.14-2	George Kaufman and Don Asp testing at HgTs-2 looking north.....	7-623
7.14-3	View of HgTr-1 looking south.....	7-623
7.14-4	Don Asp and George Kaufman at Cabin remains at TCH-T1.....	7-624
7.14-5	Don Asp at lean-to remains at TCH-T2.	7-624

LIST OF APPENDICES

Appendix 3-A	Galore Creek Gold-Silver-Copper Project Overview #1
Appendix 3-B	Galore Creek Gold-Silver-Copper Project Overview #2
Appendix 3-C	Galore Creek Gold-Silver-Copper Project Overview #3
Appendix 3-D	Galore Creek Gold-Silver-Copper Project Overview #4
Appendix 3-E	Galore Creek Gold-Silver-Copper Project Overview #5
Appendix 3-F	Galore Creek Gold-Silver-Copper Project Overview #6
Appendix 5-A	Galore Creek Project ML/ARD Characterization Report
Appendix 5-B	Grade-Tonnage Tables for Resource Estimates, Central, Southwest, Junction, West Fork Zones
Appendix 5-C	Grade-Tonnage Tables for Resource Estimates, Inverse Distance Squared Resource Estimates, Central and Junction Zones
Appendix 5-D	Lithologic Codes
Appendix 5-E	Galore Creek Feasibility Assessment Geohazard Assessment
Appendix 5-F	Updated Preliminary Economic Assessment for the Galore Creek Project
Appendix 5-G	Process Pilot Plant Environmental Test Work
Appendix 5-H	Conceptual Water Treatment Design for Concentrate Filter Plant Water
Appendix 5-I	Waste and Water Management Feasibility Geotechnical Report
Appendix 5-J	Feasibility Study – Galore Creek Mine Access Road 2005 Study Report
Appendix 5-K	Galore Project Aerodromes Concept
Appendix 5-L	Galore Creek Project Power Supply Pre-Feasibility Study North Route
Appendix 6-A	Galore Creek Meteorology, Air Quality and Noise Baseline Studies Report
Appendix 6-B	Galore Creek Mountain Goat Baseline Report 2004-2005

Table of Contents

Appendix 6-C	Galore Creek Surface Hydrology Assessment Baseline Report
Appendix 6-D	Galore Creek 2004 Aquatic Baseline Studies Report
Appendix 6-E	Galore Creek 2005 Aquatic Baseline Studies Report
Appendix 6-F	Galore Creek Environmental Baseline Overburden Assessment Report
Appendix 6-G	Galore Creek Project Groundwater Baseline 2005
Appendix 6-H	Galore Creek Wetland Classification and Assessment Baseline Report 2005
Appendix 6-I	Galore Creek Project Access Corridor Acid Rock Drainage Potential Assessment
Appendix 6-J	Galore Creek Ecosystem Mapping and Vegetation Baseline Report 2004-2005
Appendix 6-K	Galore Creek Environmental Baseline Soil Survey Report
Appendix 6-L	Galore Creek Moose Studies Baseline Report 2005
Appendix 6-M	Galore Creek Grizzly Bear Study Baseline Report 2004/2005
Appendix 6-N	Galore Creek Small Mammals, Bats and Herpetiles Baseline Report 2005
Appendix 6-O	Galore Creek Bird Studies Baseline Report 2004-2005
Appendix 6-P	Harlequin Duck and Waterfowl Survey 2006
Appendix 6-Q	Galore Creek Wildlife Habitat Ratings and Enhanced Habitat Suitability Models for Six Focal Species, 2004 to 2005
Appendix 6-R	Galore Creek Project Archaeological Baseline Assessment, 2005
Appendix 6-S	Galore Creek Project Socio-Economic Impact Assessment
Appendix 6-T	Galore Creek Country Foods Baseline Assessment
Appendix 7-A	Galore Creek Project Environmental Assessment Detailed Model Plan and Ministry Correspondence
Appendix 7-B	CALPUFF Air Quality Modelling Assessment Estimate Distribution of the Diesel Mining Equipment for Year 3 (Winter)
Appendix 7-C	Summary Report of Galore Creek Project Noise Components

Table of Contents

Appendix 7-D	Galore Creek Storage Facility Water Quality Prediction Model
Appendix 7E	Galore Creek Project UBC Watershed Modelling
Appendix 8-A	Terrain Maps
Appendix 13-A	HATCH Galore Creek Project Risk Review
Appendix 13-B	Geotechnical FMEA Risk Evaluation
Appendix 13-C	Galore Creek Dam Failure Analysis
Appendix 14-A	Feasibility – Geotechnical and Hydrogeological Site Investigation Report
